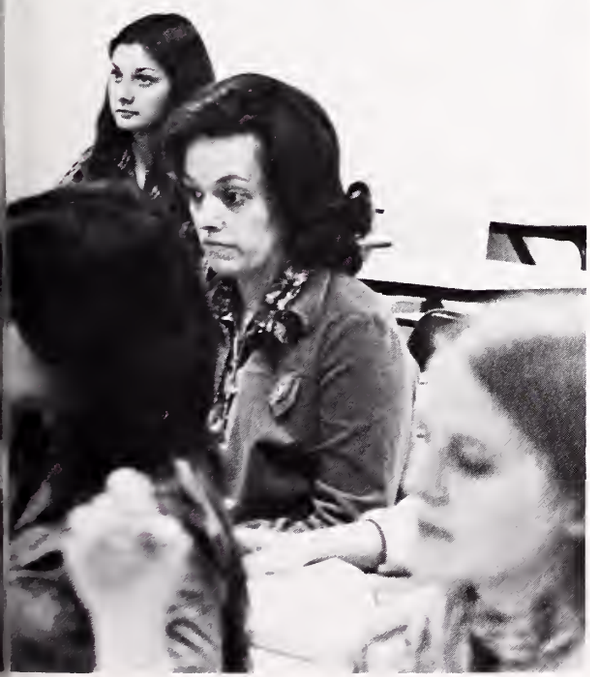
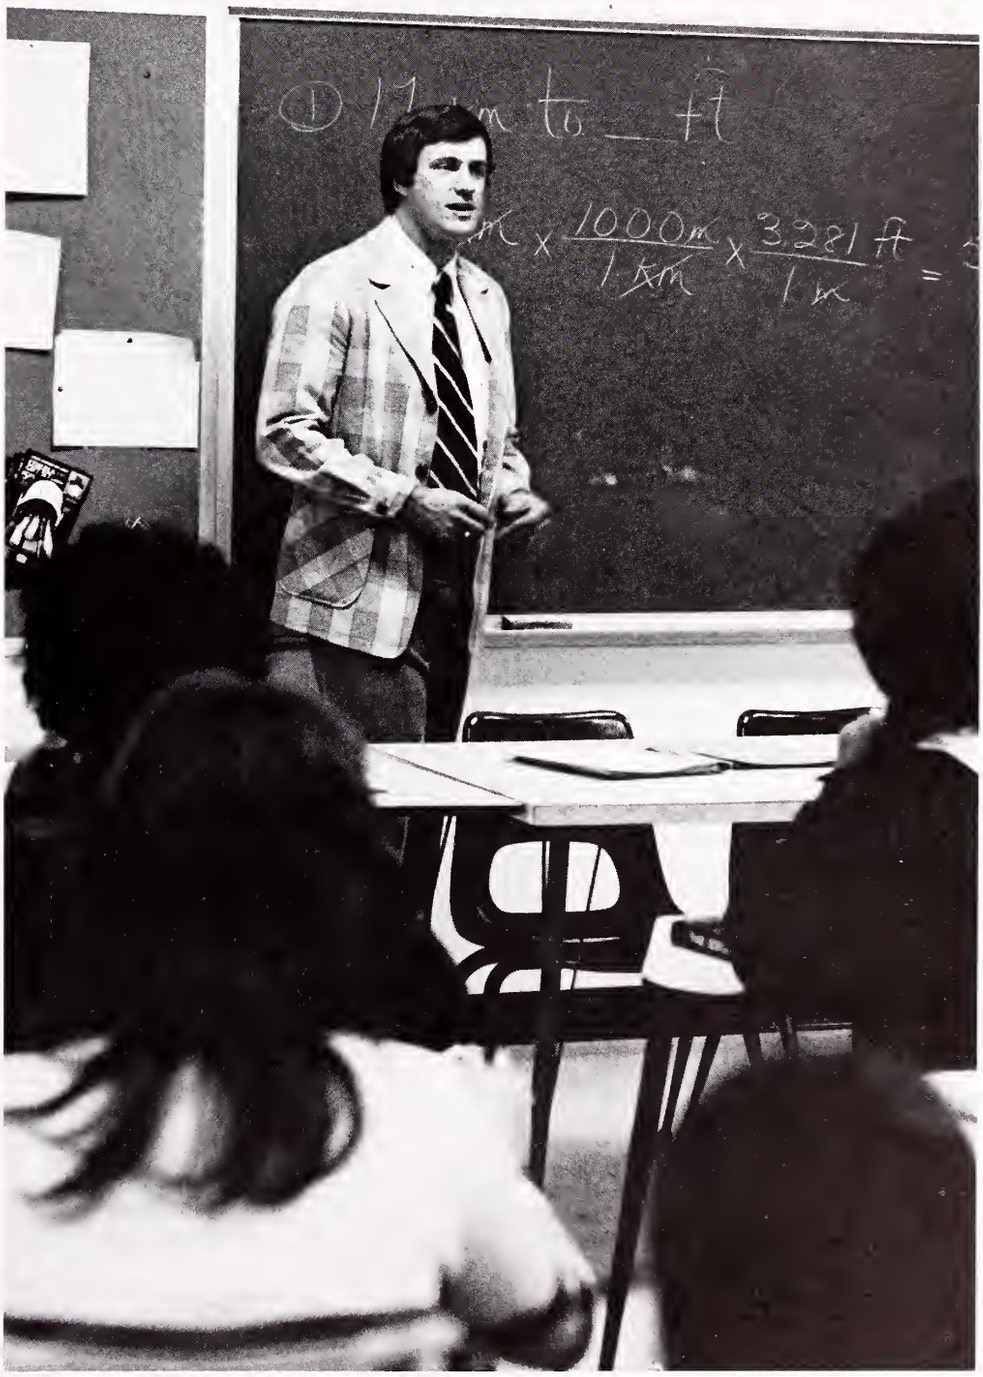
MODERN BIOLOGY

# Allied Health Preparatory

It's been called Allied Health Preparatory (AHP), Developmental Skills and any number of things, but it all boils down to some concentrated studying and a little bit of hard work. These folks are preparing for one of the health courses. They're taking things like Biology, Anatomy and Physiology, English and math.





Dan Riddle — Department Head

# Business Division

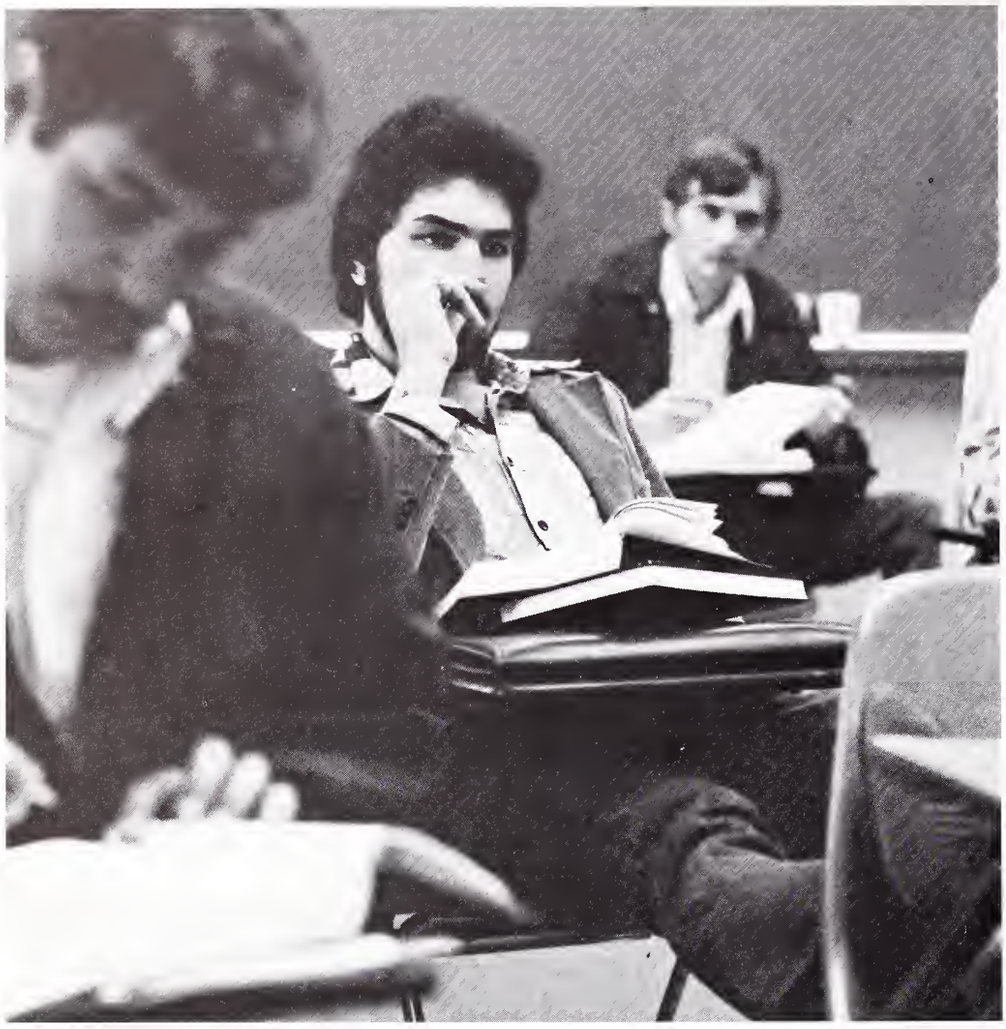
What do they offer in the Business Division? The sounds of the Business World — typewriters, adding machines, sales pitches and hurrying feet.

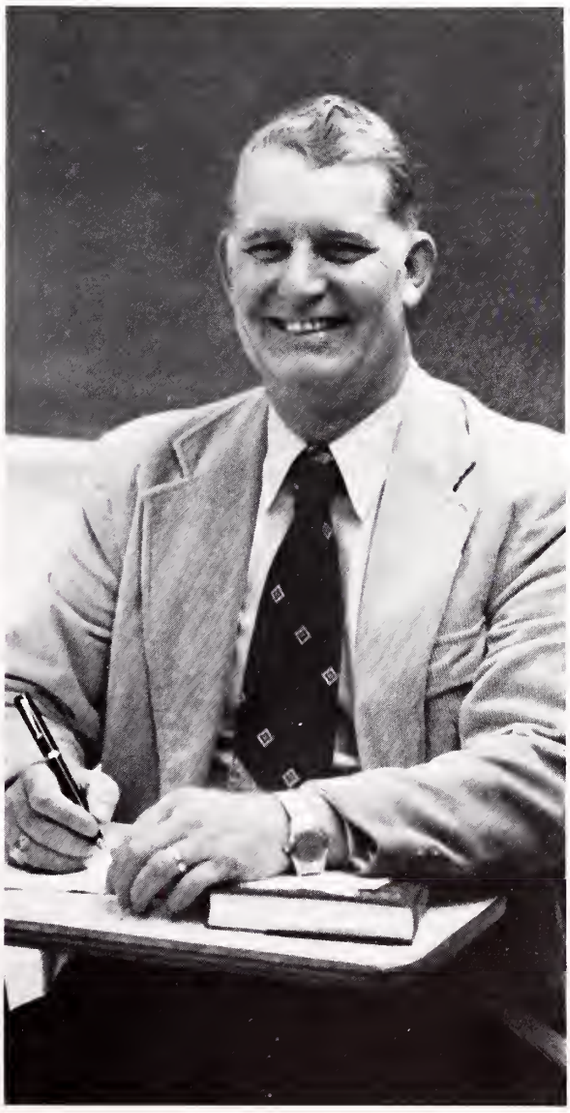
What do they offer in the Business Division? A feel of the Business World — the texture of journal pages, the cool metal of a computer and the tapered wood of a pencil.

What do they offer in the Business Division? A taste of the Business World. There are bake sales by the Fraternities and Sororities and Pizza parties for the fraternities and sororities.

What do they offer in the Business Division? A future in the Business World.

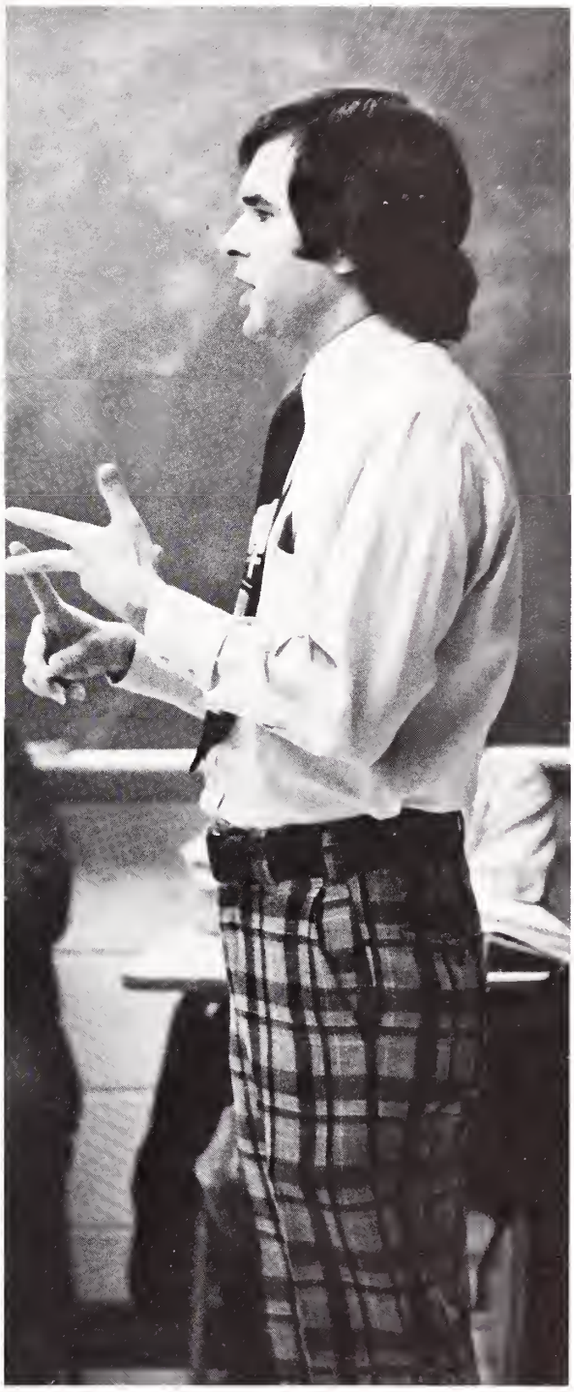
143 Accounting
147 Business Administration
151 Marketing
155 Secretarial
159 Paralegal Technology
163 Data Processing
167 Criminal Justice





# Accounting

Tax forms, work sheets, balance statements, posting — the accountant fills his/her world with all kinds of complicated rules and forms. And there's also payroll, cost, auditing, income statements, and the list goes on and on.



Roy Townsend, Department head

Fred Plott, Instructor

Paul Batson — Program Chairman, BA

SMALL BUSINESS MANAGEMENT
COMPUTER DISPLAY SYSTEMS
THE GREAT ASCE

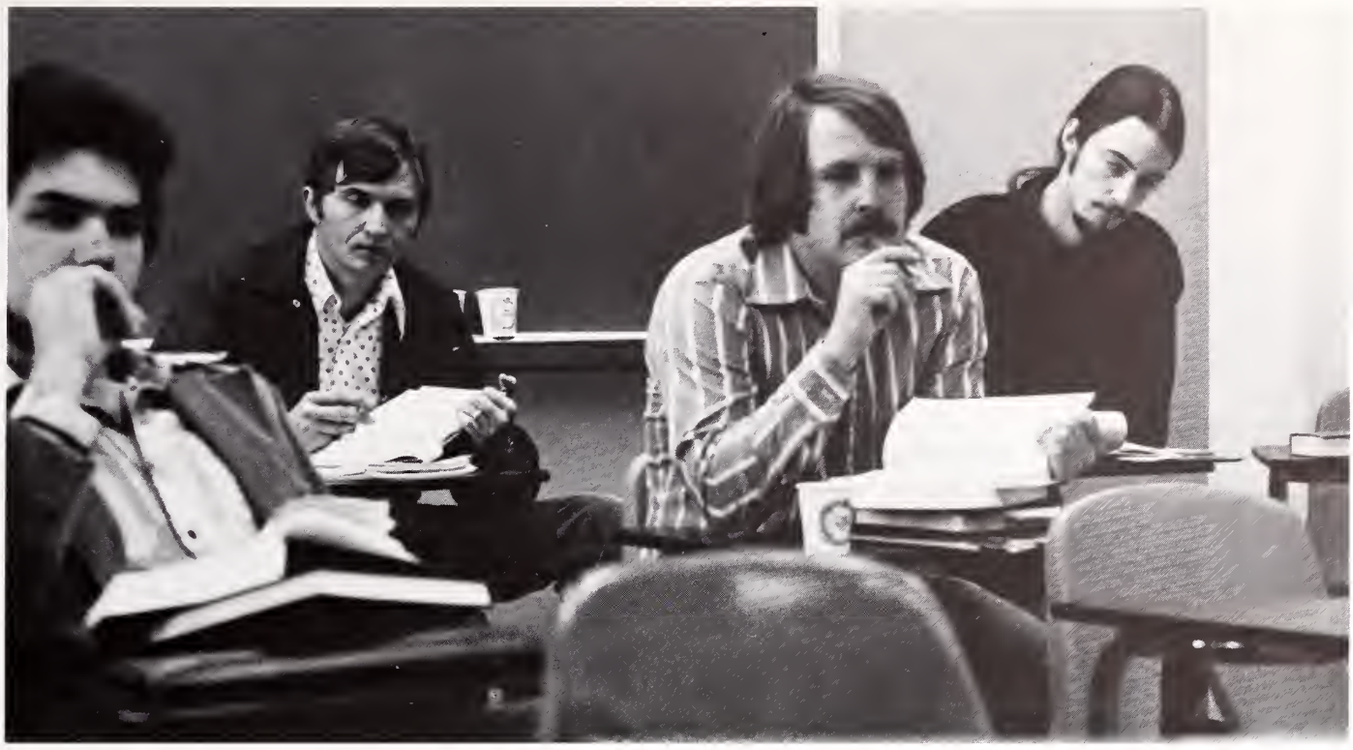
# General Business-BA

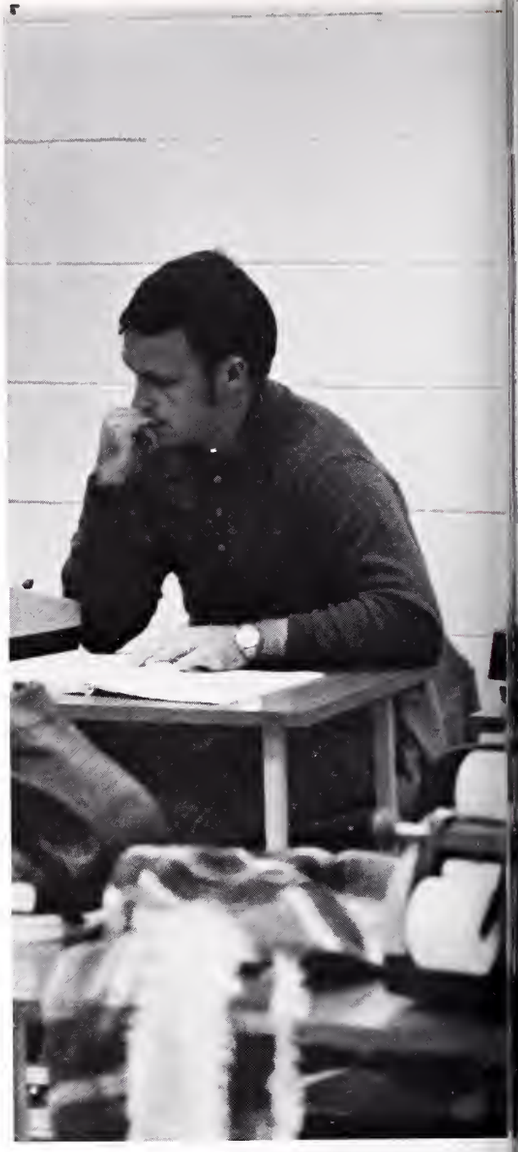
The students who choose General Business get to take all kinds of classes: economics, law, insurance, statistics, business machines, accounting, and on and on. It may be a general course, but it covers a lot of specifics.

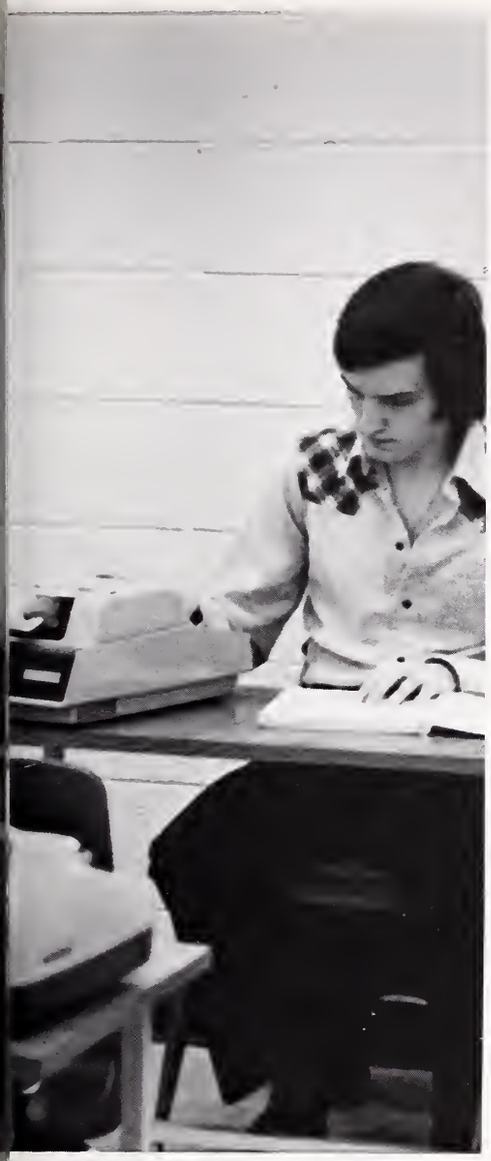
Frances Hines, Instructor

Ben Seegars, Department Head, Economics

Jim Oneal, Instructor

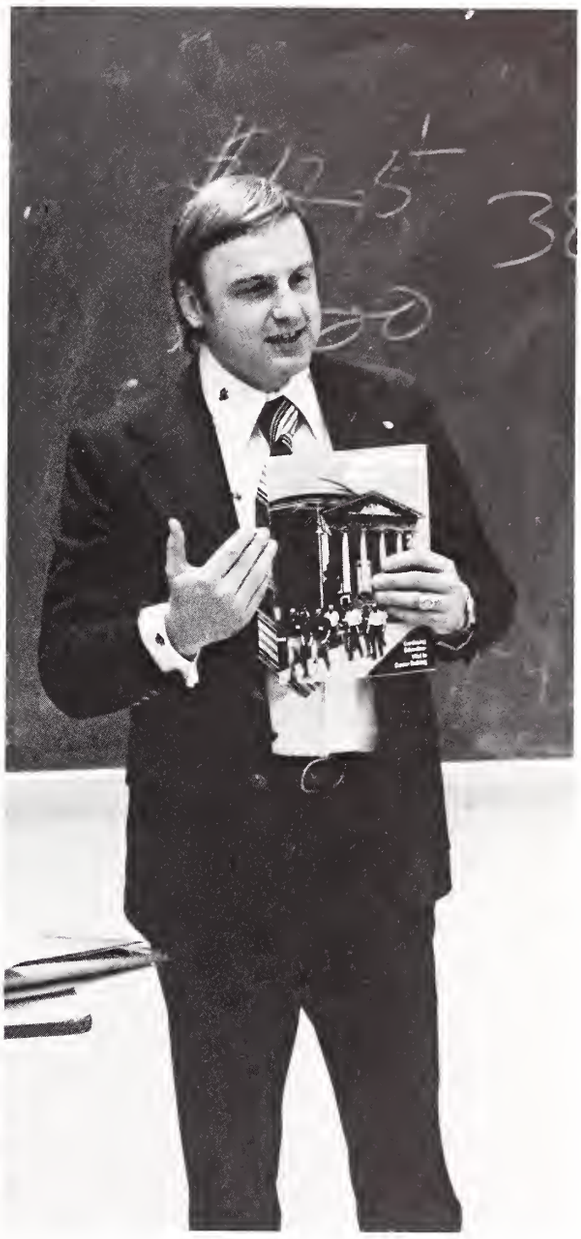






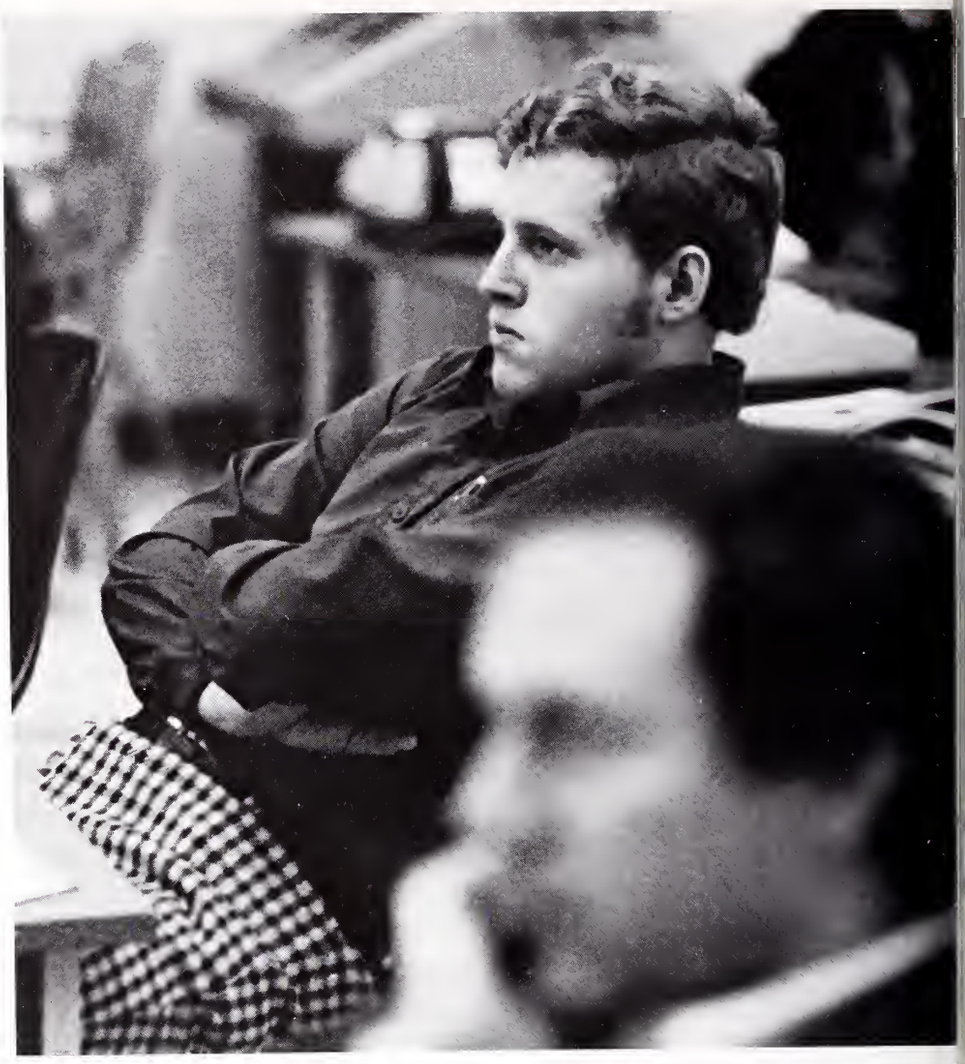
# Marketing

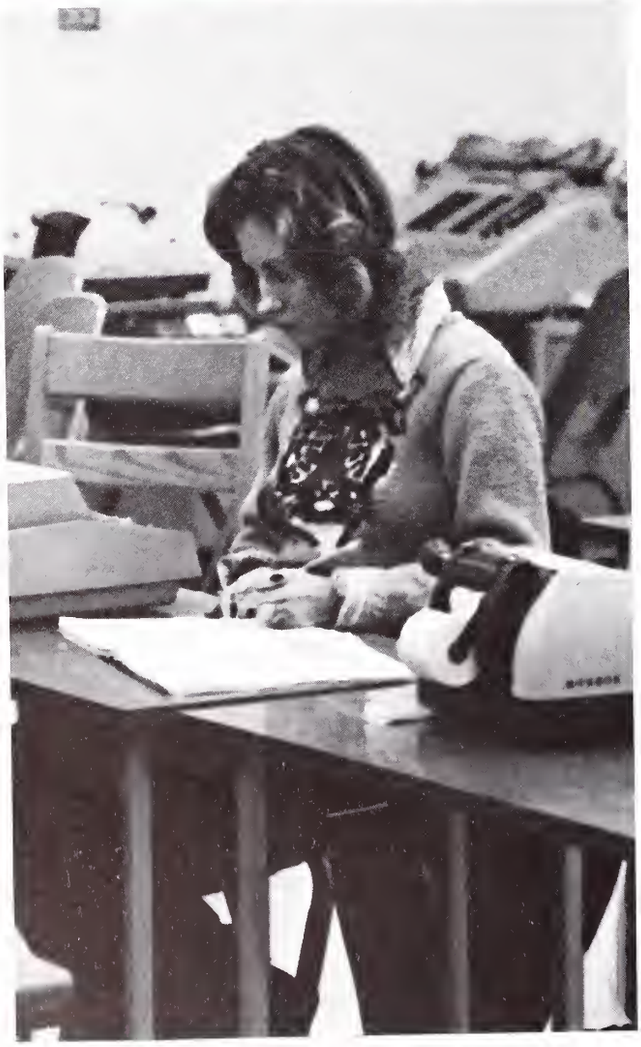
The guys and gals in Marketing are debating on whether to go into sales, market research, buying, wholesale management, purchasing or maybe advertising. The classes show that the choices of careers is very diverse.



John Stepp — Instructor — BA

Charles Rutledge — Department Head — Marketing





# Secretarial Science

Executive, technical, medical, legal secretaries are all graduating from the self-paced typing and shorthand labs of Secretarial Science. They're leaving behind the world of cassettes and electric machines.

Mitsy Ballentine, Instructor

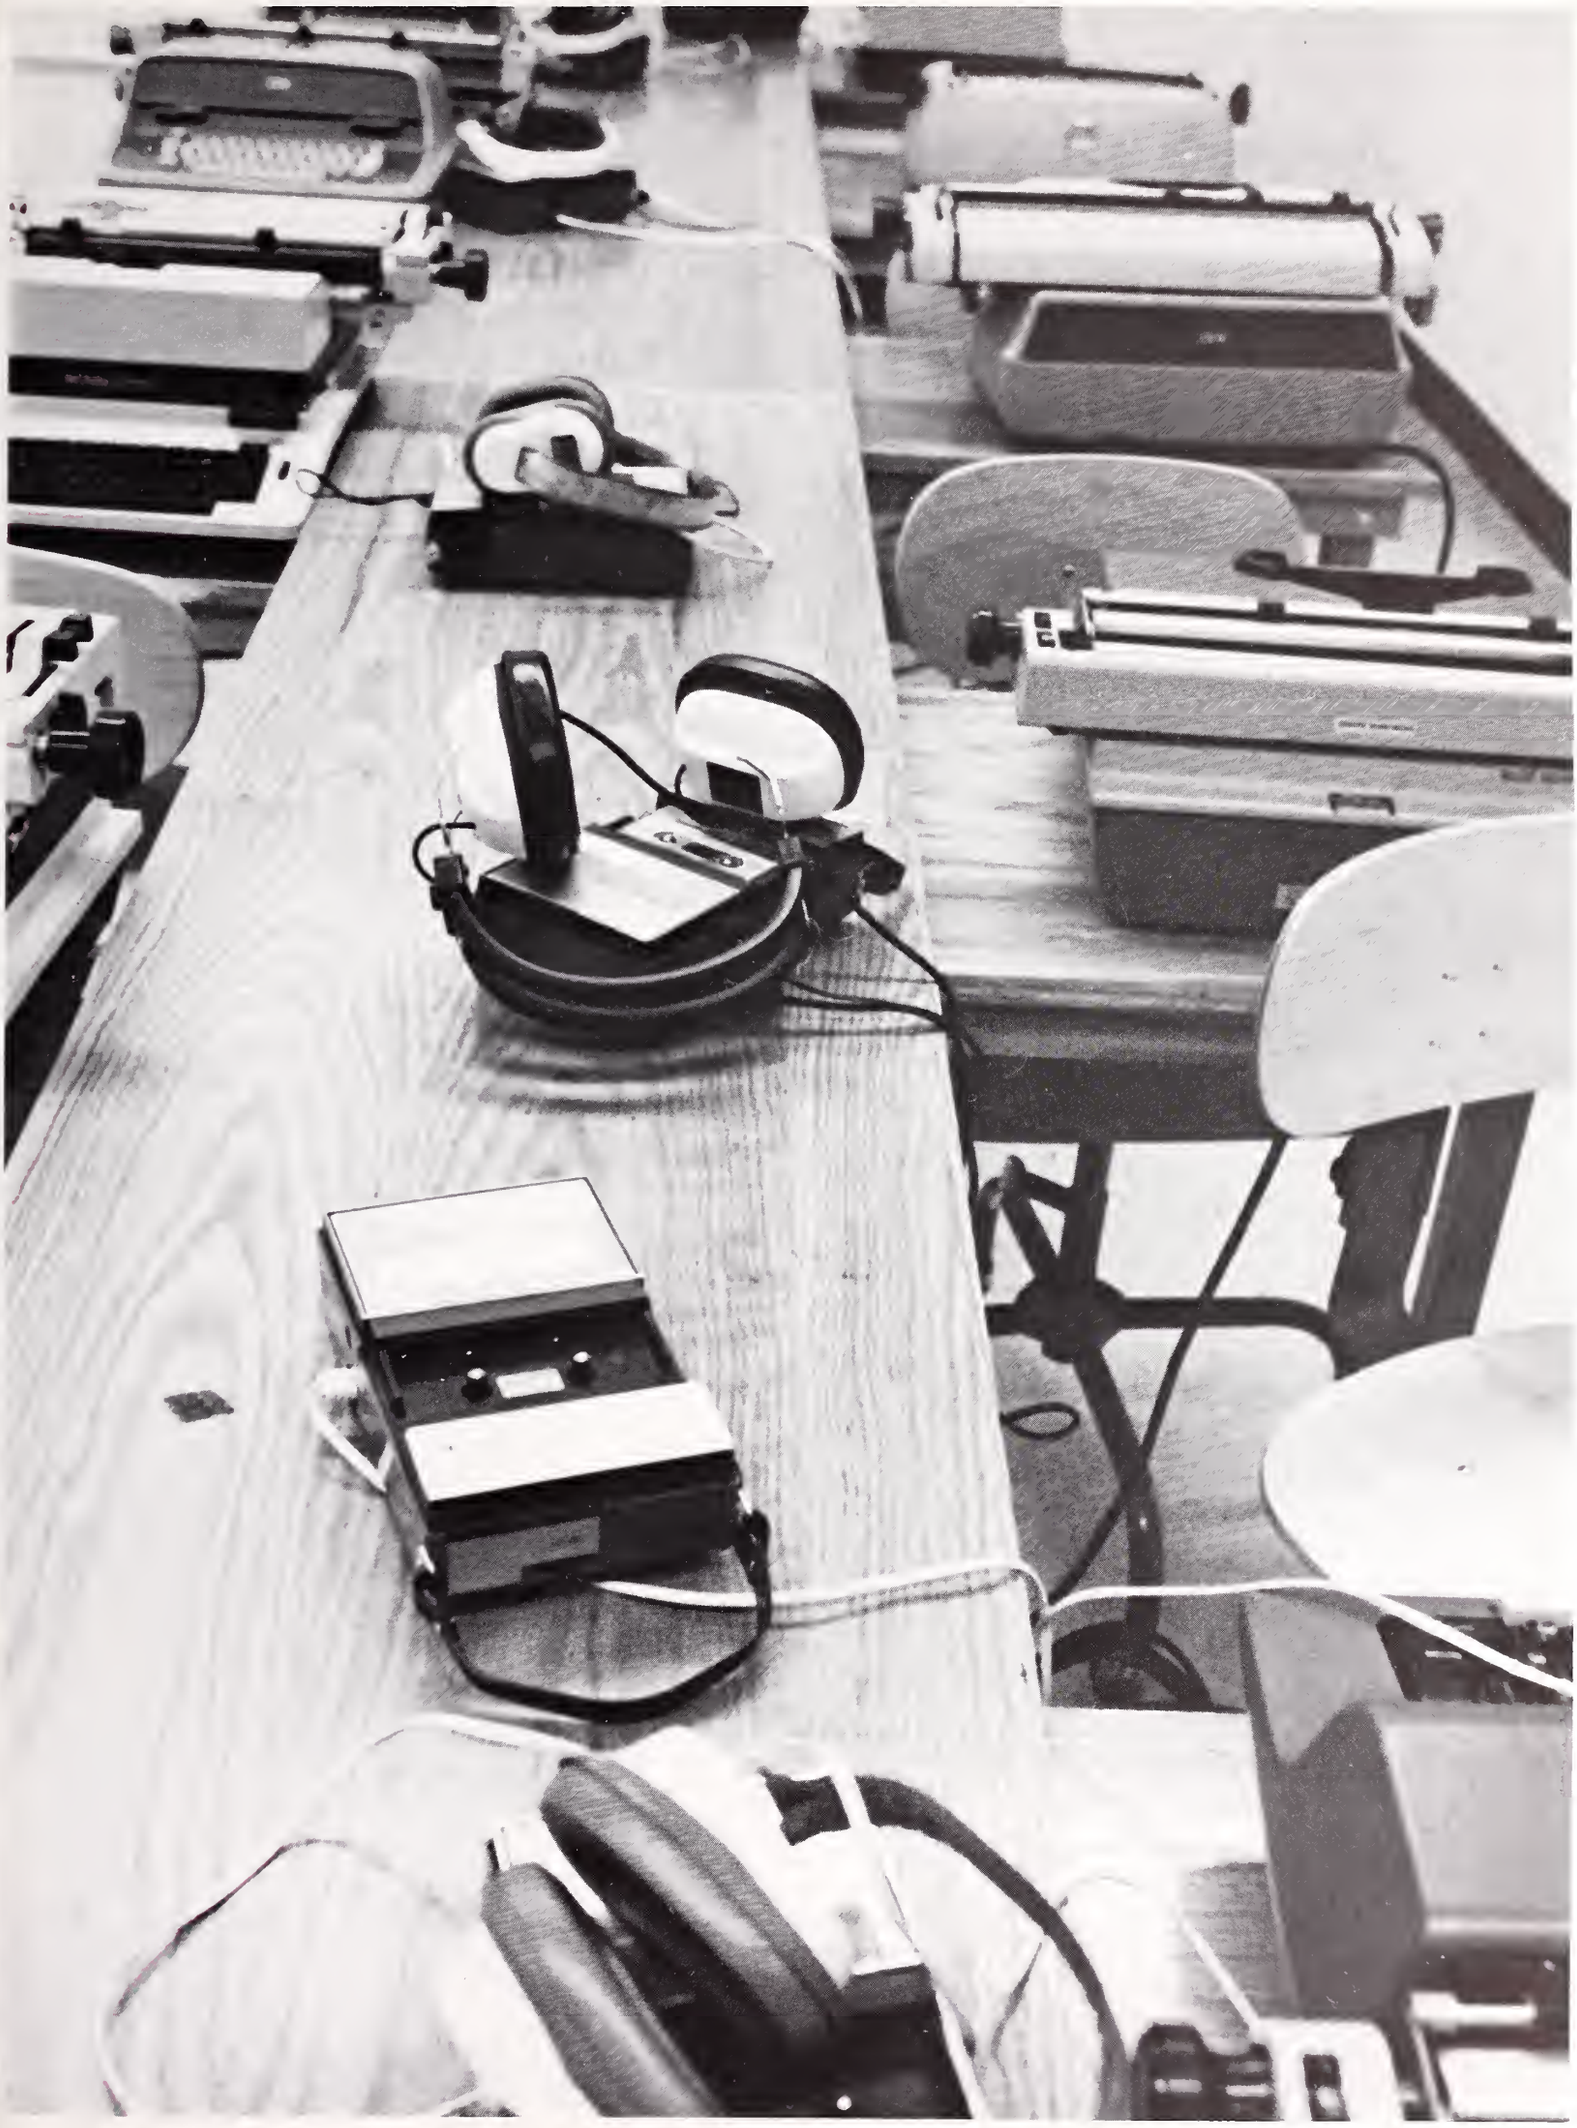
Janet Rice, Instructor

Myrna Bullard, Department Head

Pat Miller, Instructor

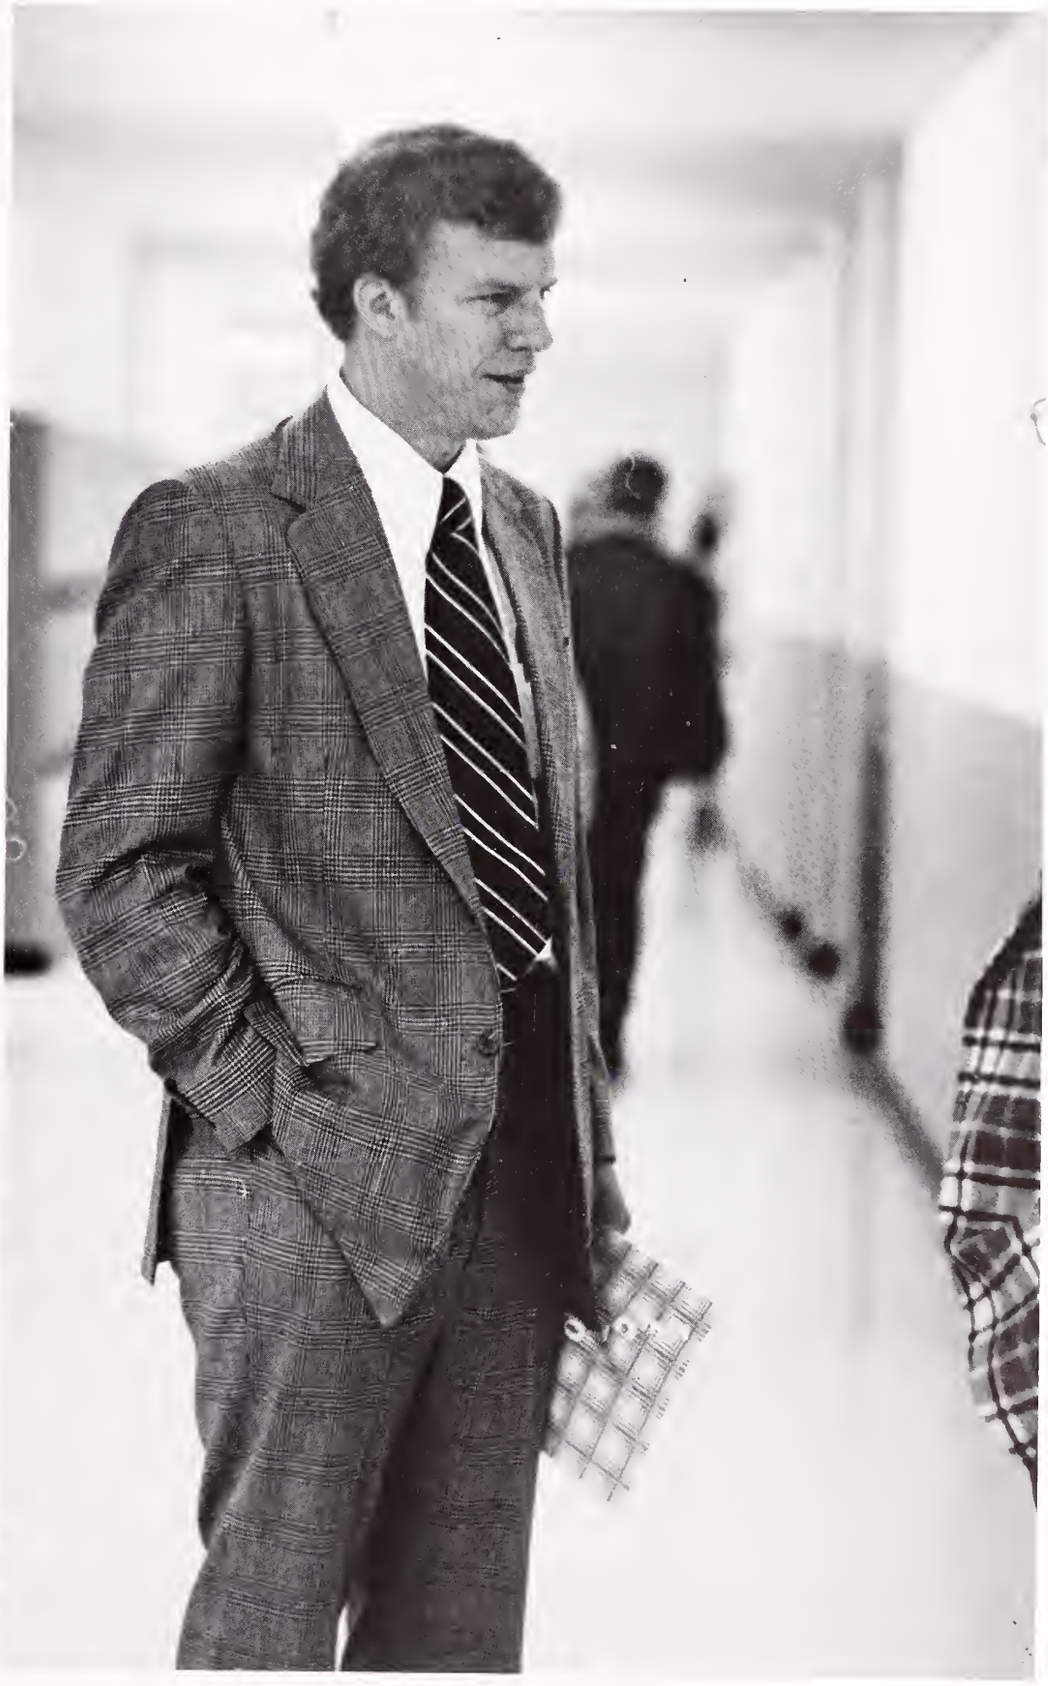
Anita Hefner, Instructor

Pat Nelson, Instructor



# Paralegal

**If a lawyer is an actor he needs help in preparing the script. If he's an informant he needs help in gathering the information. If he's a public servant he has to be told what the needs of public are. This is where the Paralegal Technologist comes in — he/she helps prepare the lawyer for his role.**



Nick Fisher, Department Head

# DATA PROCESSING

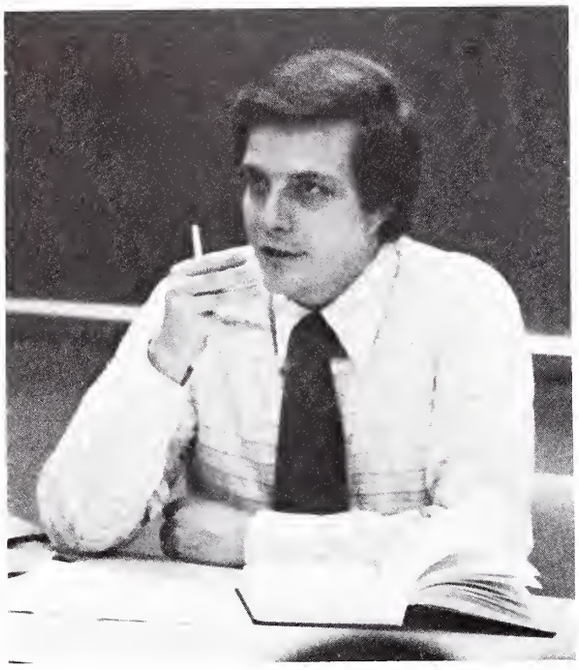
**The Associate in Applied Science degree in Data Processing Technology provides a curriculum of training that introduces the student to the general purpose electronic computer as a versatile and powerful instrument for problem solving and data processing.**

William S. Hubbard, Instructor

Jack Atkins, Department Head

# Criminal Justice

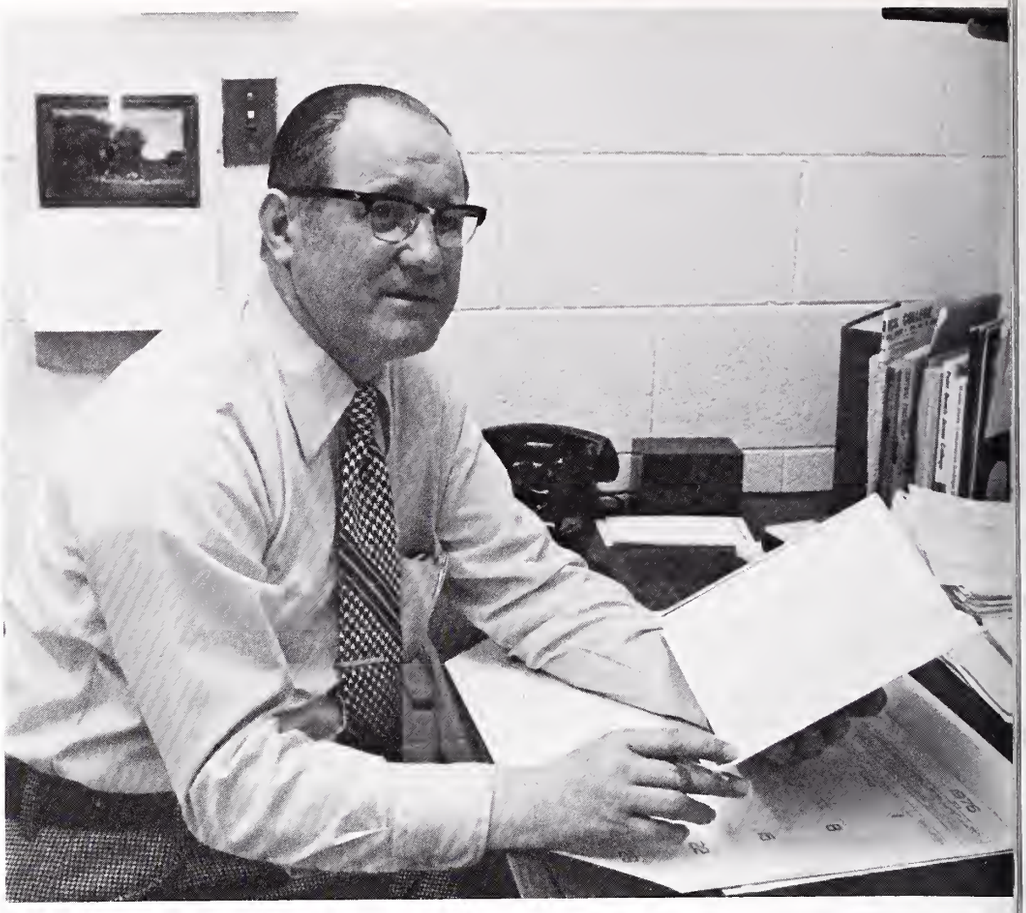
Being a "cop" is not all glamour and power. They have to learn all about law, criminalistics, psychology. Law Enforcement Officers do more than carry a gun and act tough — and GTEC's Criminal Justice Program helps prepare them for the "rest" of their job.

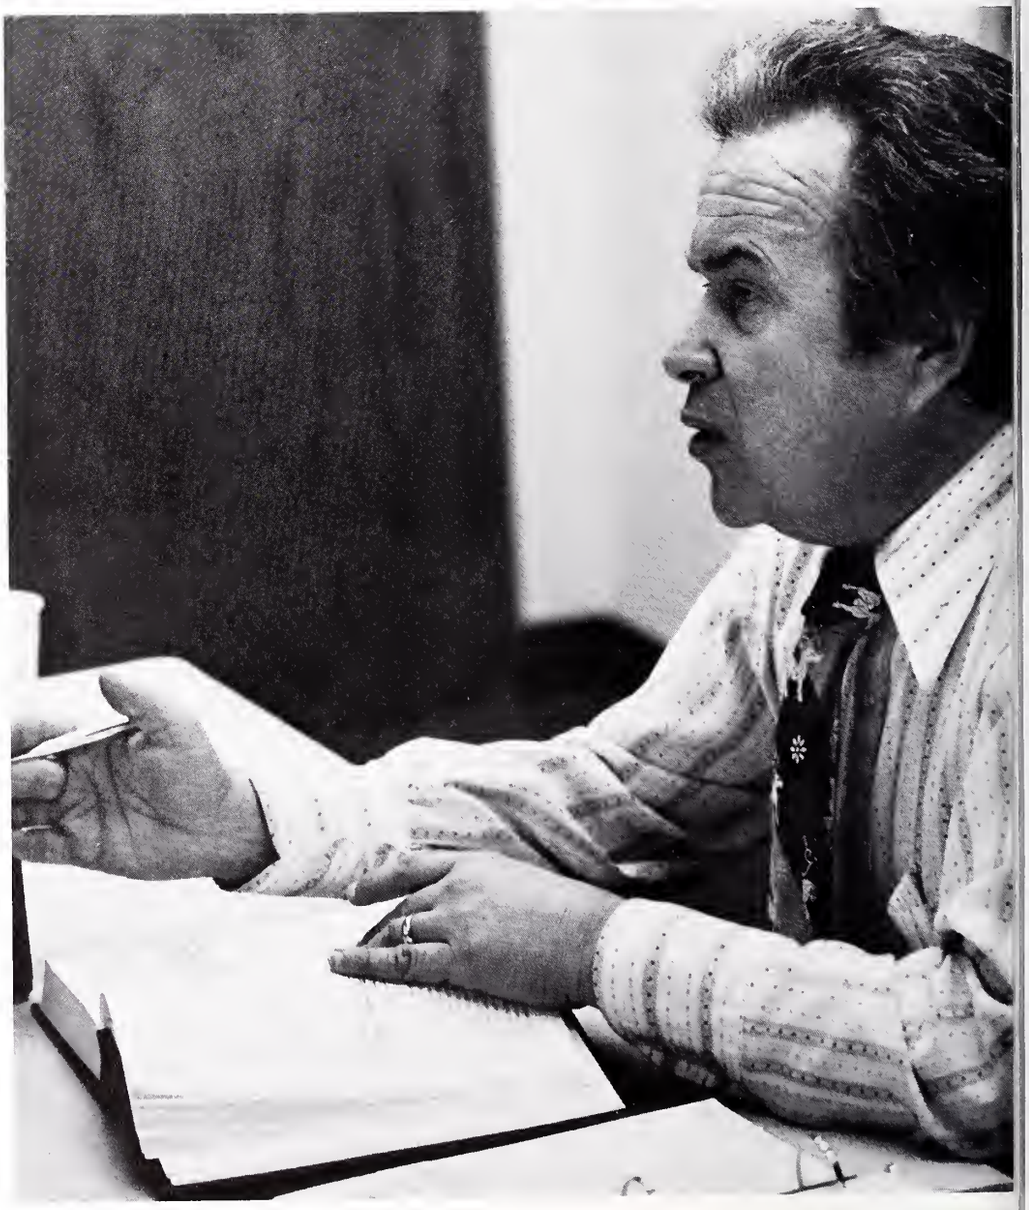


Dan Yarborough, Instructor

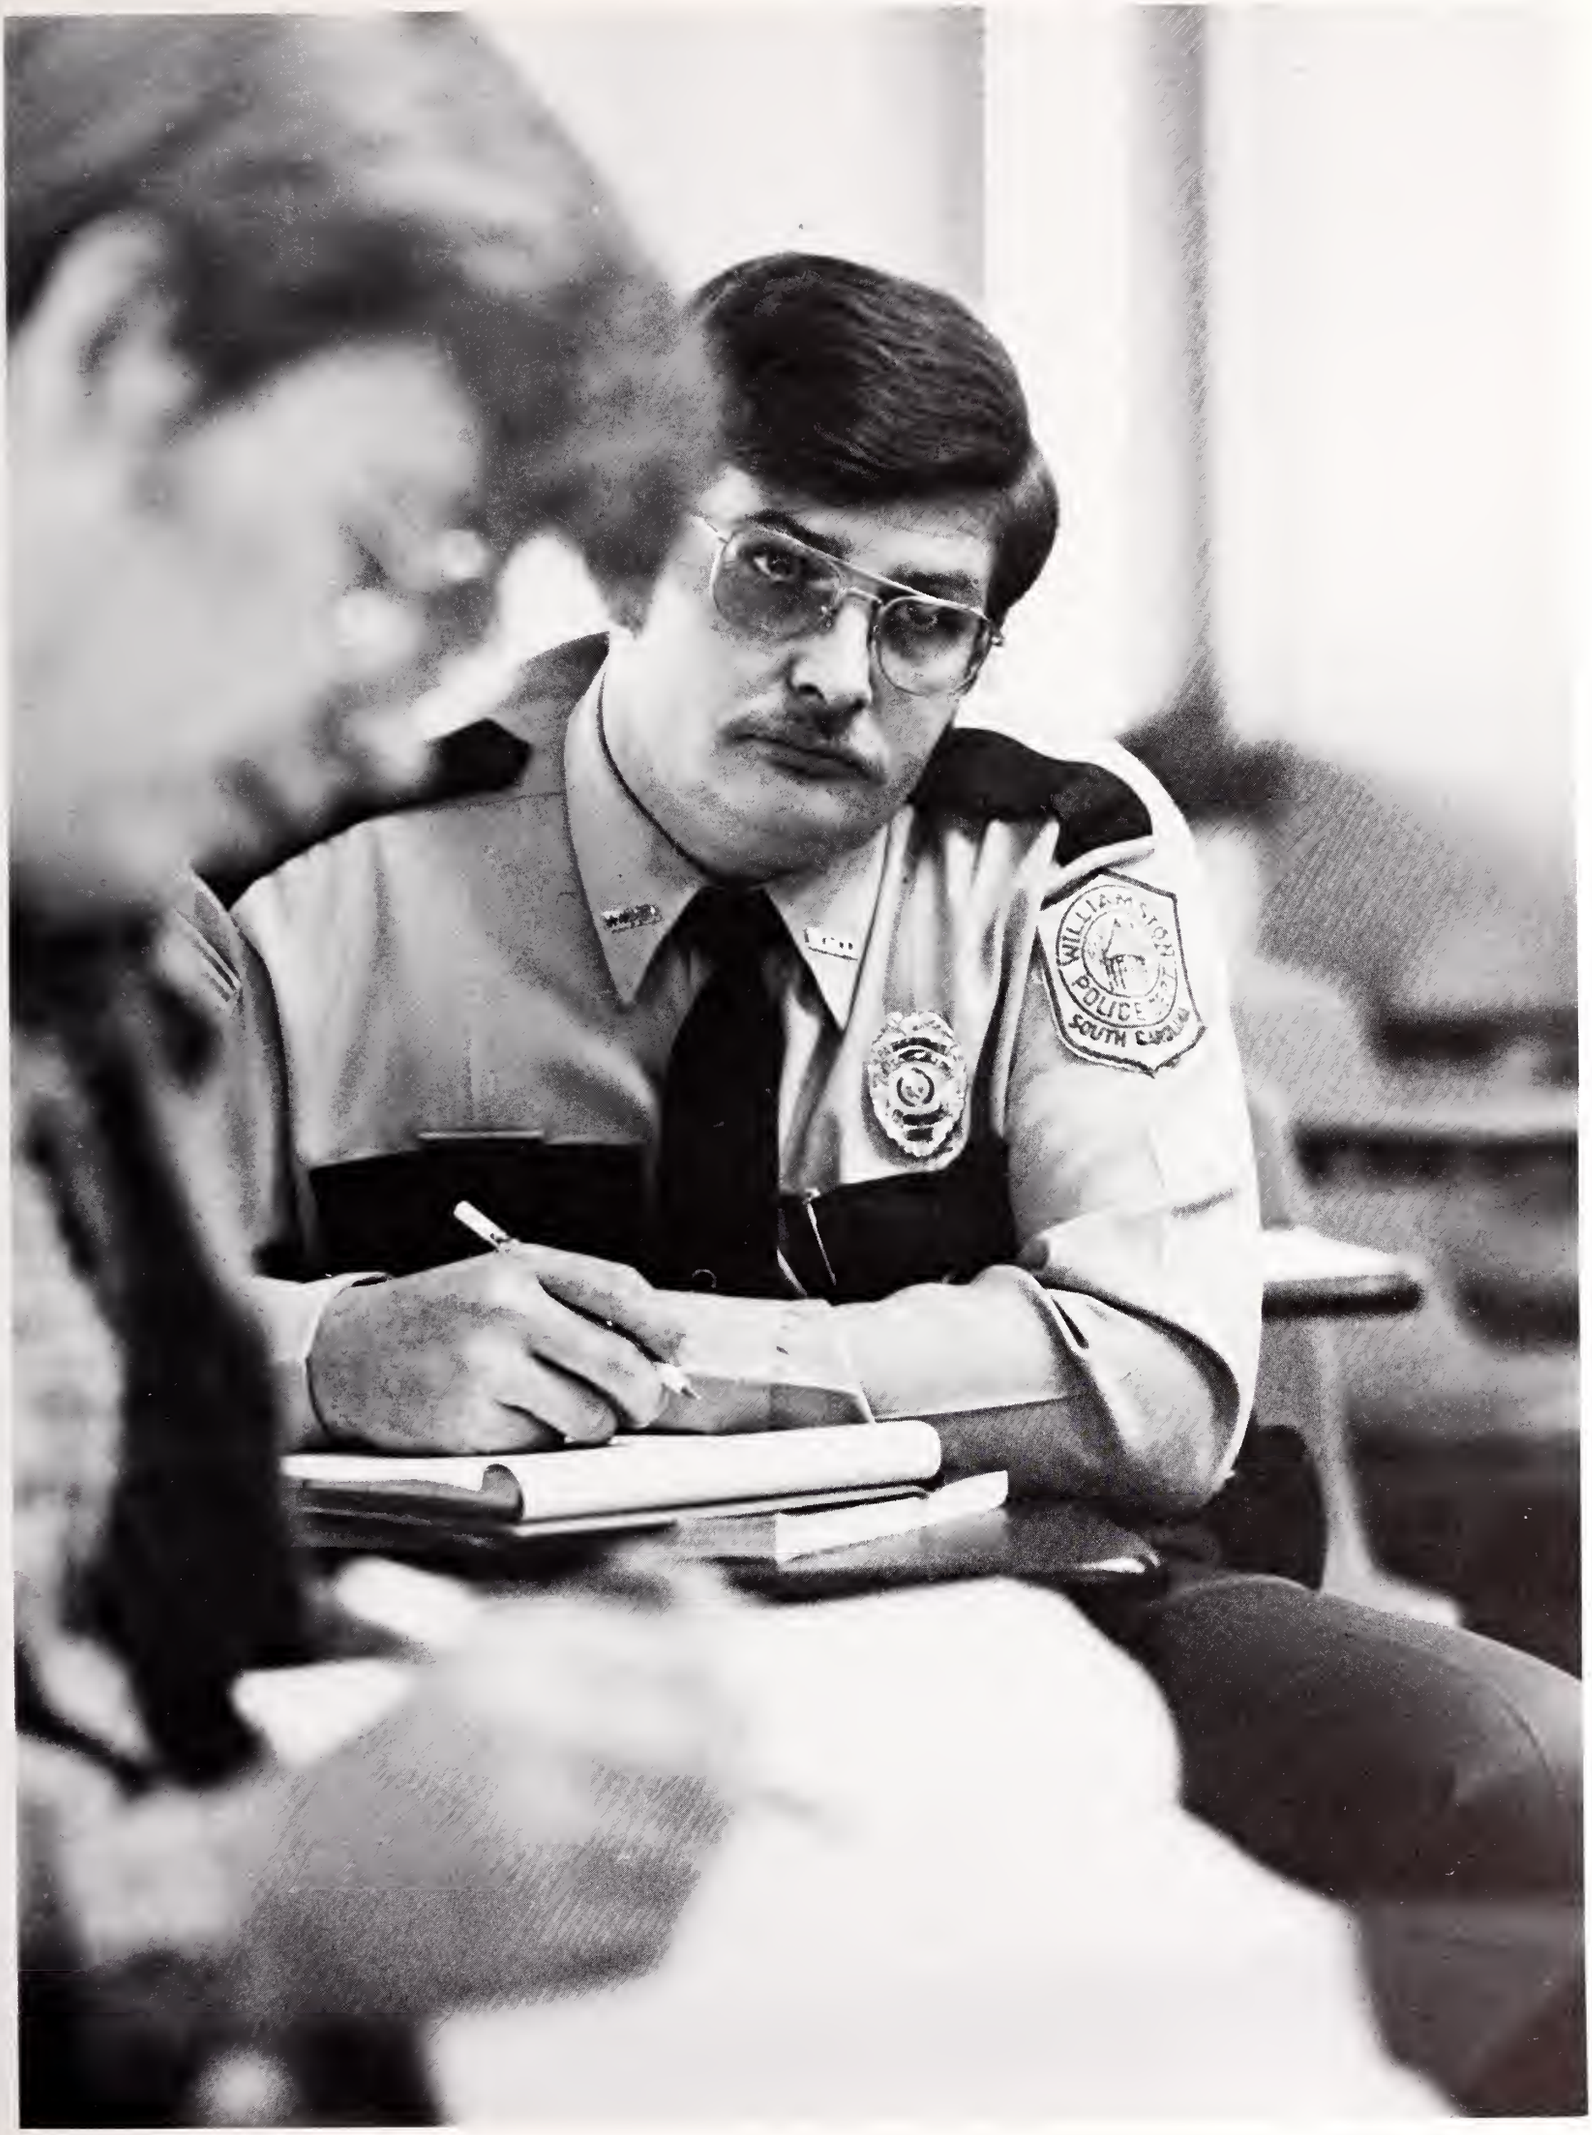
Car Thackston, Chairman of Business Division
Department Head — Criminal Justice

Nick Mitchell, Instructor





KASLEY
POLICE



WILLIAMSTON

Gordon Witters, Physics Instructor

# Allied Health Sciences

When you walk into the health building that smell hits you — that clean, sterile, comfortingly antiseptic smell. And then you see all the colors — there's plenty of white and there's beige and mint green and baby blue and operating room green. The nice thing about it is that these colors are decorating the students.

The next thing you notice is the professionalism and the dedication of the students. These people are not just in school they're training for a career of helping people.

191 Dental Assistant
195 Dental Hygiene
199 Dental Lab
203 Human Services
207 Medical Lab
211 Optometric
215 Physical Therapy
219 Radiology

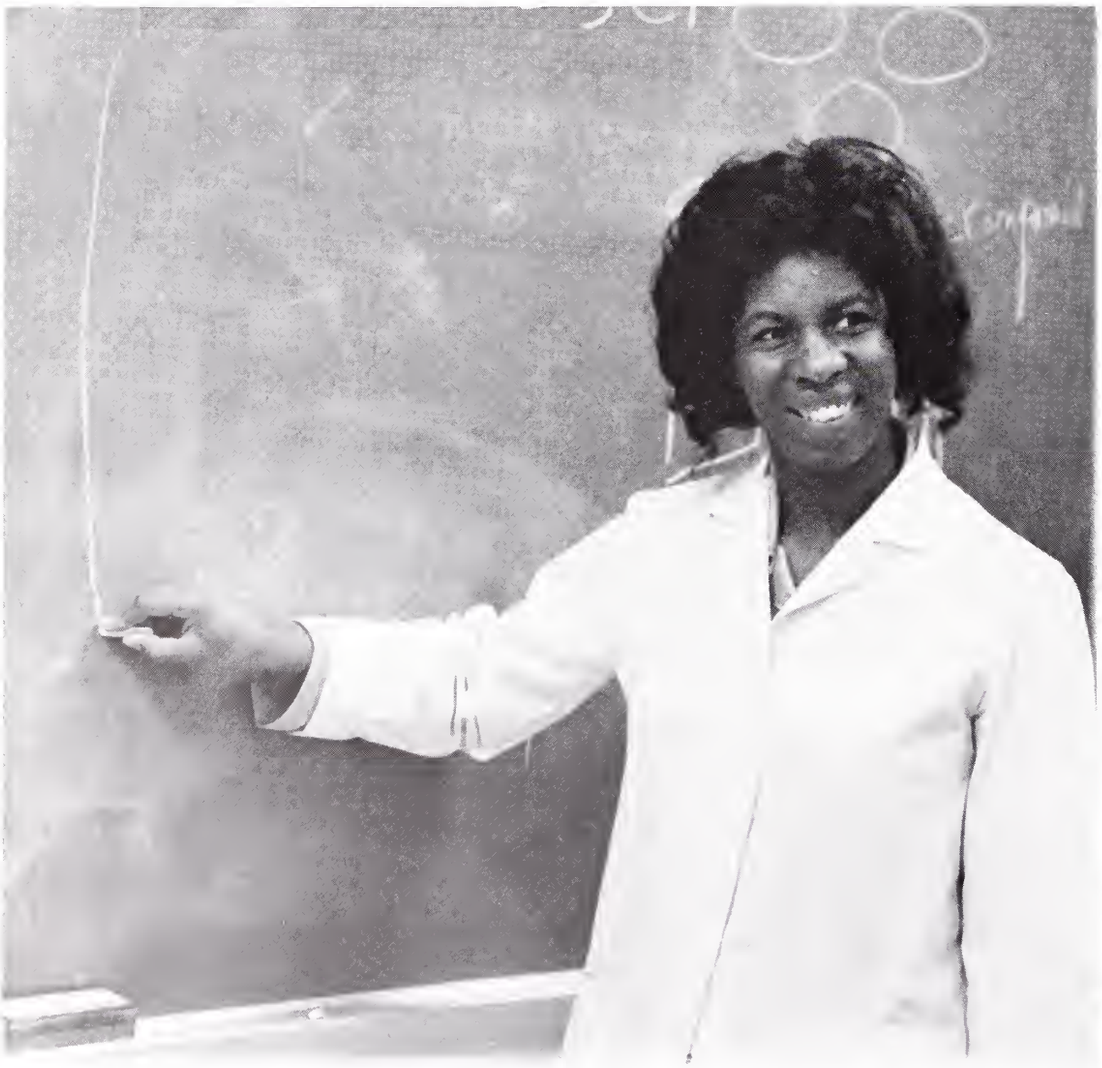
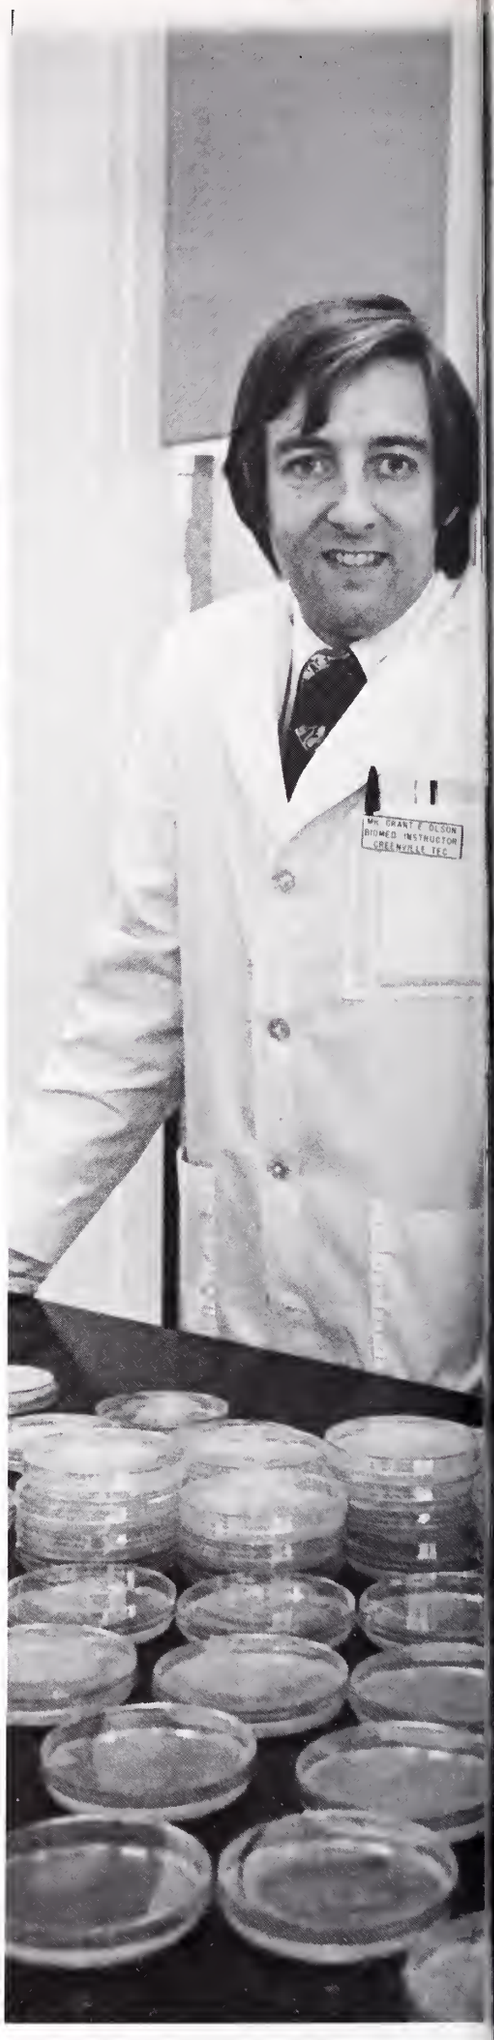
235 ADN

# Biomedical





Karen La Fleur, Biomedical Instructor

Claudette Cureton, Biomedical Instructor

Grant Olson, Biomedical Instructor

Joseph D. Owen, Biomedical Instructor

Jeff Williams, Department Head — Biomedical

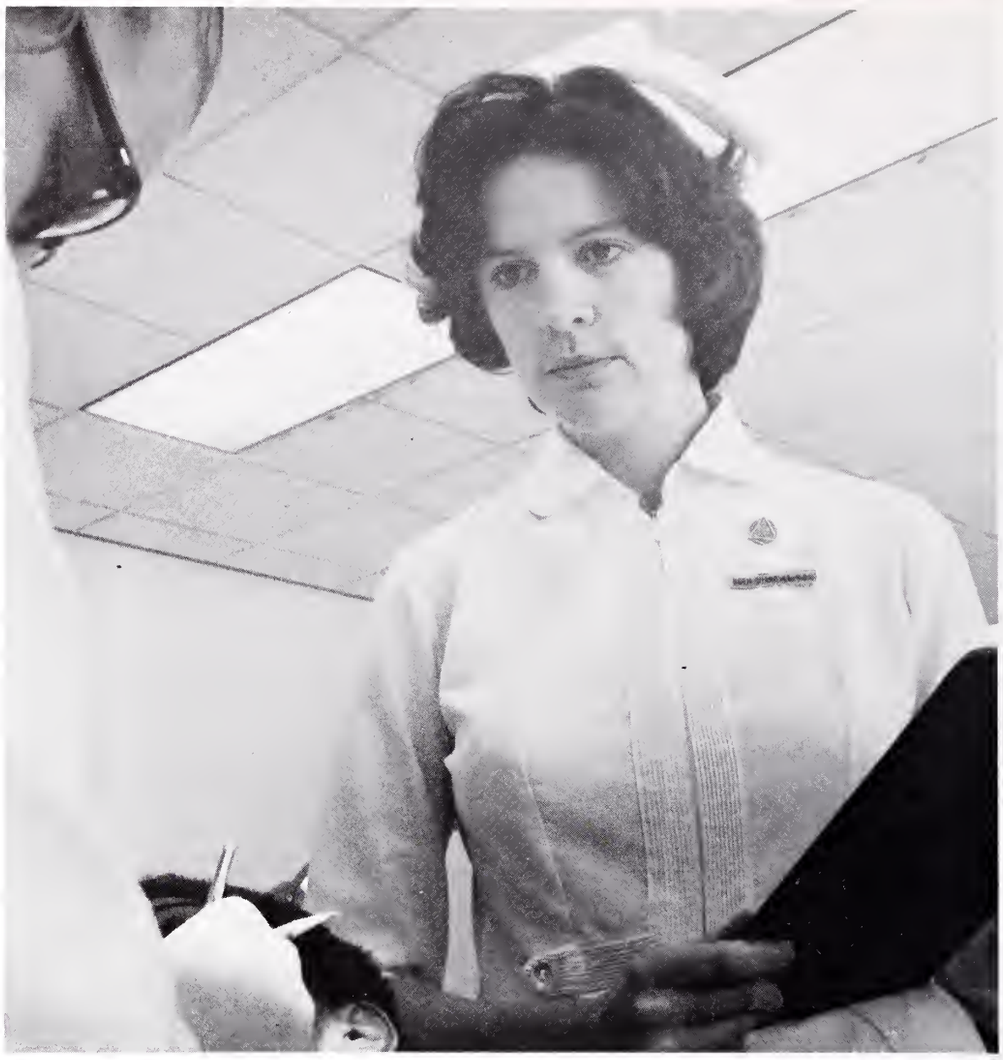
# Dental Hygiene Technology

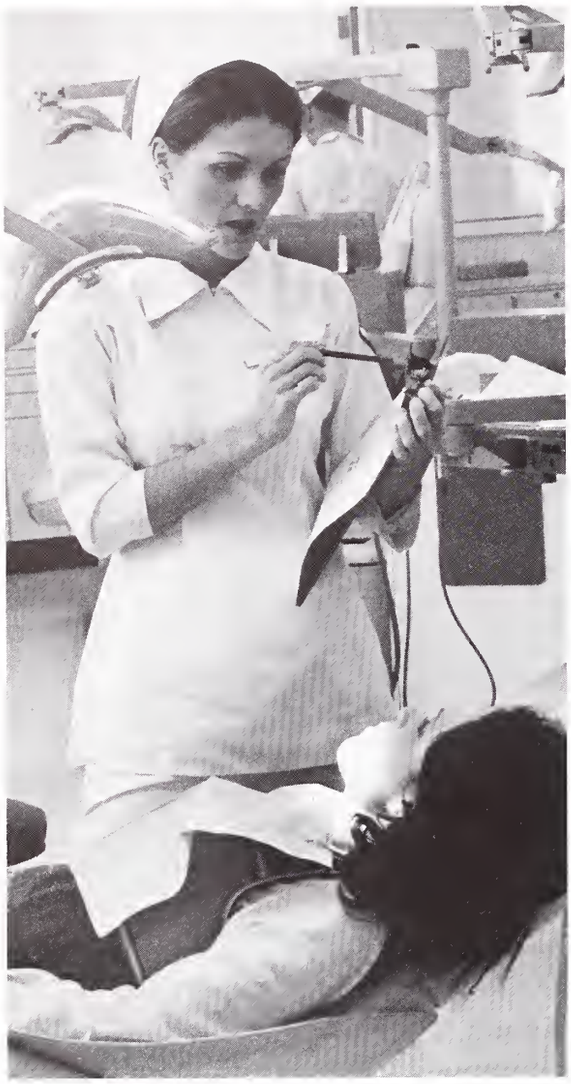
Sanitation, cleanliness and flouridation are the most important facets of the Dental Hygiene Program. Decay and placque are the enemies of these students. These girls have cleaned the teeth of fellow students, faculty and kids from the local schools.

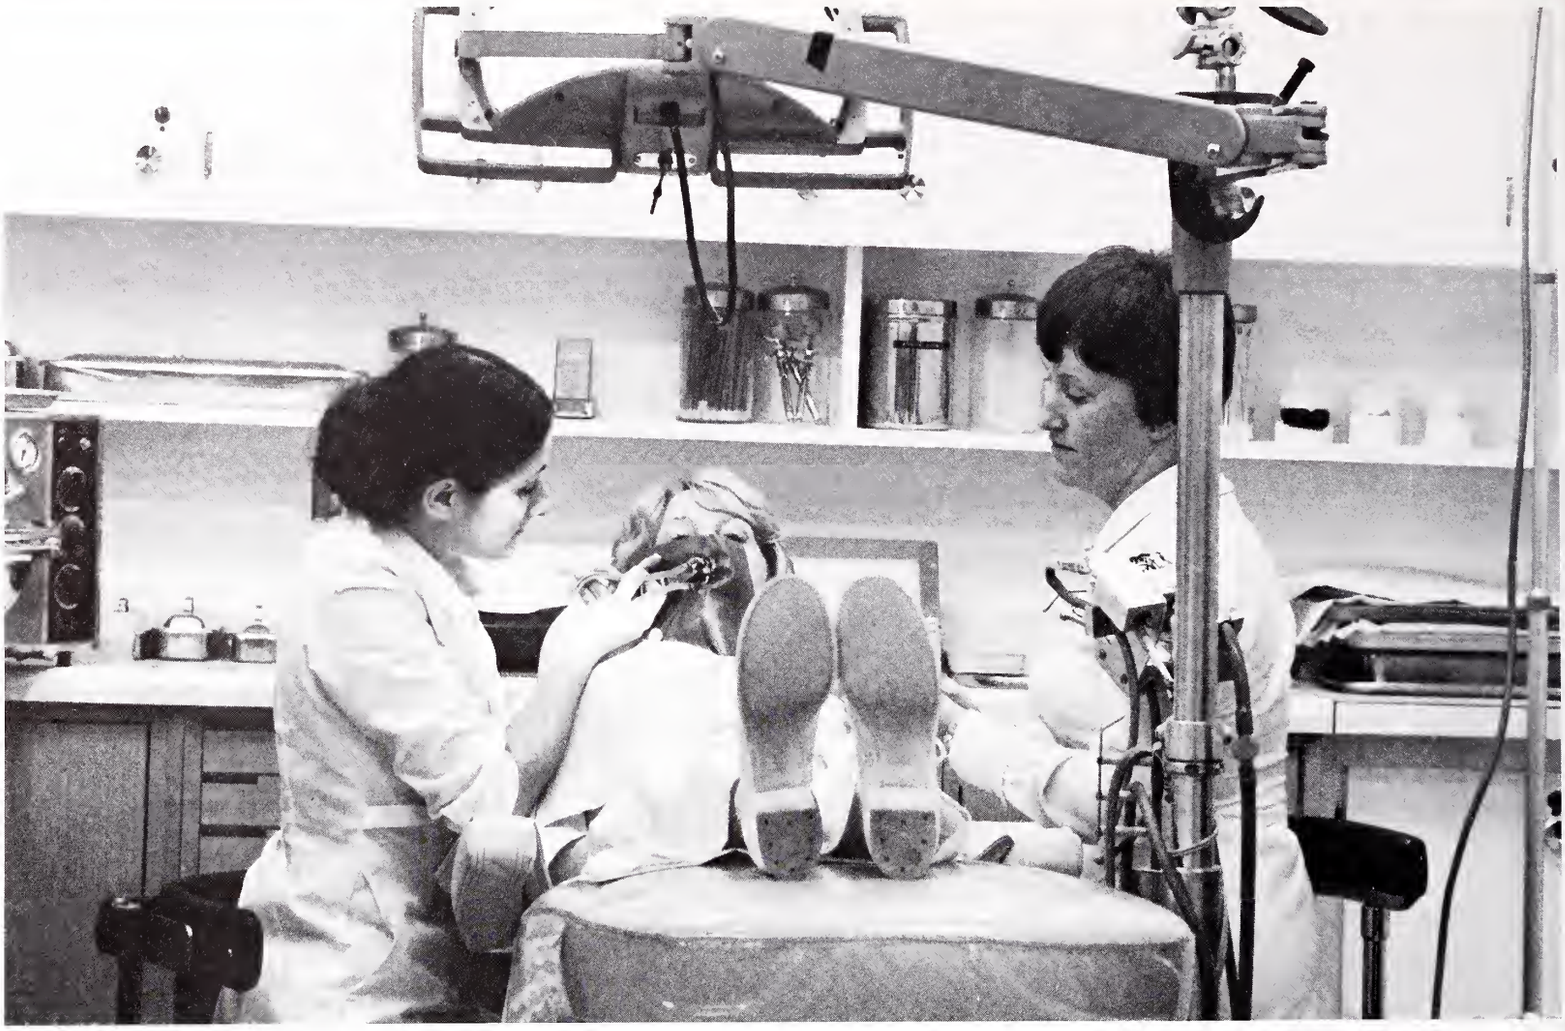
Pat Springfield, Program Head

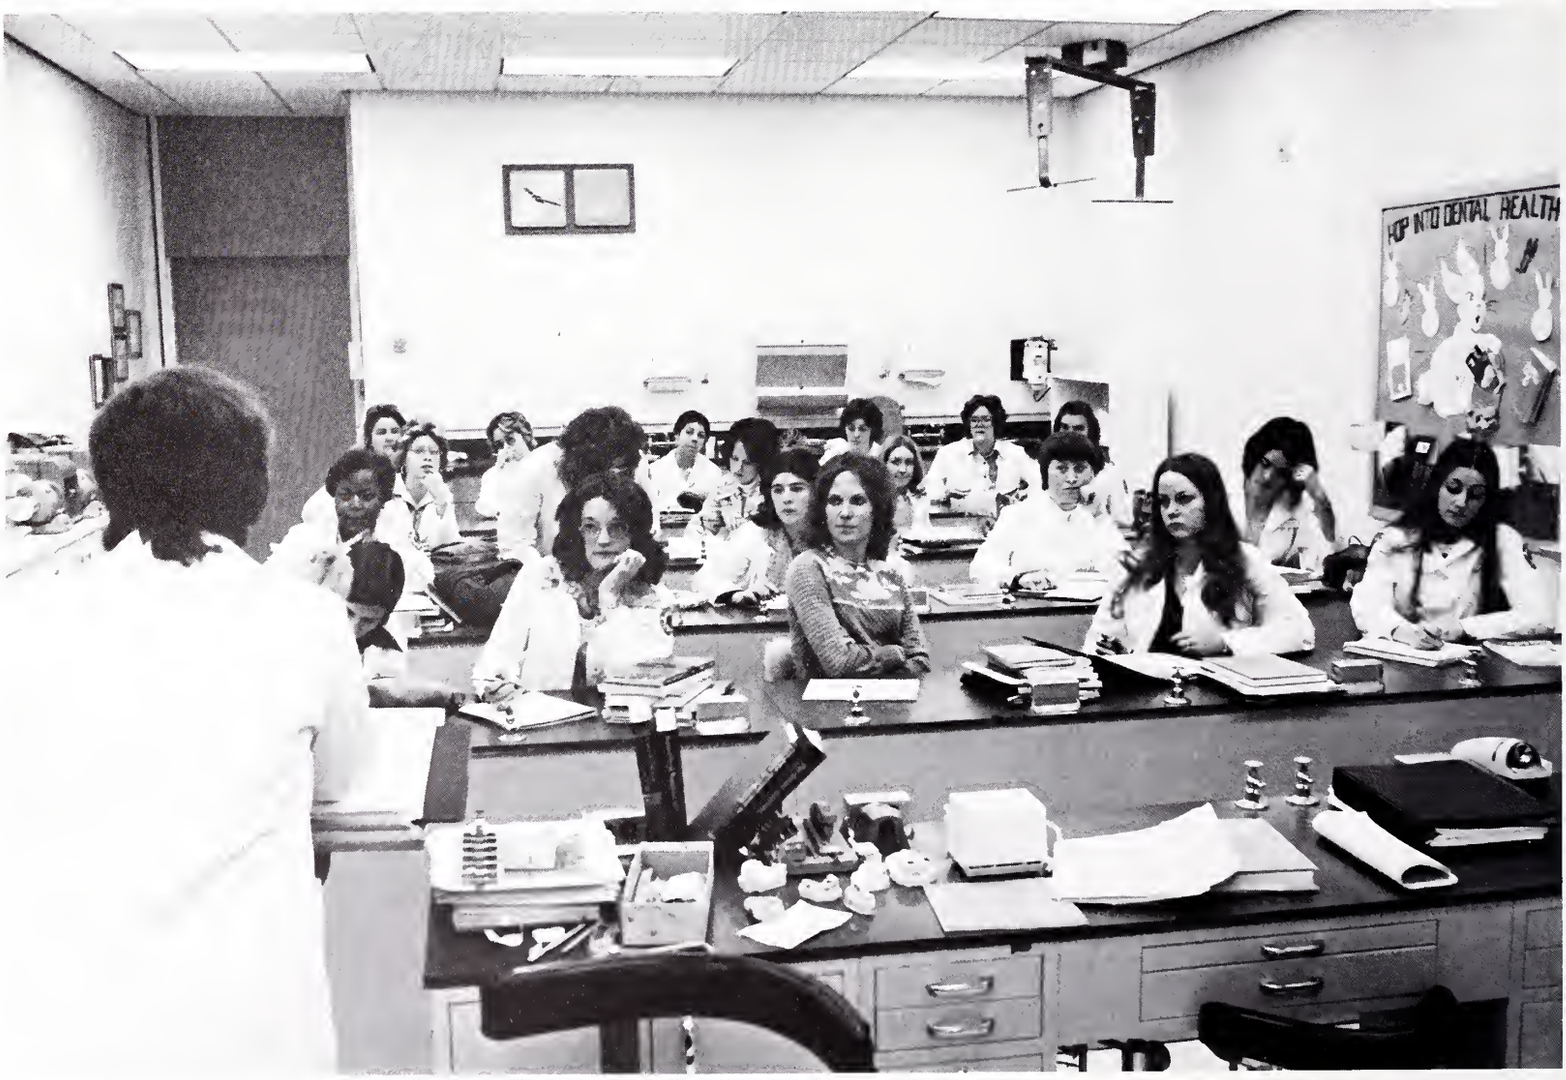
Beth Chamblee, Instructor

Anita Sanders, Instructor









HOP INTO DENTAL HEALTH

# Dental Assistant

The girls in the Dental Assistant Program start out working on maniquins and graduate to real people. They learn all about drills, pliers and other dental apparatus. They become the dentist's other pair of hands.

Kaye Mace, Department Head

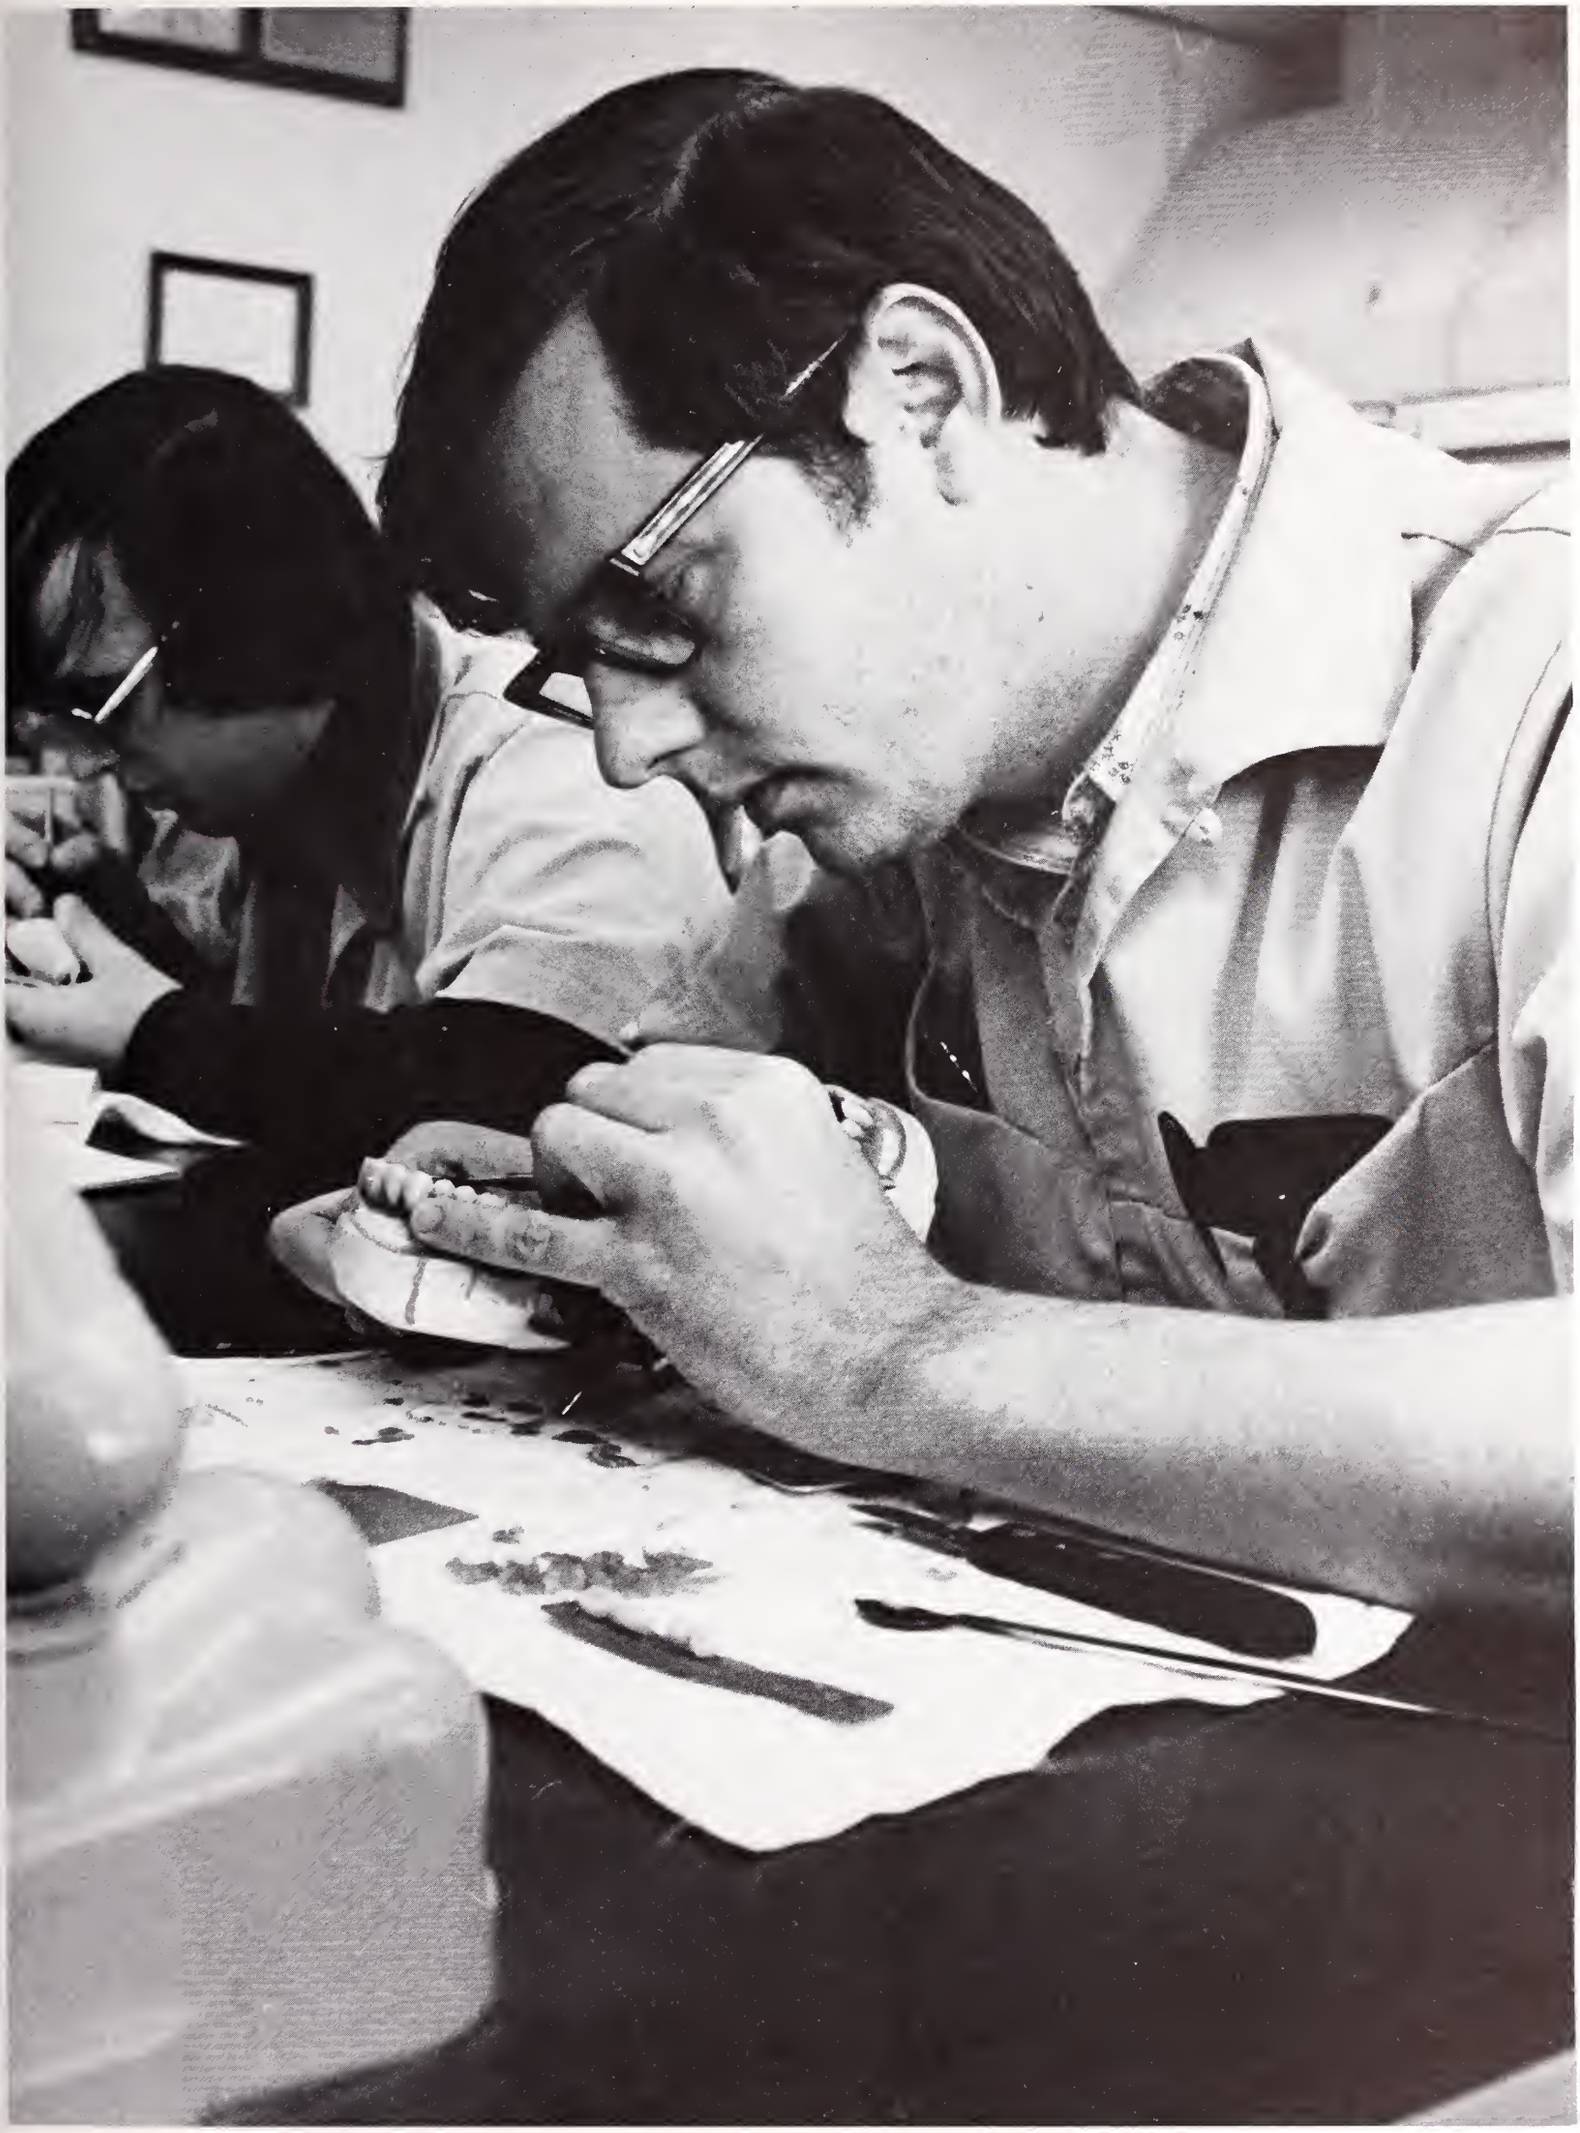
# Dental Laboratory Technology

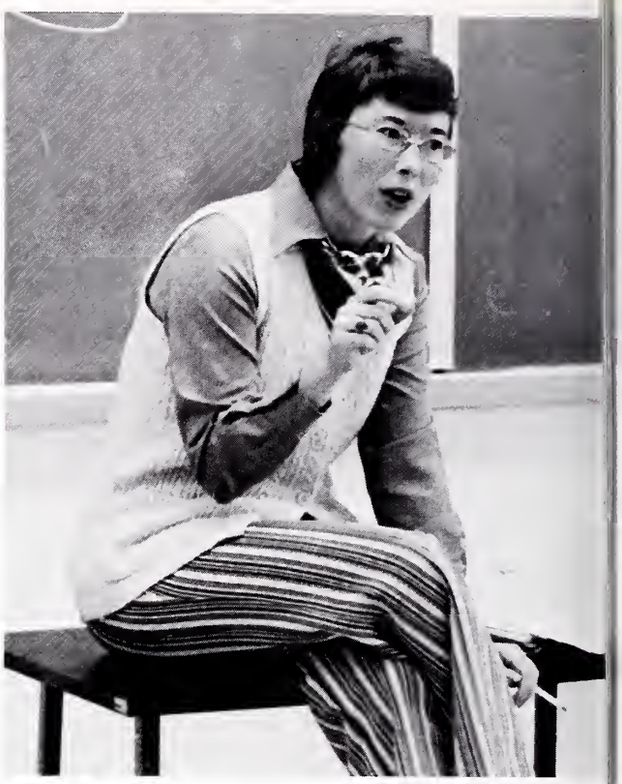
The Dental Lab students days are filled with things like porcelain, denture prescriptions, and bunsen burners. False teeth, crowns, inlays and partial plates are created by these technologists. The two year program includes even a few courses in English and math.

Larry Power, Instructor

Edna Rakestraw, Instructor

John Browning, Department Head





# Human Services Technology

Teacher's aid clinicians, counselor's aid and assistant therapists are some of the occupations Human Services Technology graduates can assume. They've studied group psychology, psychology of institutions, pharmacology and transactional analysis.

Eben Medlicott, Instructor

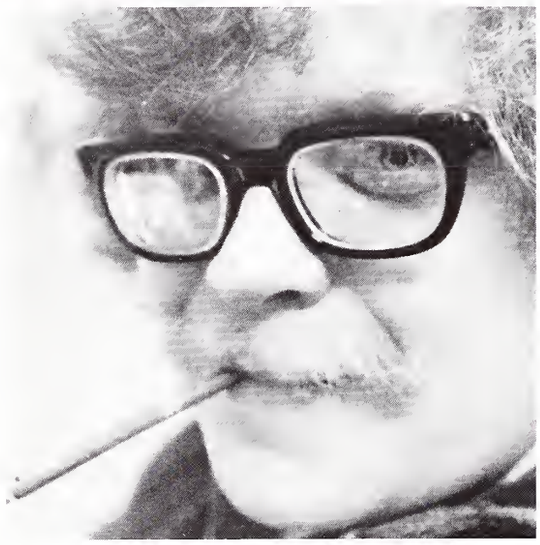
David Bole, Instructor

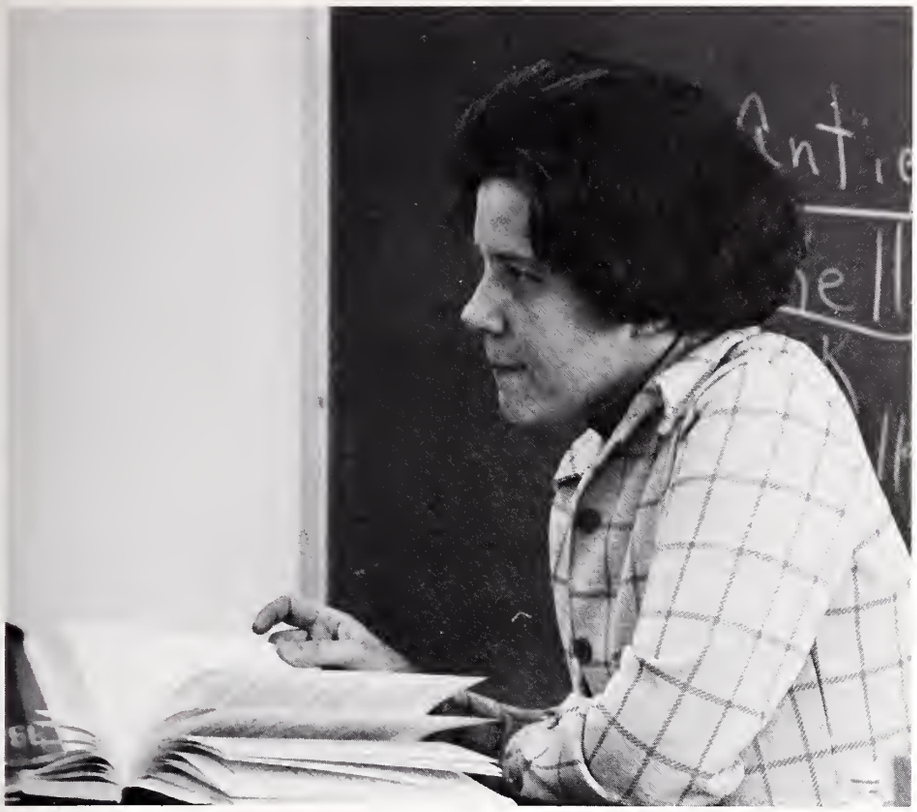
Suzanne Robinson, Instructor

Ashley Sherman, Instructor

John Brown, Instructor

Larry Jaearella, Instructor





# Medical Laboratory Technology

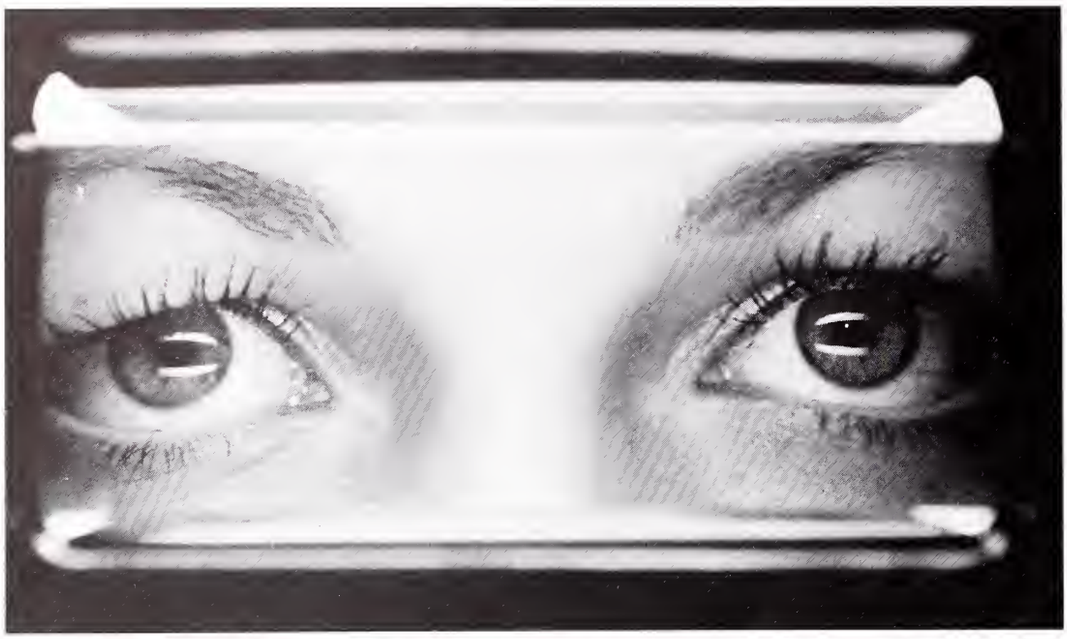
**A graduate from the Medical Lab Program will most probably find employment in a hospital lab or a clinic lab. For their tests the students must have blood samples so they practice on each other.**

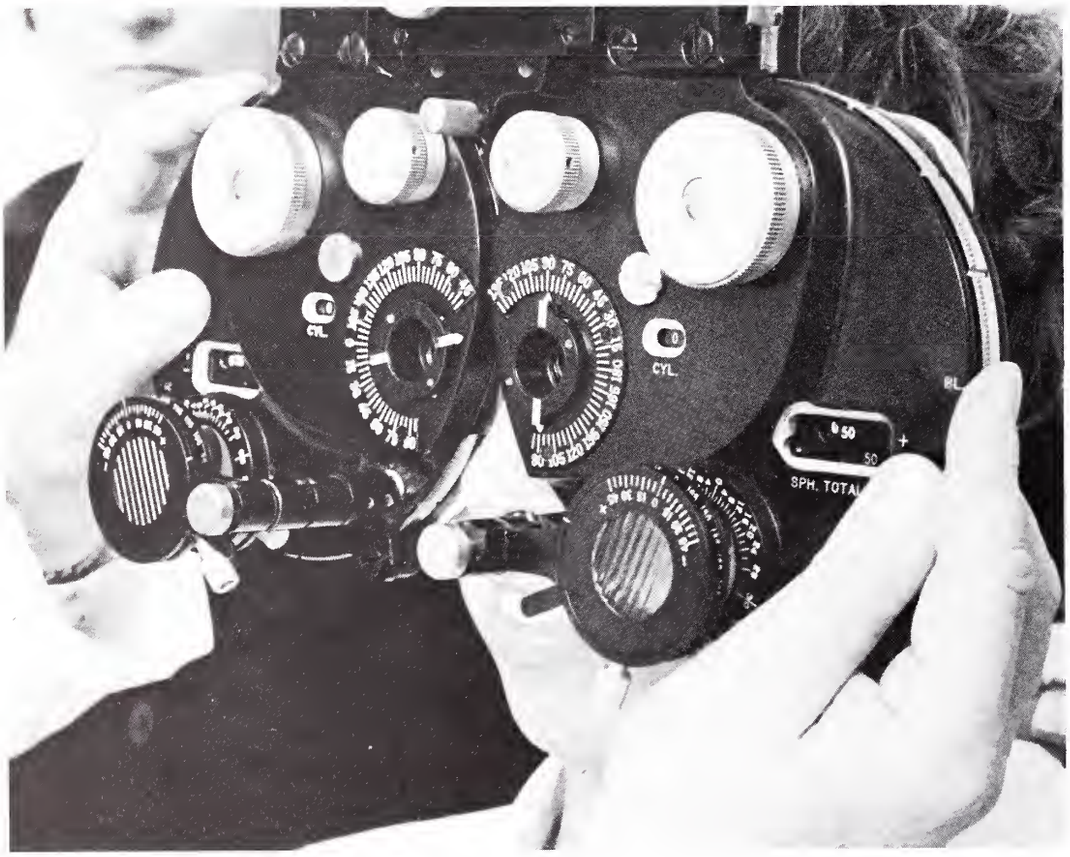
Bonnie Gossett, Instructor

Hugh Batson, Department Head

Kimwipes
Kimwipes

Readings





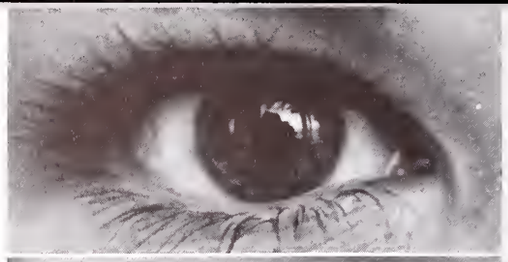
CYL.
CYL.
SPH. TOTAL

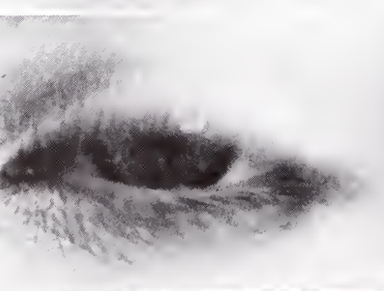
# OPTOMETRIC TECHNOLOGY

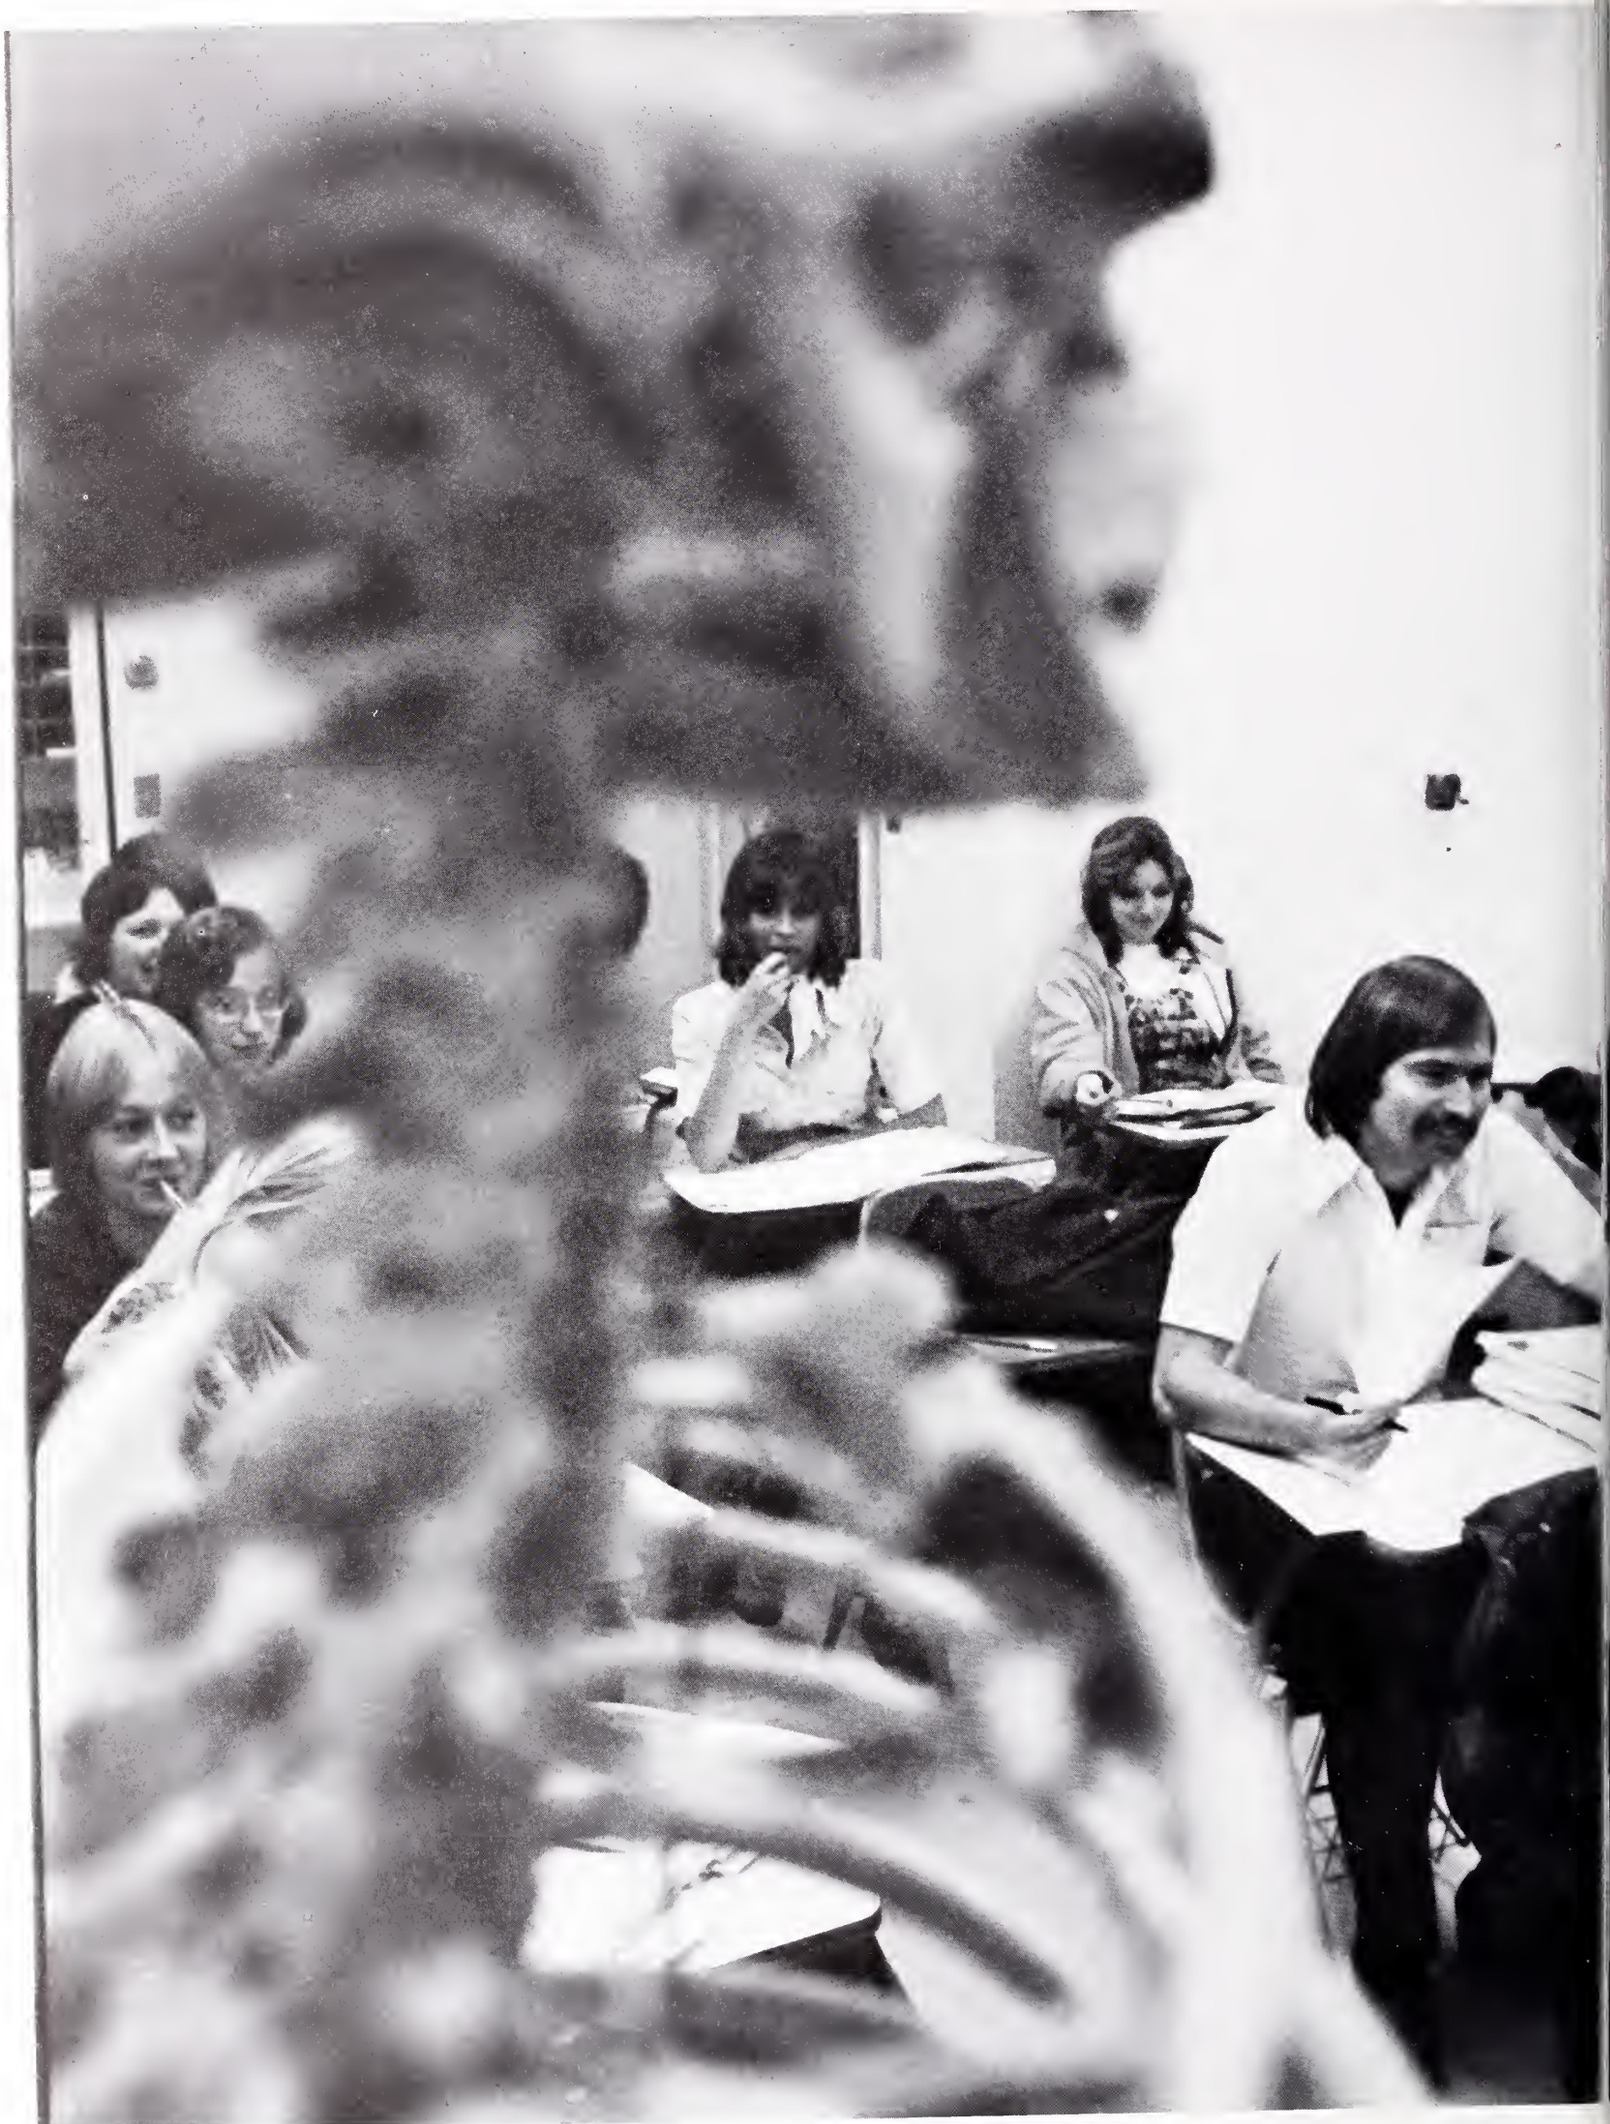
Optometric personnel learn varying helpful techniques under the direction of Dr. Tom Wilson. Optometric Technicians are skilled assistants to optometrists.

Department Head, Dr. Wilson

Bette Seubert
Laboratory Instructor





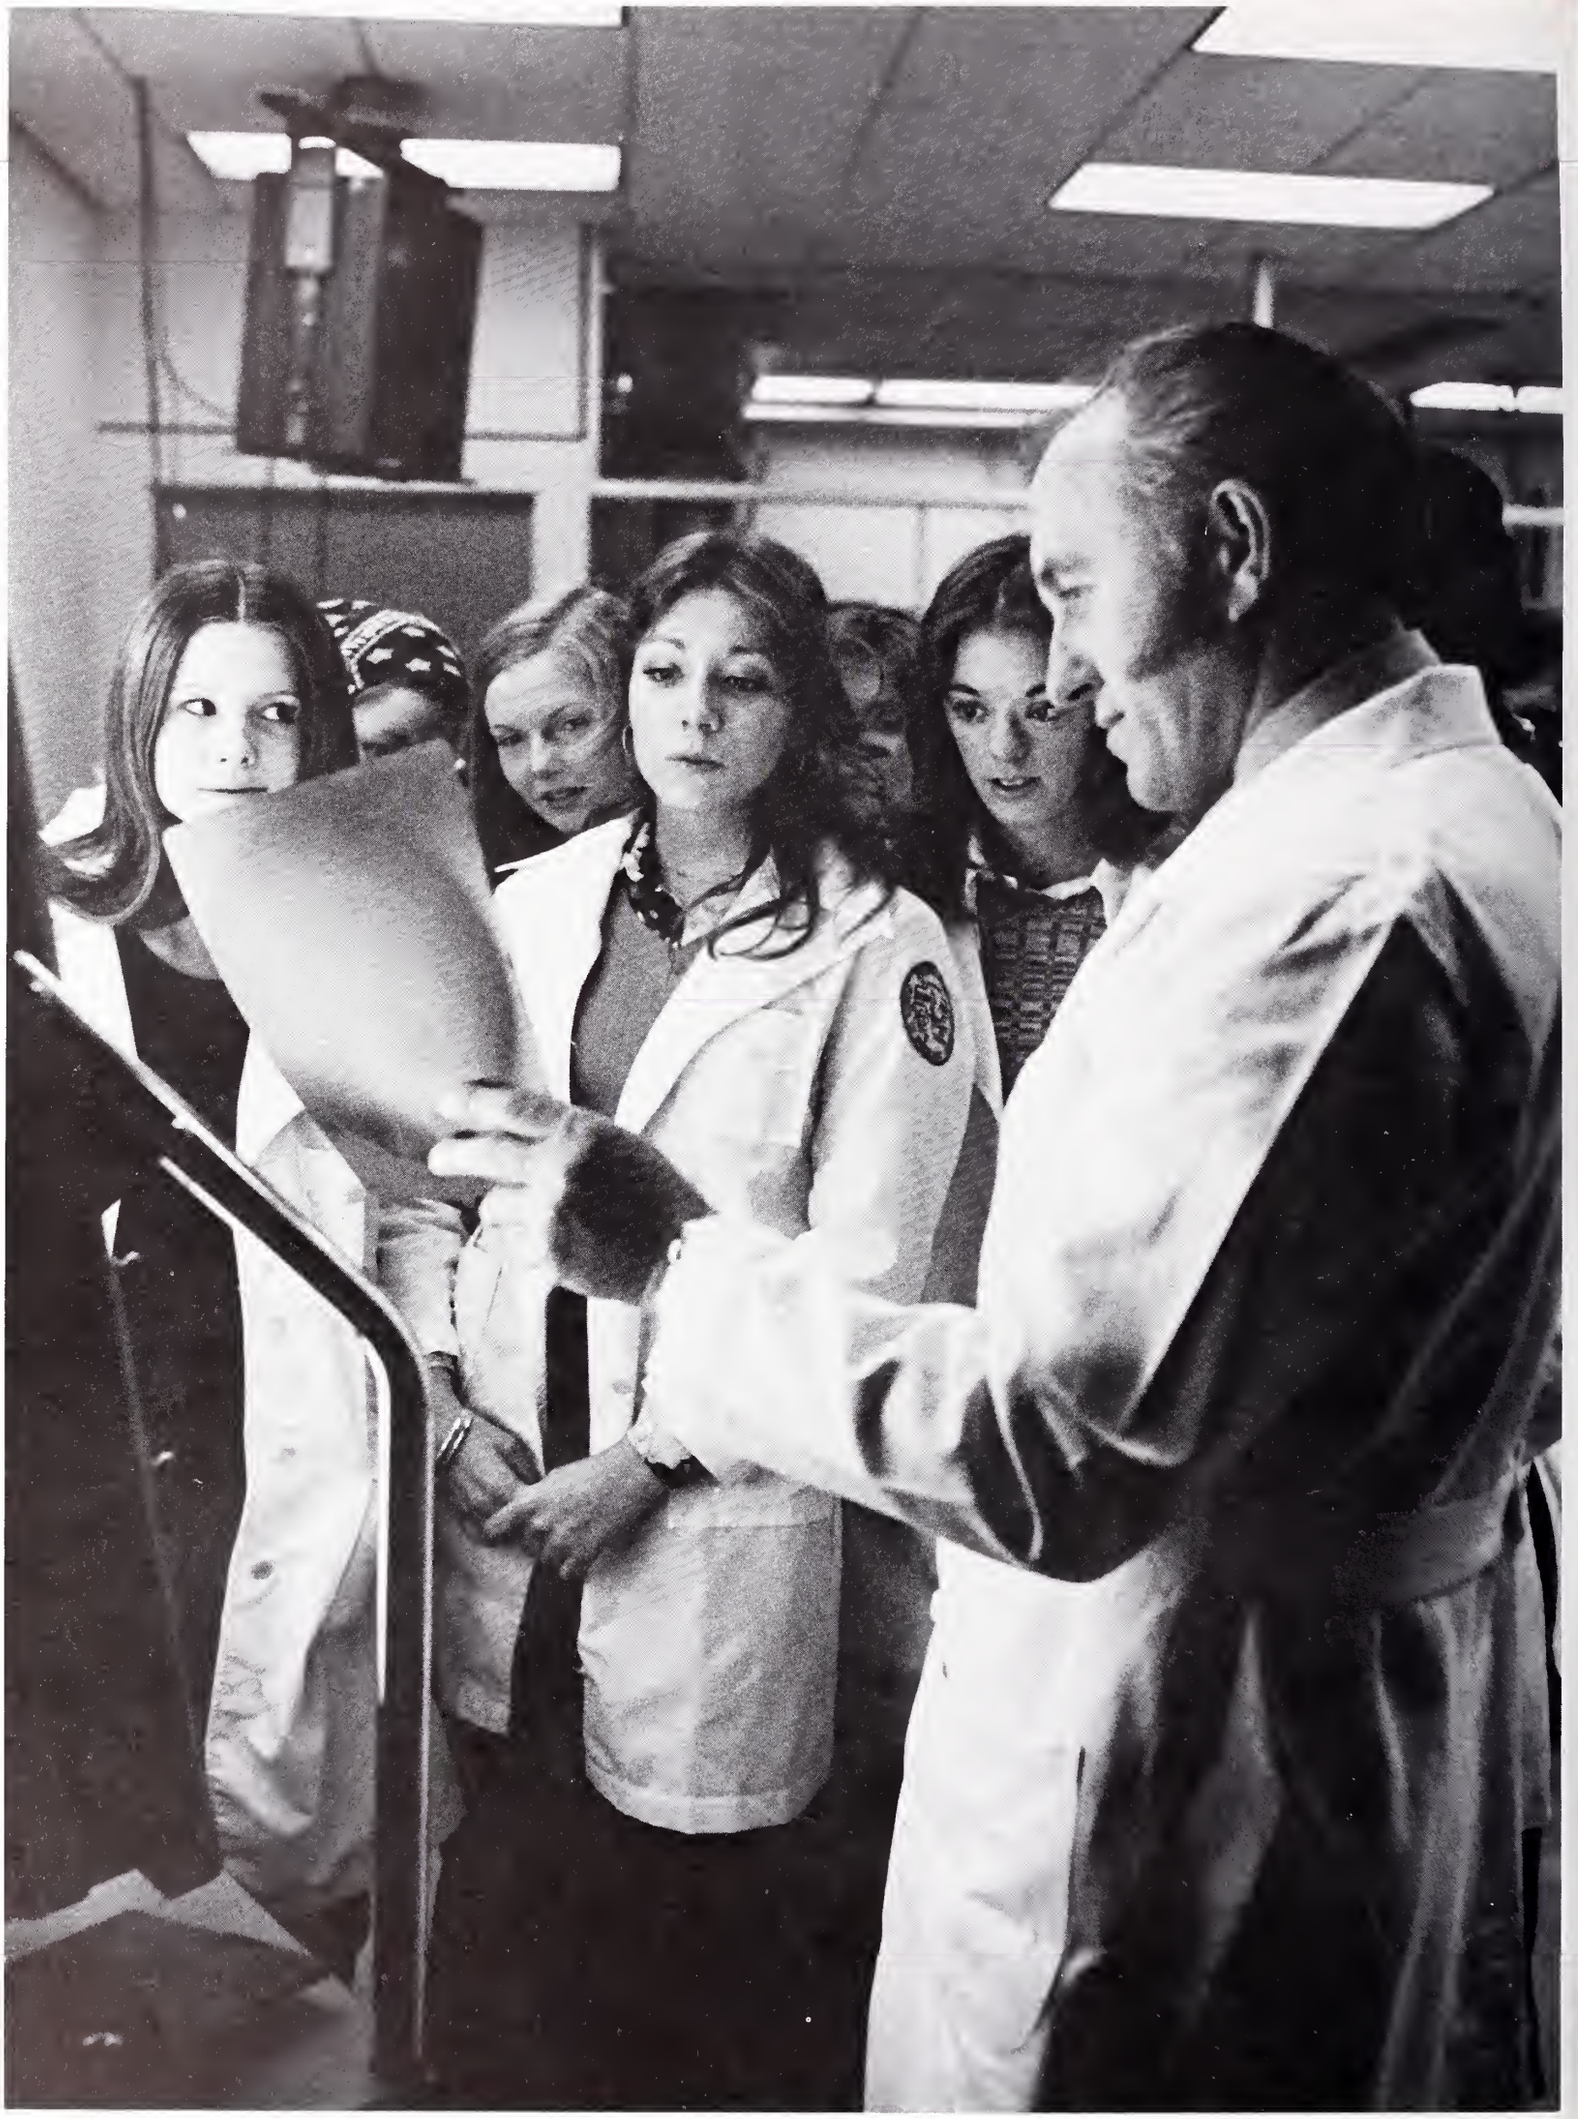


# Physical Therapy

For two years these students work with exercise equipment, hydro-therapy equipment, massage and all types of Physical Therapy. They work on each other and in the hospitals. These are the people who put the spring back in your step.

Physical Therapy Department Head Sandy Campbell watches to make sure the students know exactly what they're doing.

Kay Curtis, PT Instructor, demonstrates the proper stance for the Australian crawl.



# DARK ROOM

## KEEP DOOR CLOSED

**or**

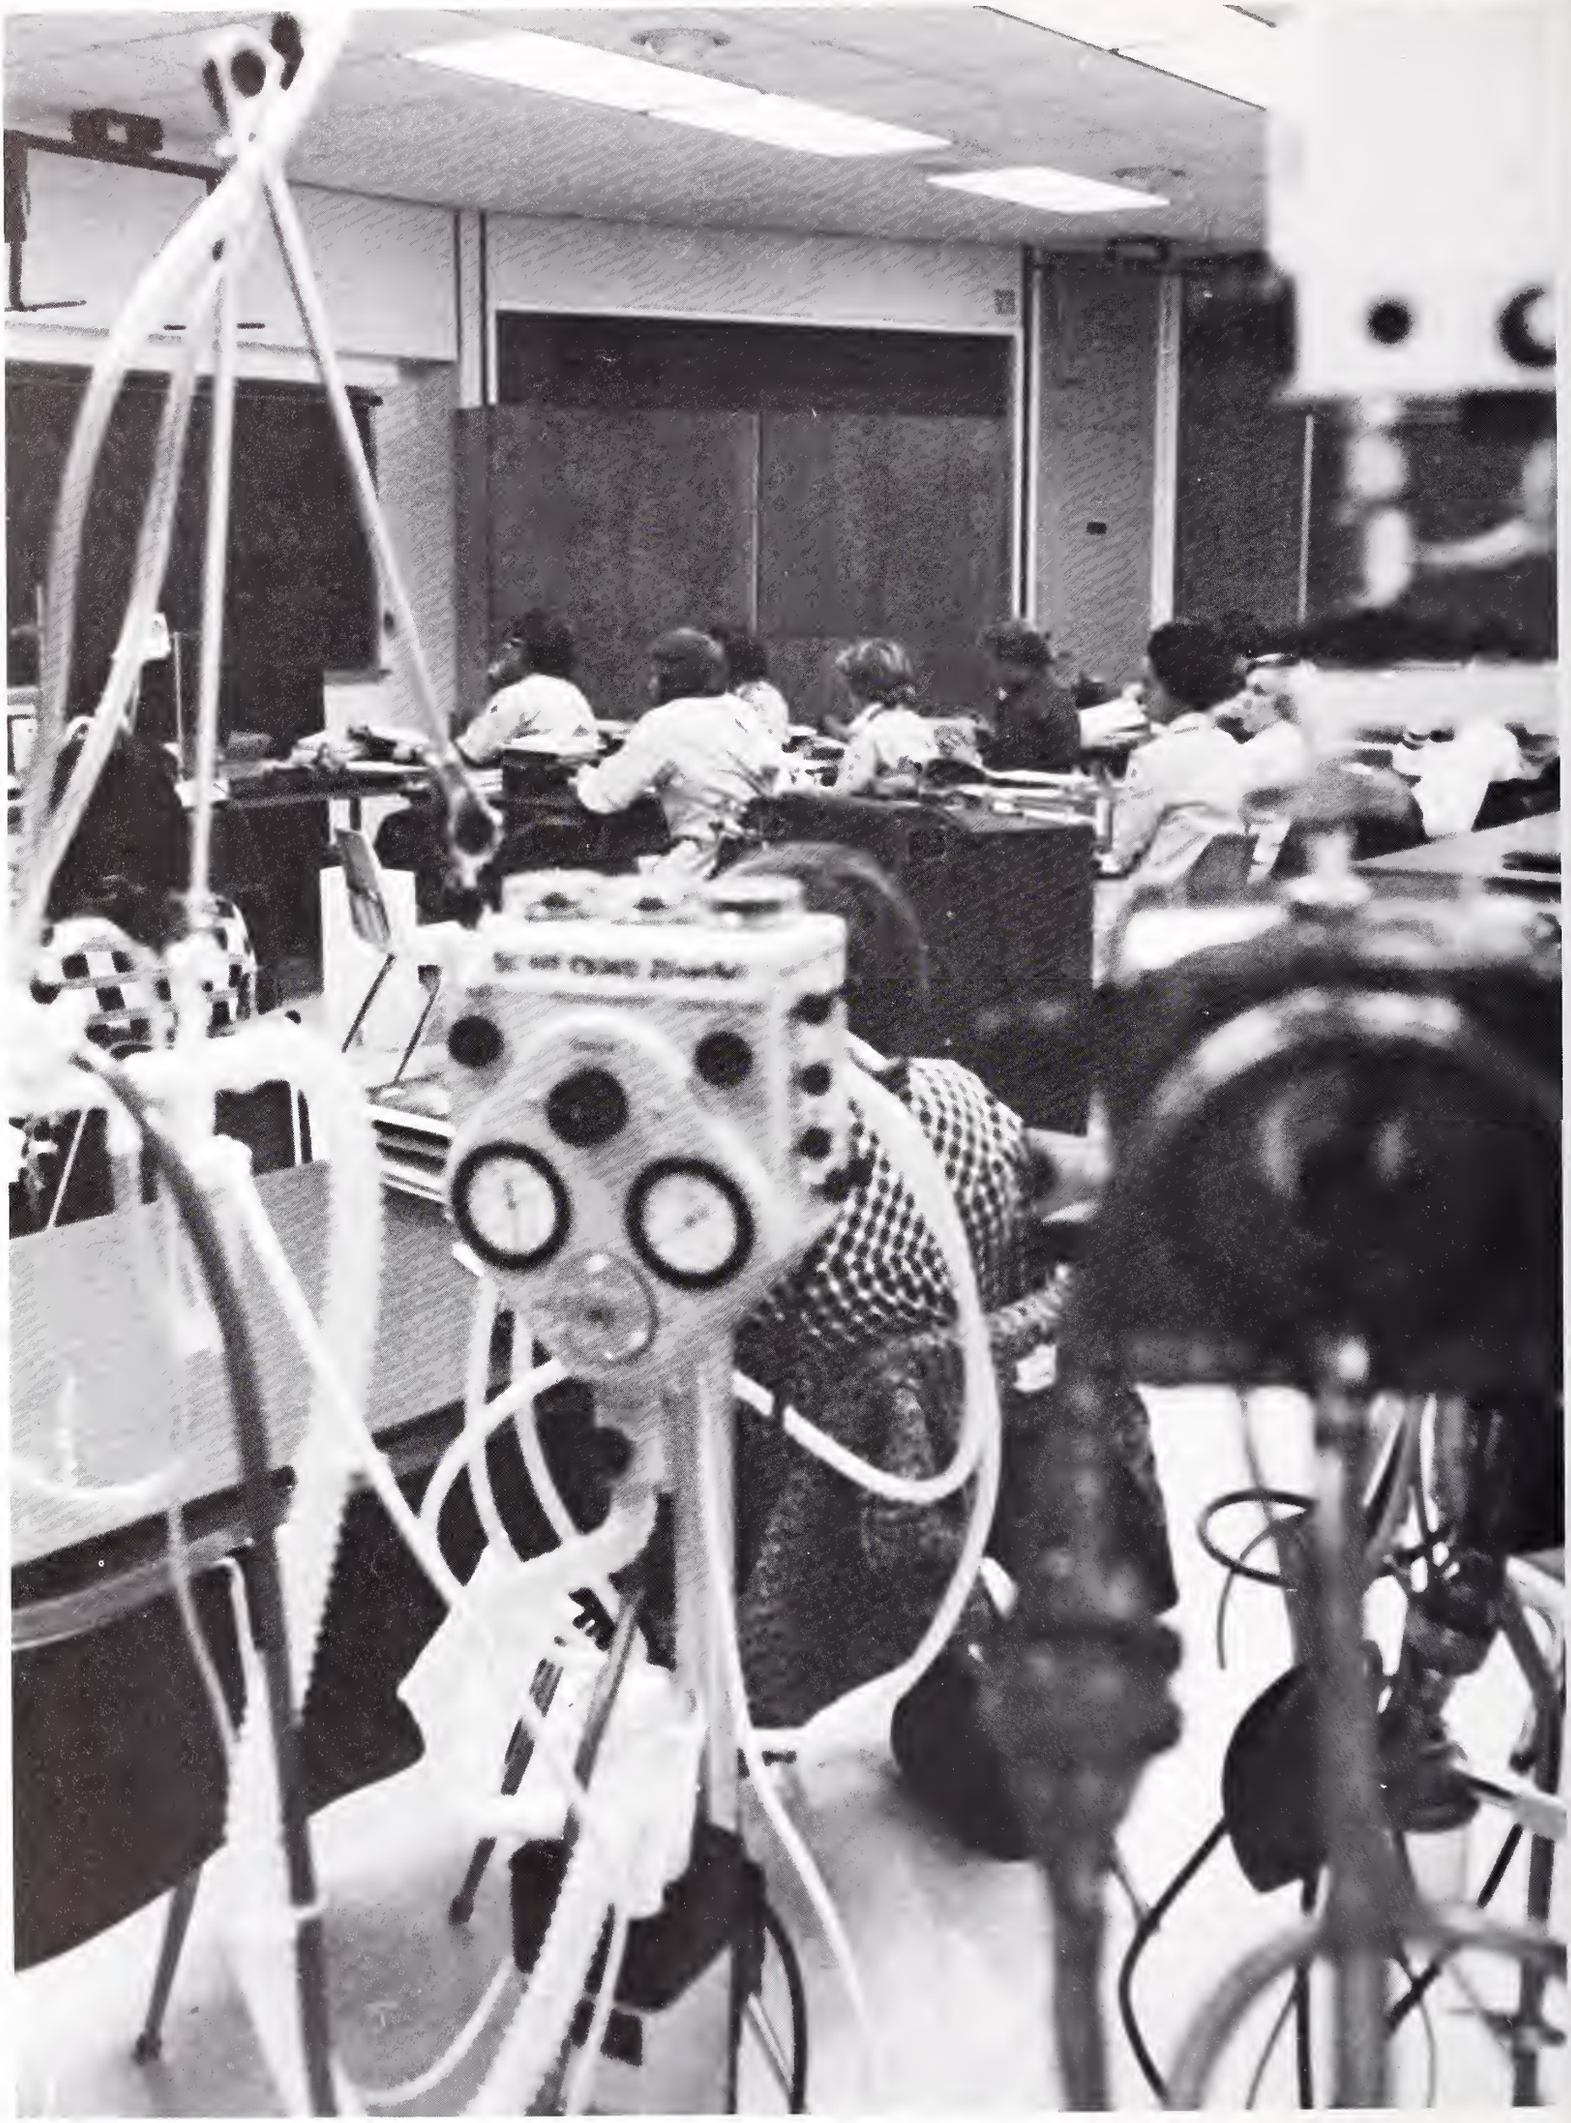
**All the Dark Leaks Out**

# Radiologic Technology

When a person graduates from Radiologic Technology he/she has accomplished something. Many hours of studying, lots of books and a whole new world give the student in Rad. Tech. plenty to keep his/her mind occupied.

Jim Ohynsty, Department Head

Joann Schilling, Instructor

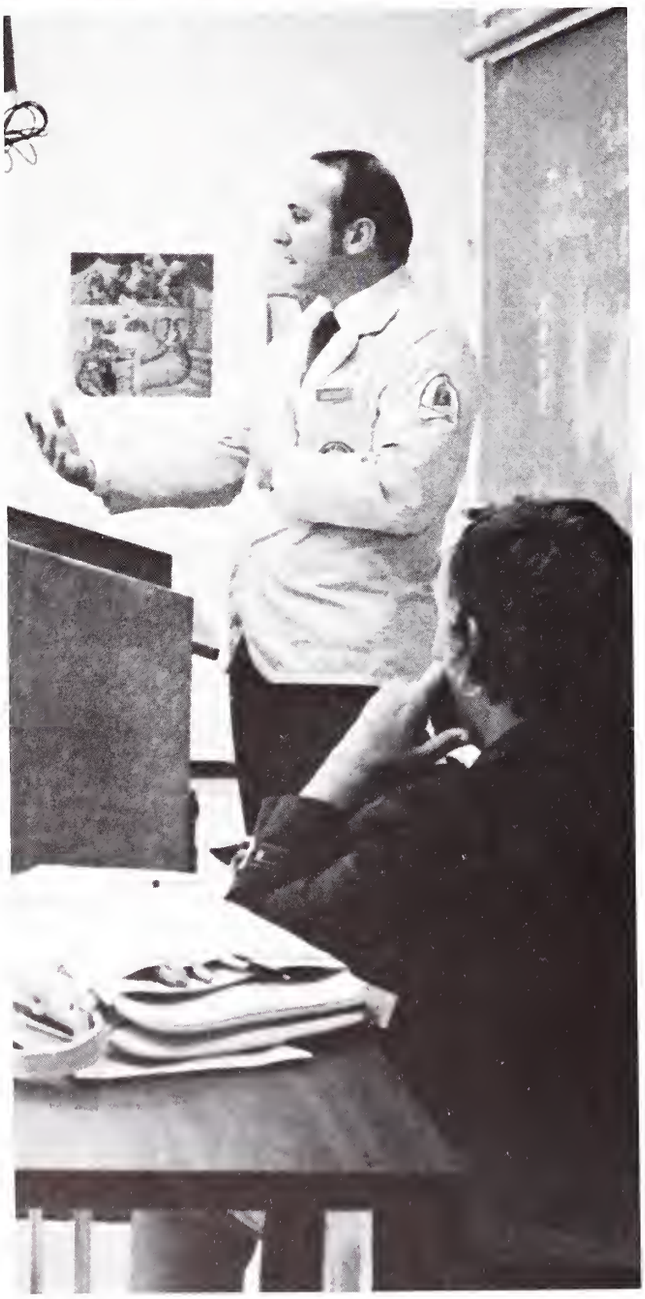


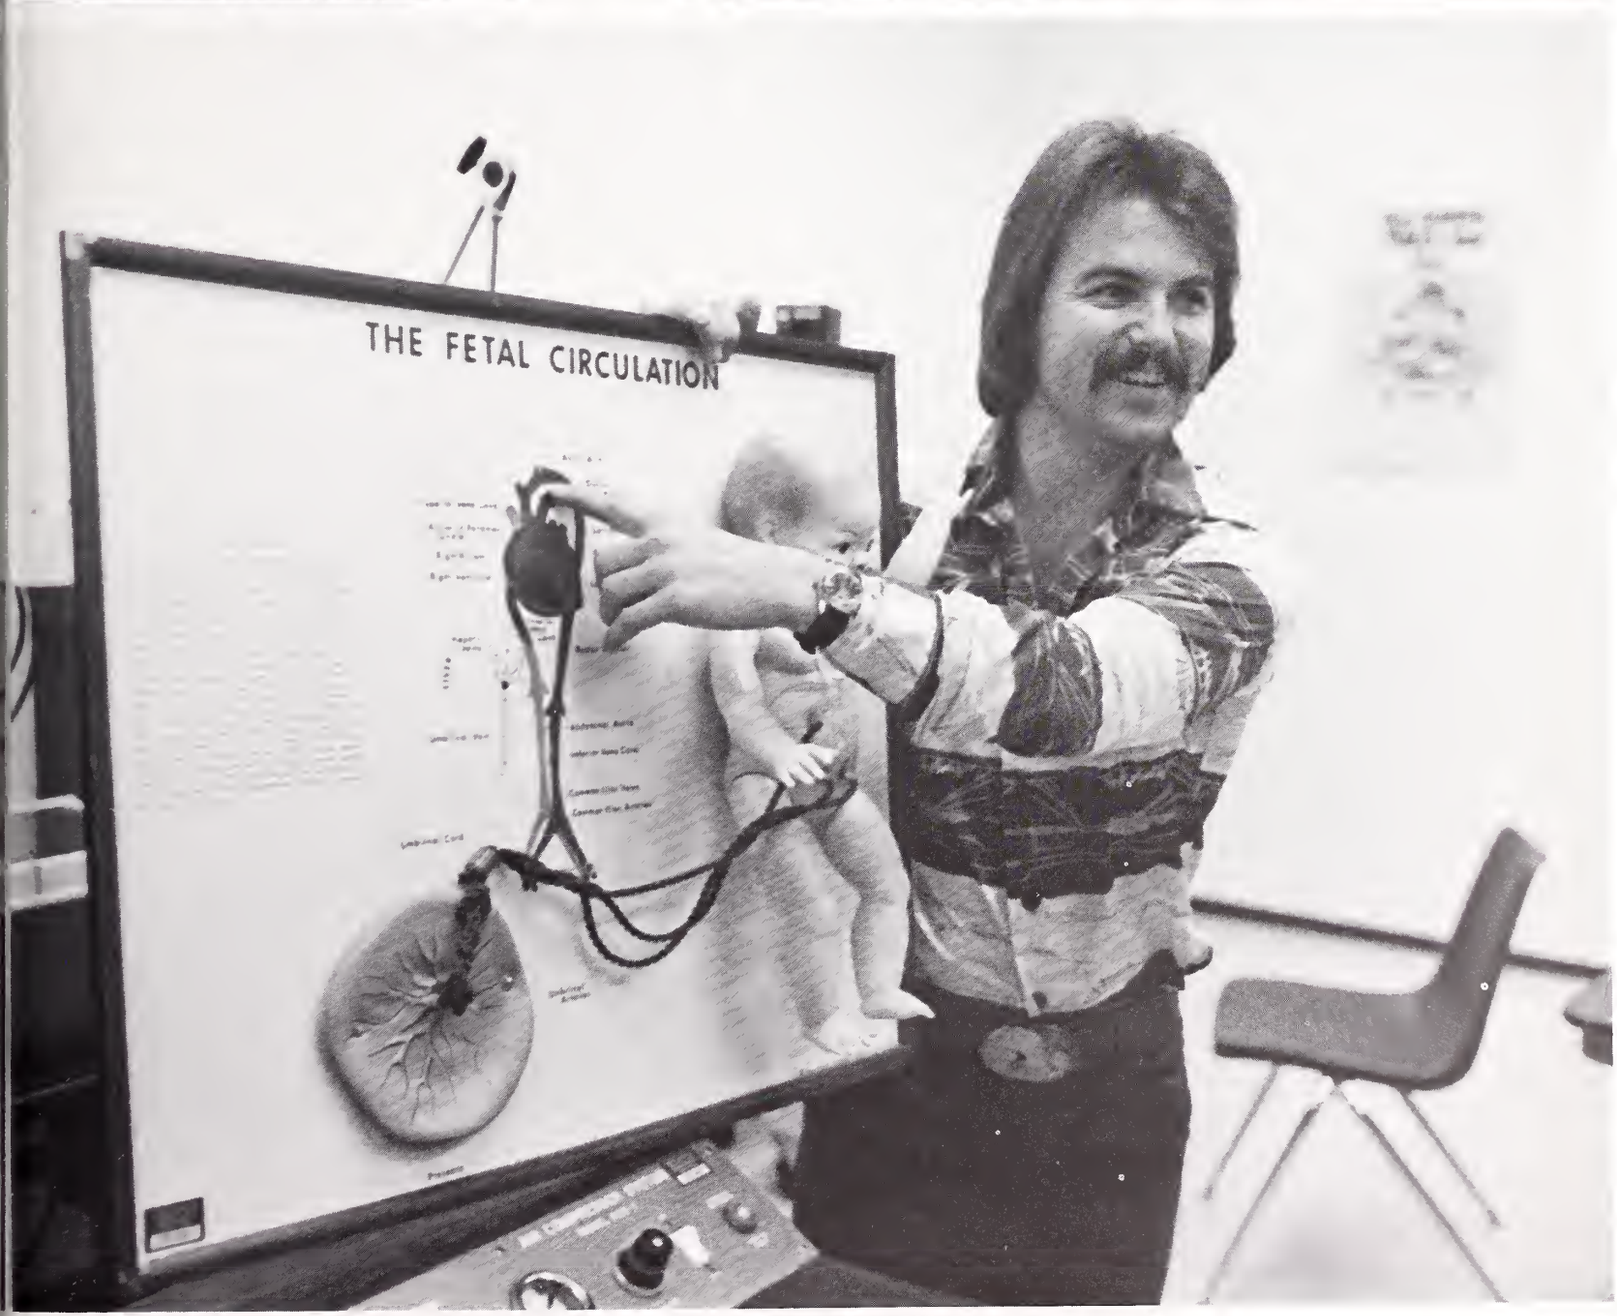
# Respiratory Therapy

**Breathing, breath, inhalation respiration — they all point to the Respiratory Therapist. Heart patients, respiratory patients — these also point to the Respiratory Therapist. And Greenville TEC points the Respiratory Therapist in the right direction with the right kind of training.**

Ron Purpora, Department Head

Paul Massengill, Instructor





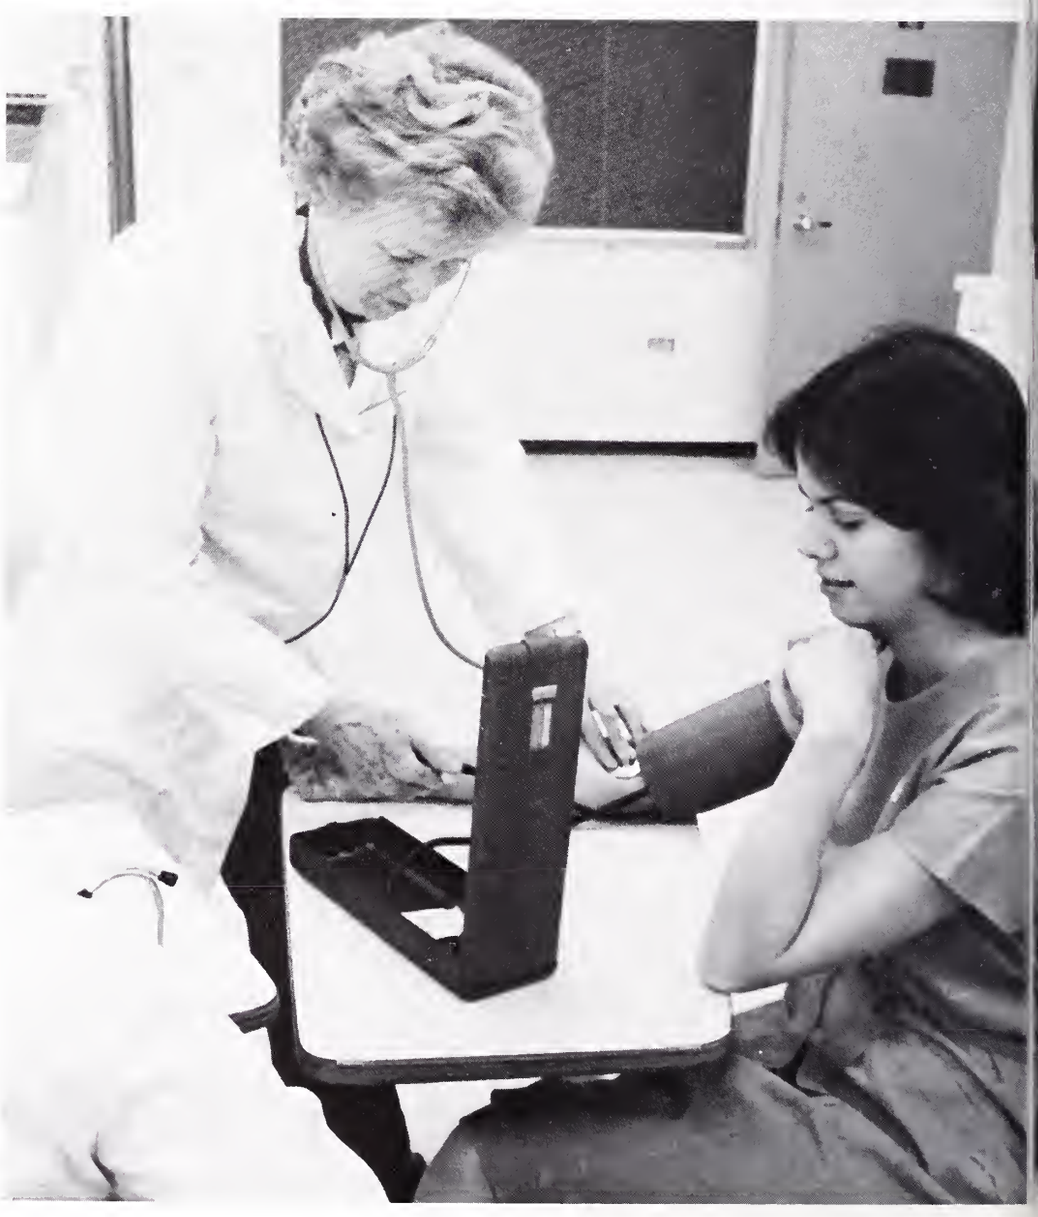
THE FETAL CIRCULATION

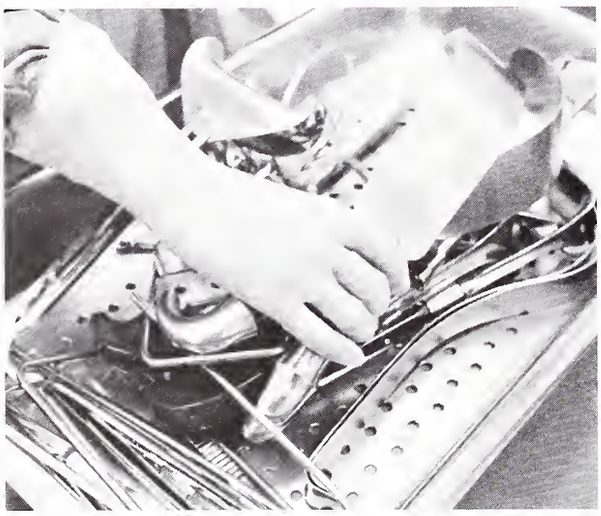
# SURGICAL TECHNOLOGY

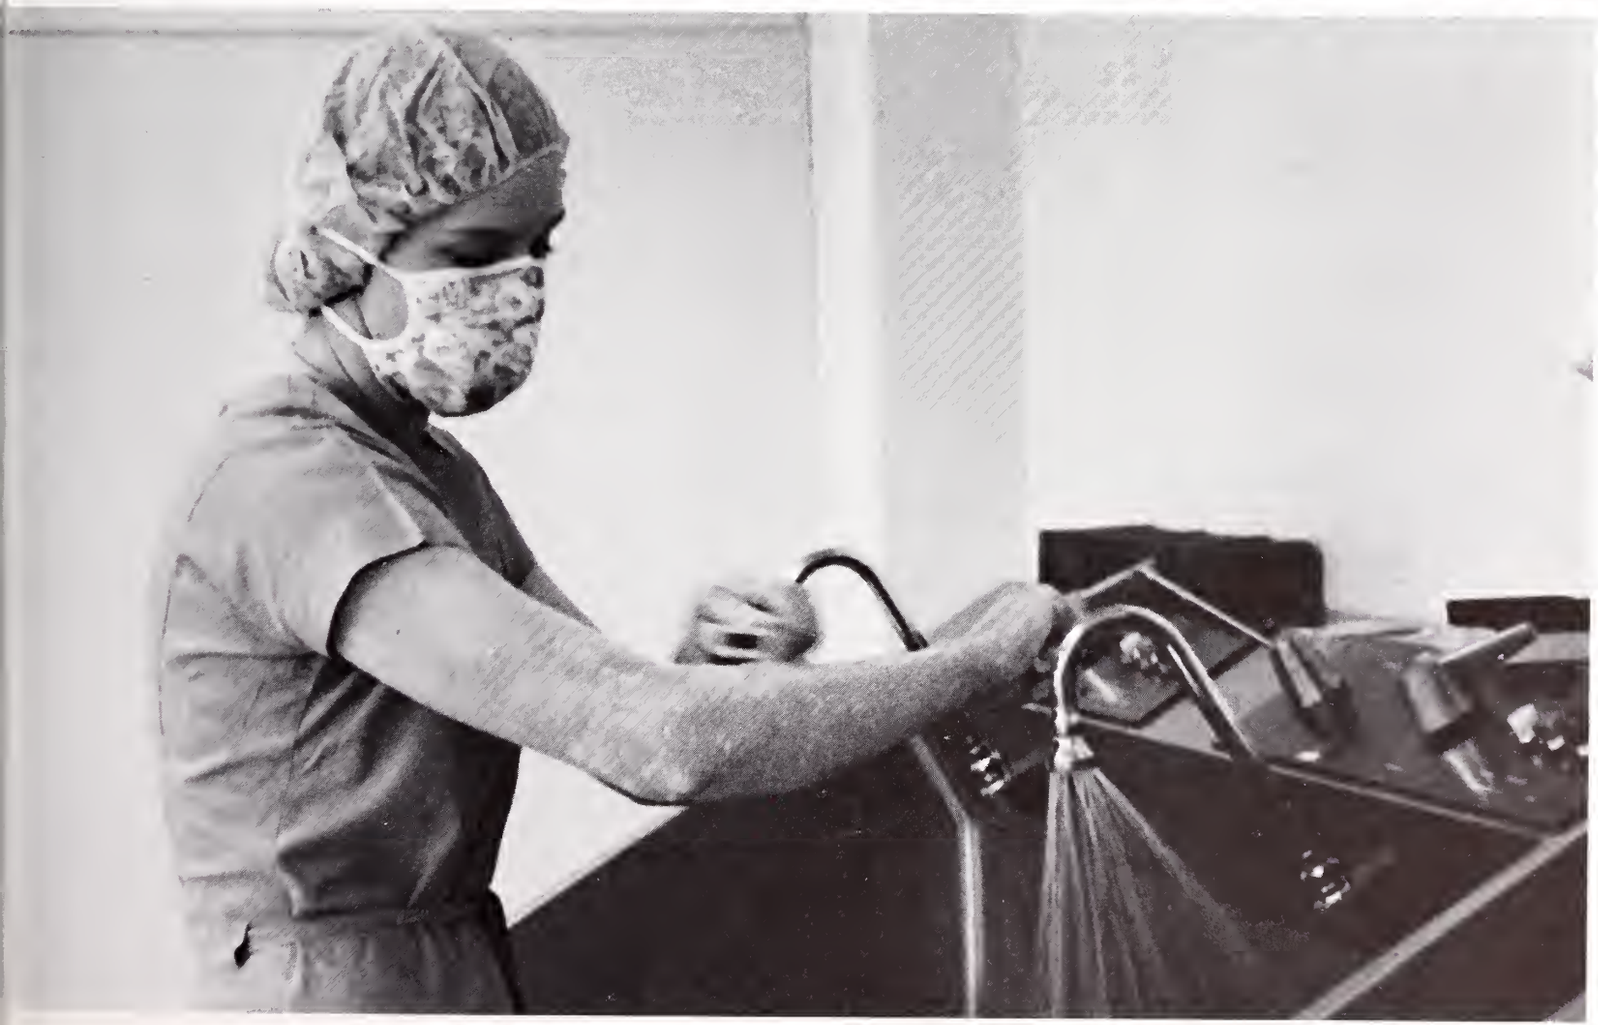
It is important to know just how to lift a patient onto the operating table. It is important to have all instruments sterilized. It is important to know how to anticipate which instrument the doctor will need next. ORT students learn all this and more at Greenville TEC.

Barbara Osborne, Instructor

Cecil Crum, Department Head

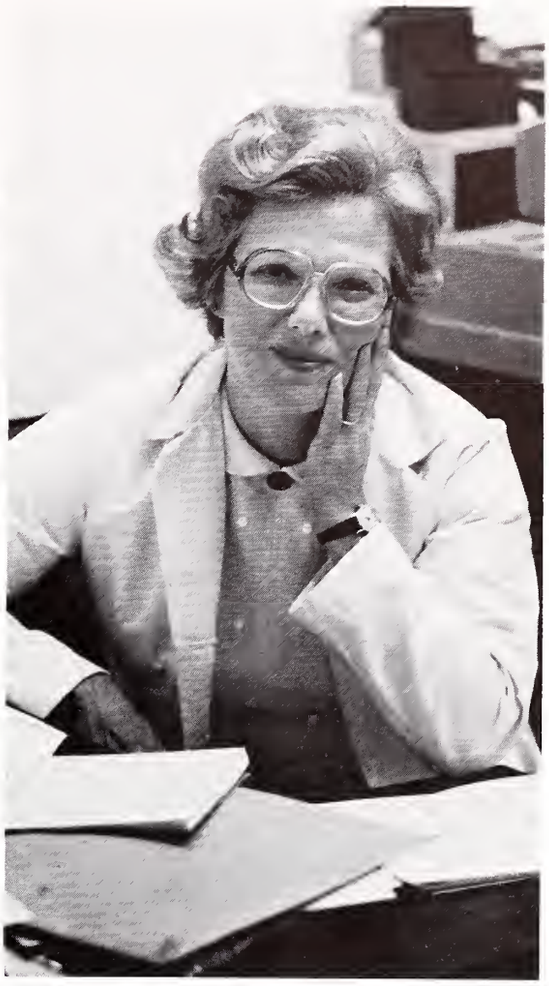






# Practical Nursing

Students in Practical Nursing find out there is more to nursing than bed pans and needles. There's patient psychology, all kinds of diseases and even med. surg. to study.



Odessa Carter, Instructor

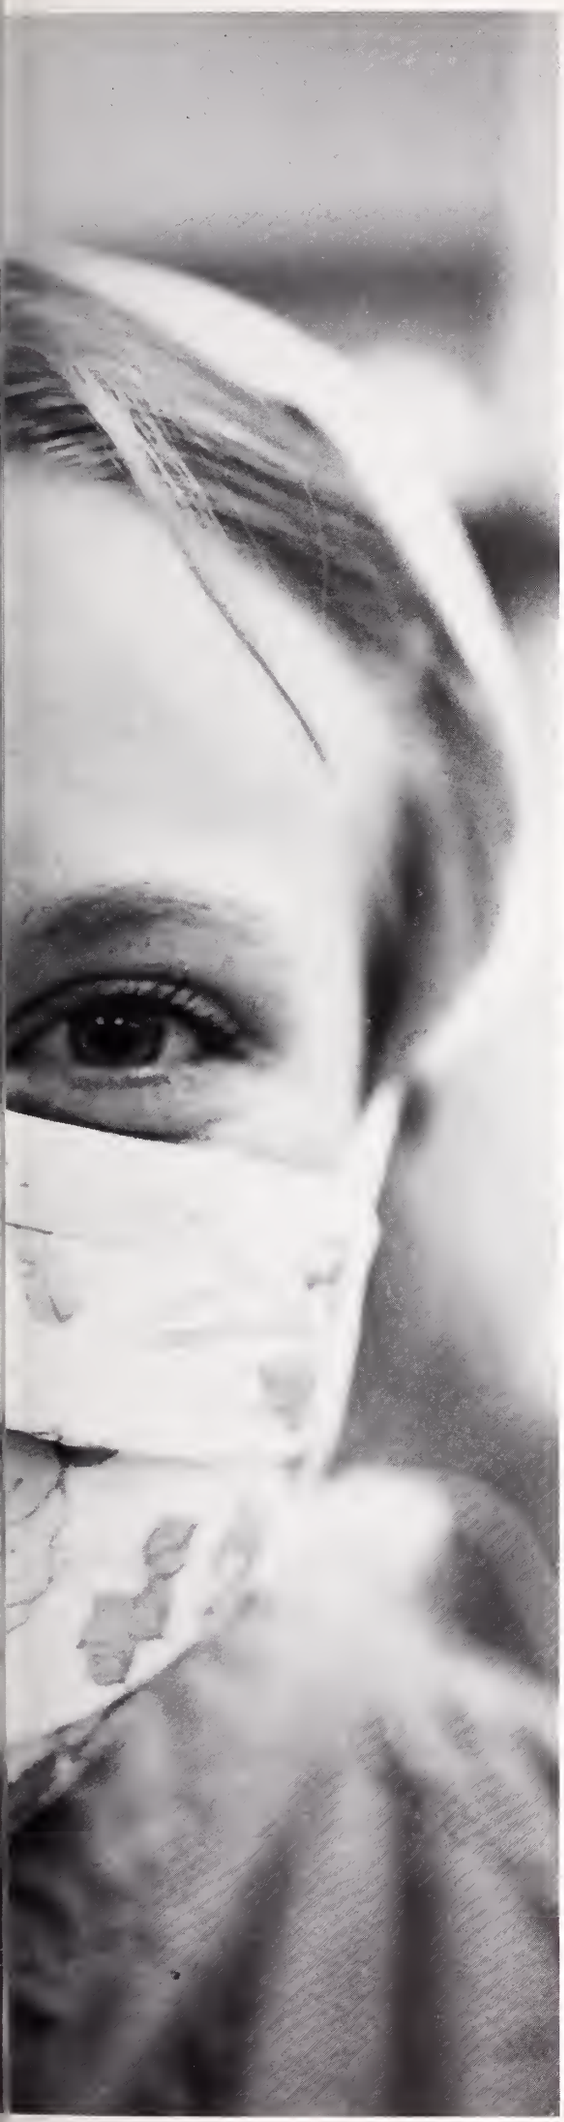
Alucia McDaniel, Dept. Head

Gayle Vaughn, Instructor

Rebecca Allen, Senior Instructor

Roberta Ogle, Instructor

Carol Suckow, Instructor

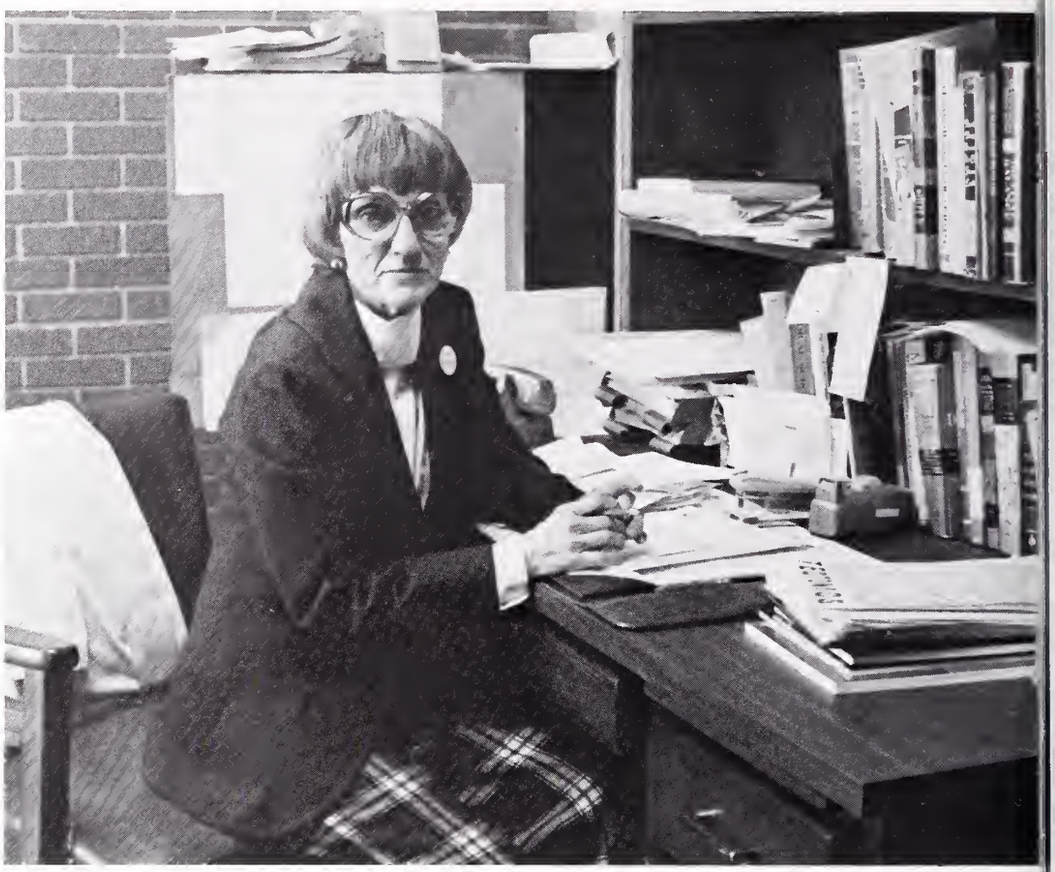


# Associate Degree Nursing

There are a lot of courses and a lot of studying involved in preparing for the RN registry and Greenville TEC's Associate Degree Nursing students put in a lot of hours in these areas. Books and sheets and hypos and clinics, the memories of ADN students are filled with these.

Alethia Walker, Instructor

Dorothy Davenport, Dept. Head



Annie Welch, Instructor

Rudeane Ivester, Instructor

Ruth Osborn & Emma Hatfield, Instructors

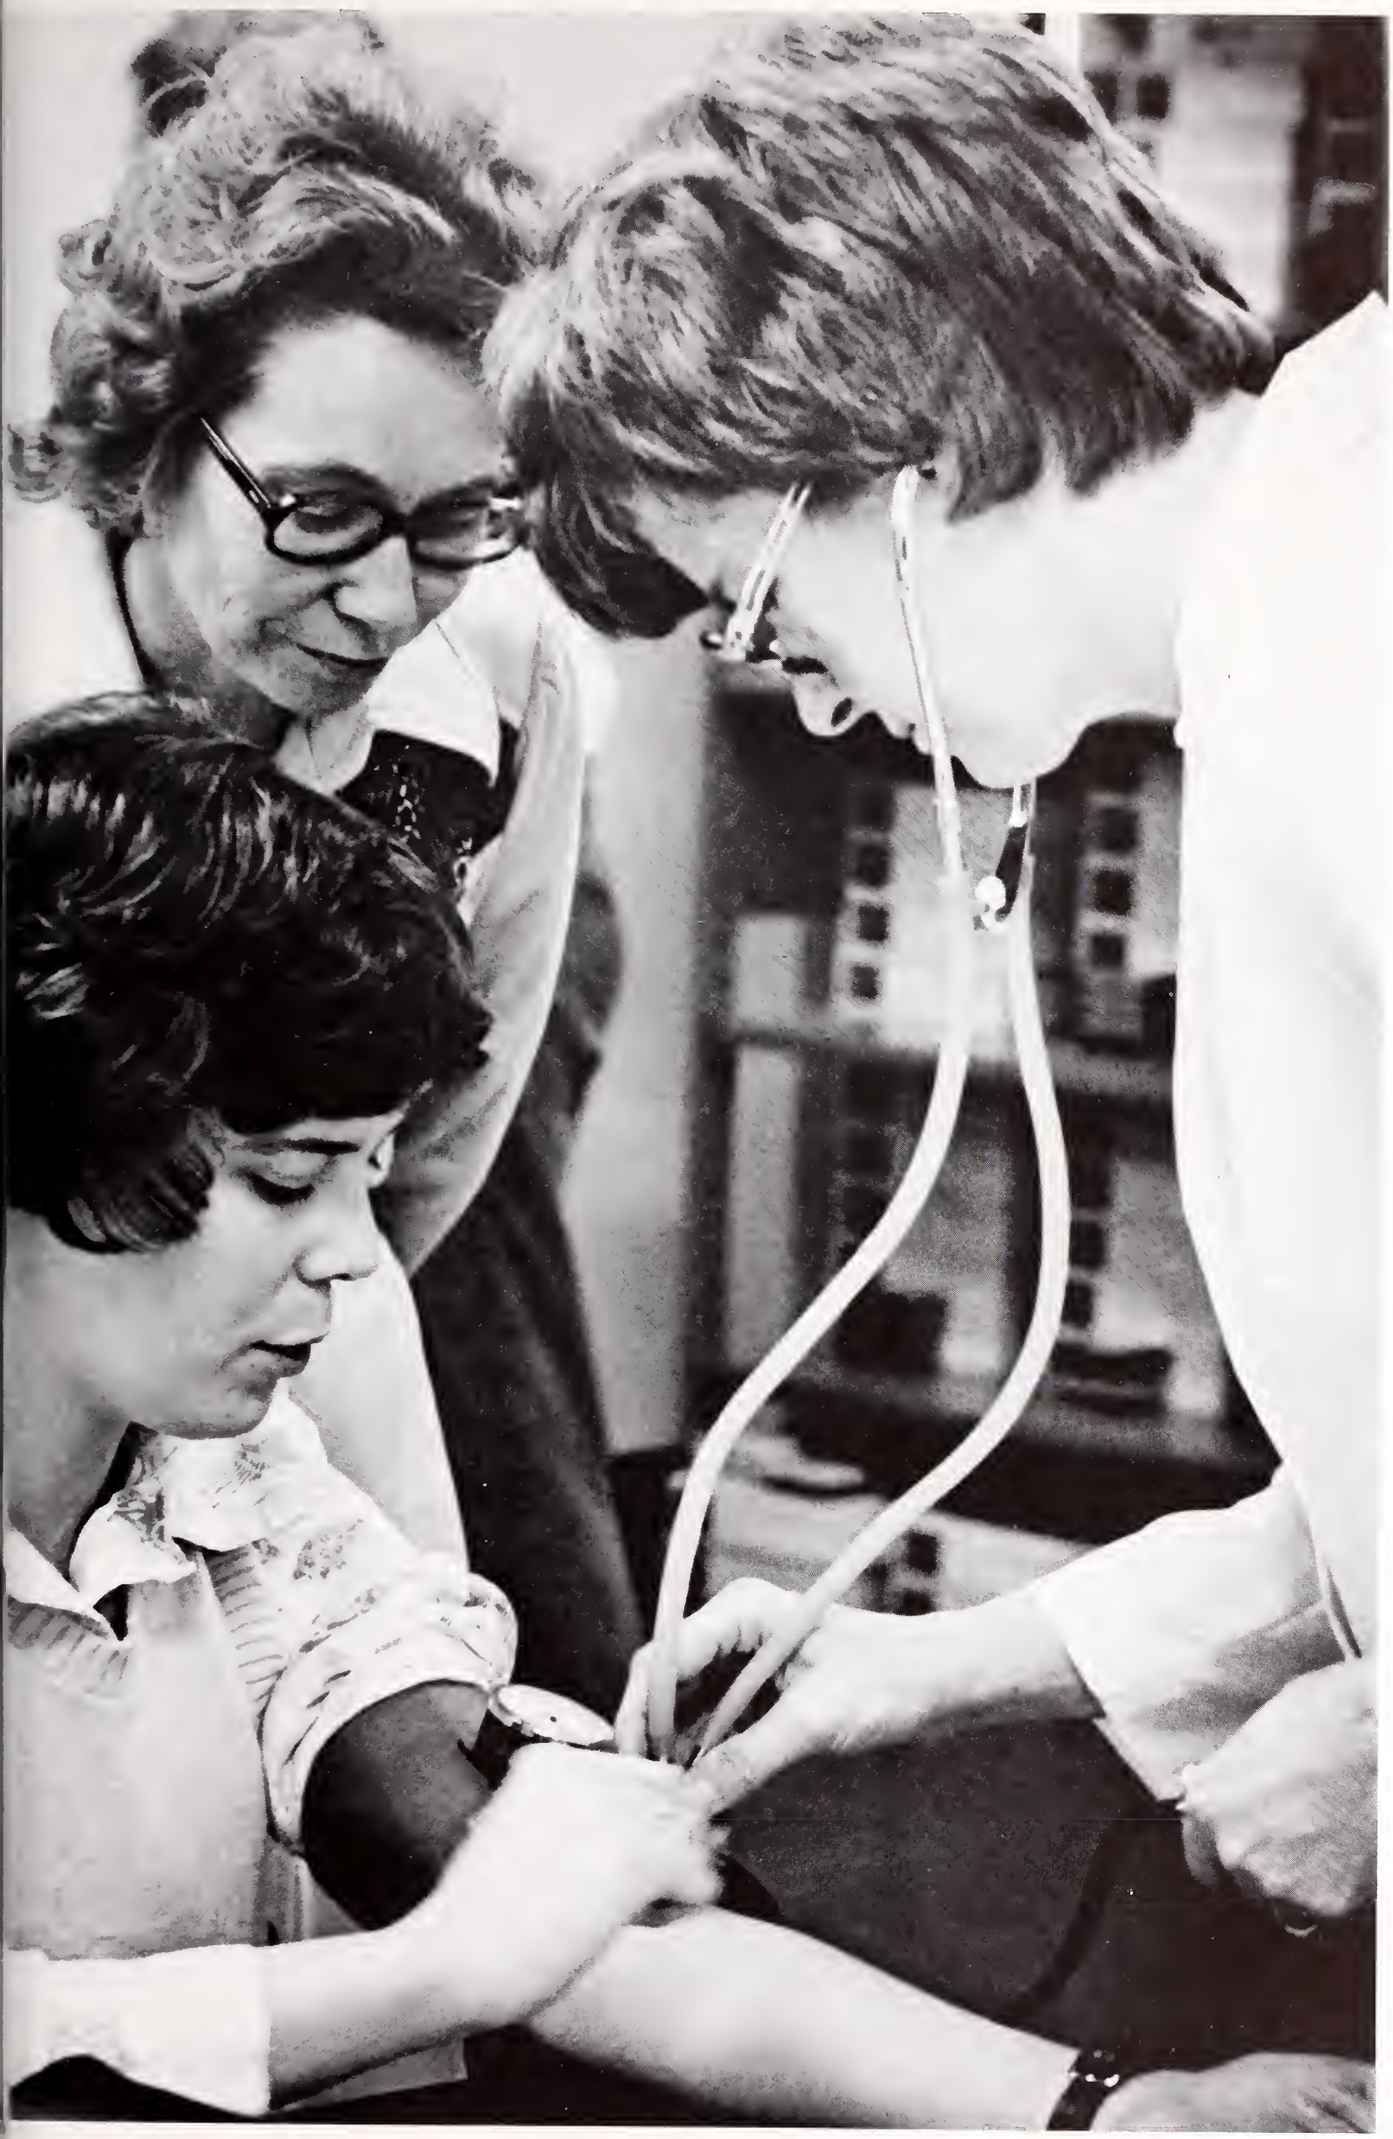
Rebecca Collins, Instructor

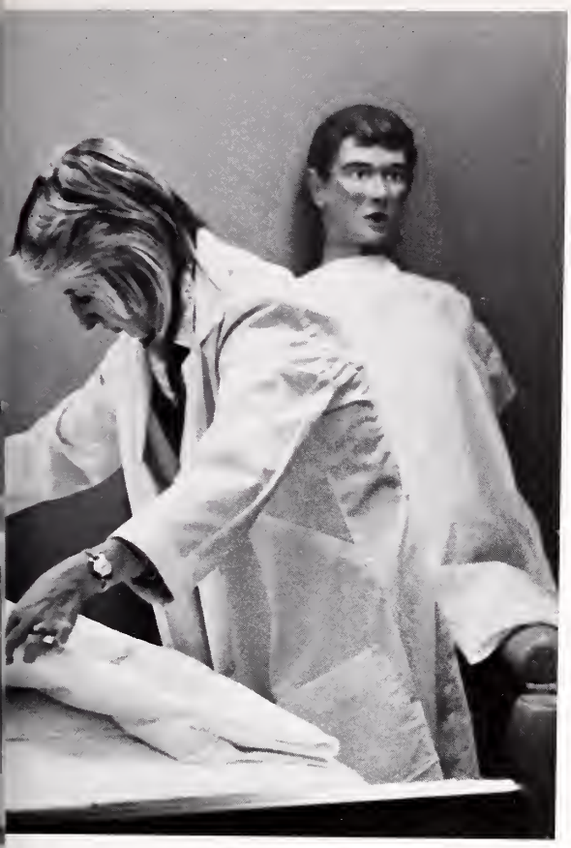
Jacquie Perzak, ADN Instructor

June Campbell, ADN Instructor

Betty Christeson, ADN Instructor

Julia Kugler, ADN Instructor





# Industrial Division

These are the students who conduct magic shows. For instance Air Conditioning students can make ice appear on copper pipes and even wash air. Welding students can make any metal stick to another metal miraculously. Industrial Electronics students can bring forth light. Metalworking students can make a screw out of a slug of metal.

Yes, these folks are learning to do what most humans can't quite understand but nevertheless need.

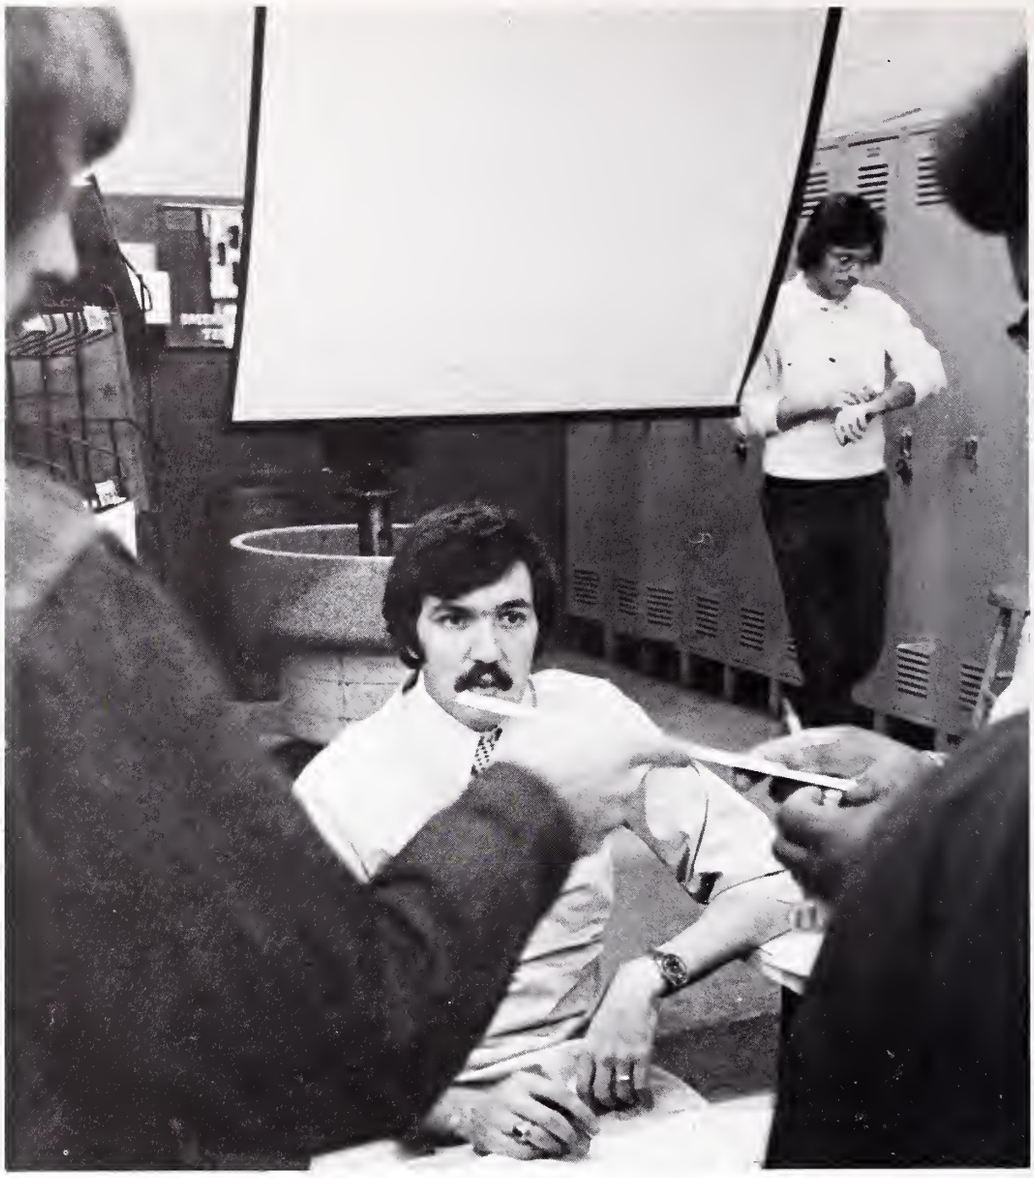
243 Industrial Electronics
247 Air Conditioning
251 Metal Working Technology
255 Welding

Randy Lucas, Instructor

Bill Bailey, right, is Department Head

# INDUSTRIAL ELECTRONICS

AC, DC, circuits and codes, occupy the time of Industrial Electronics students. Graduates are ready to wire houses, maintain the electrical wiring for industries and even take the test for installing electricity in Greenville County.

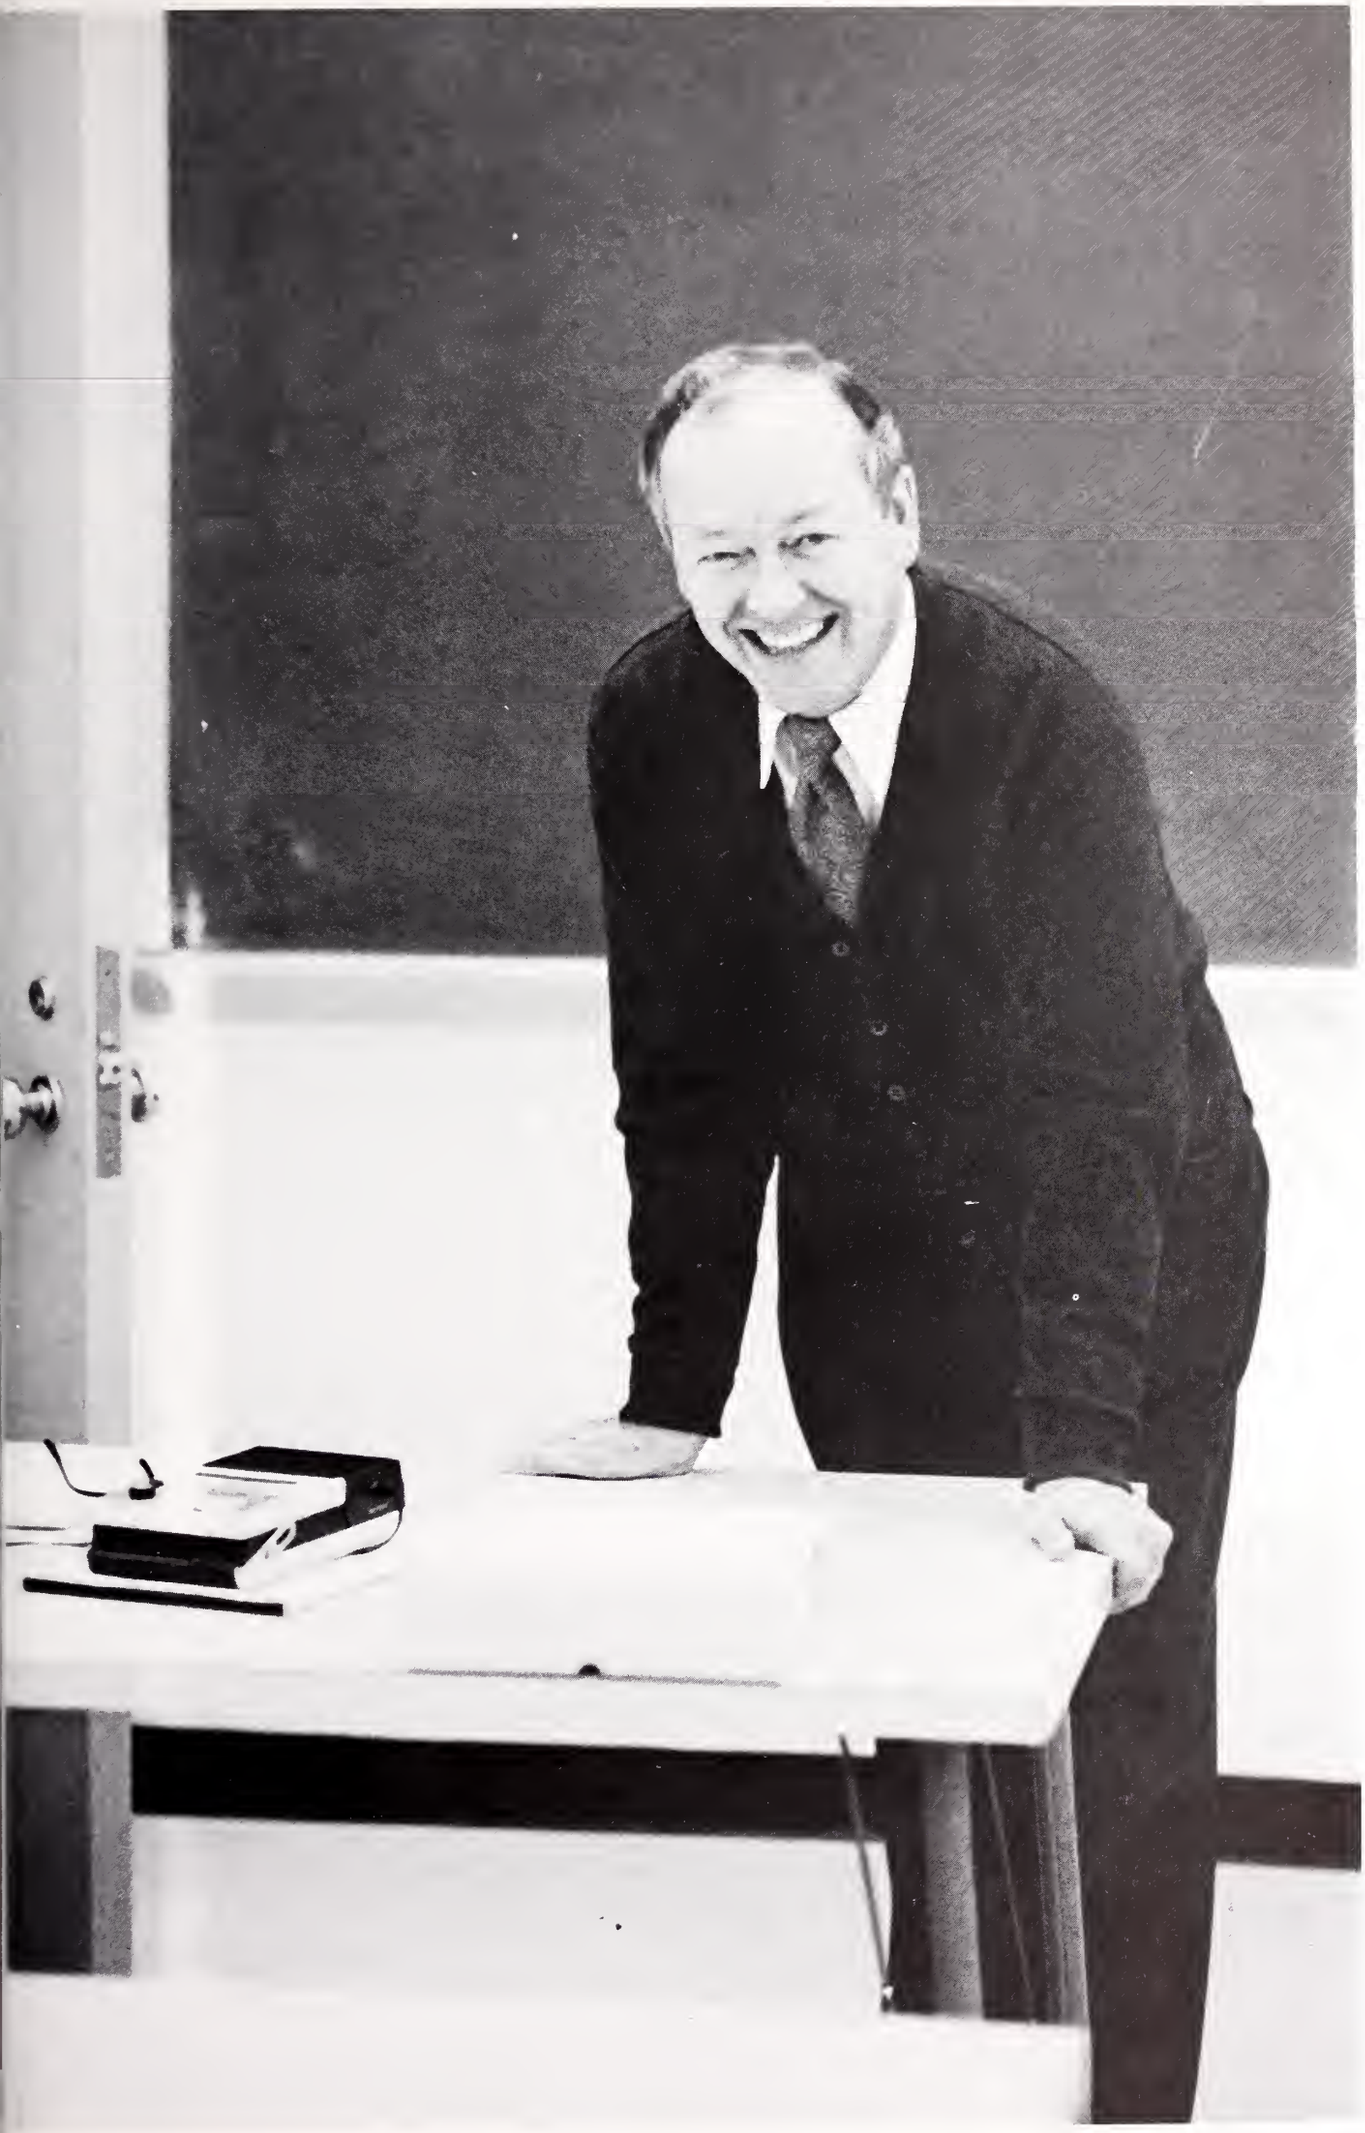


# HEATING, REFRIGERATION

Grads of the Air Conditioning Department can repair refrigerators, install furnaces and air conditioners and handle almost any heating or cooling apparatus. They have studied everything from electricity to heat conversion to a little trig.

Tommy Shiftlet, Instructor

Ralph Johnson, Department Head



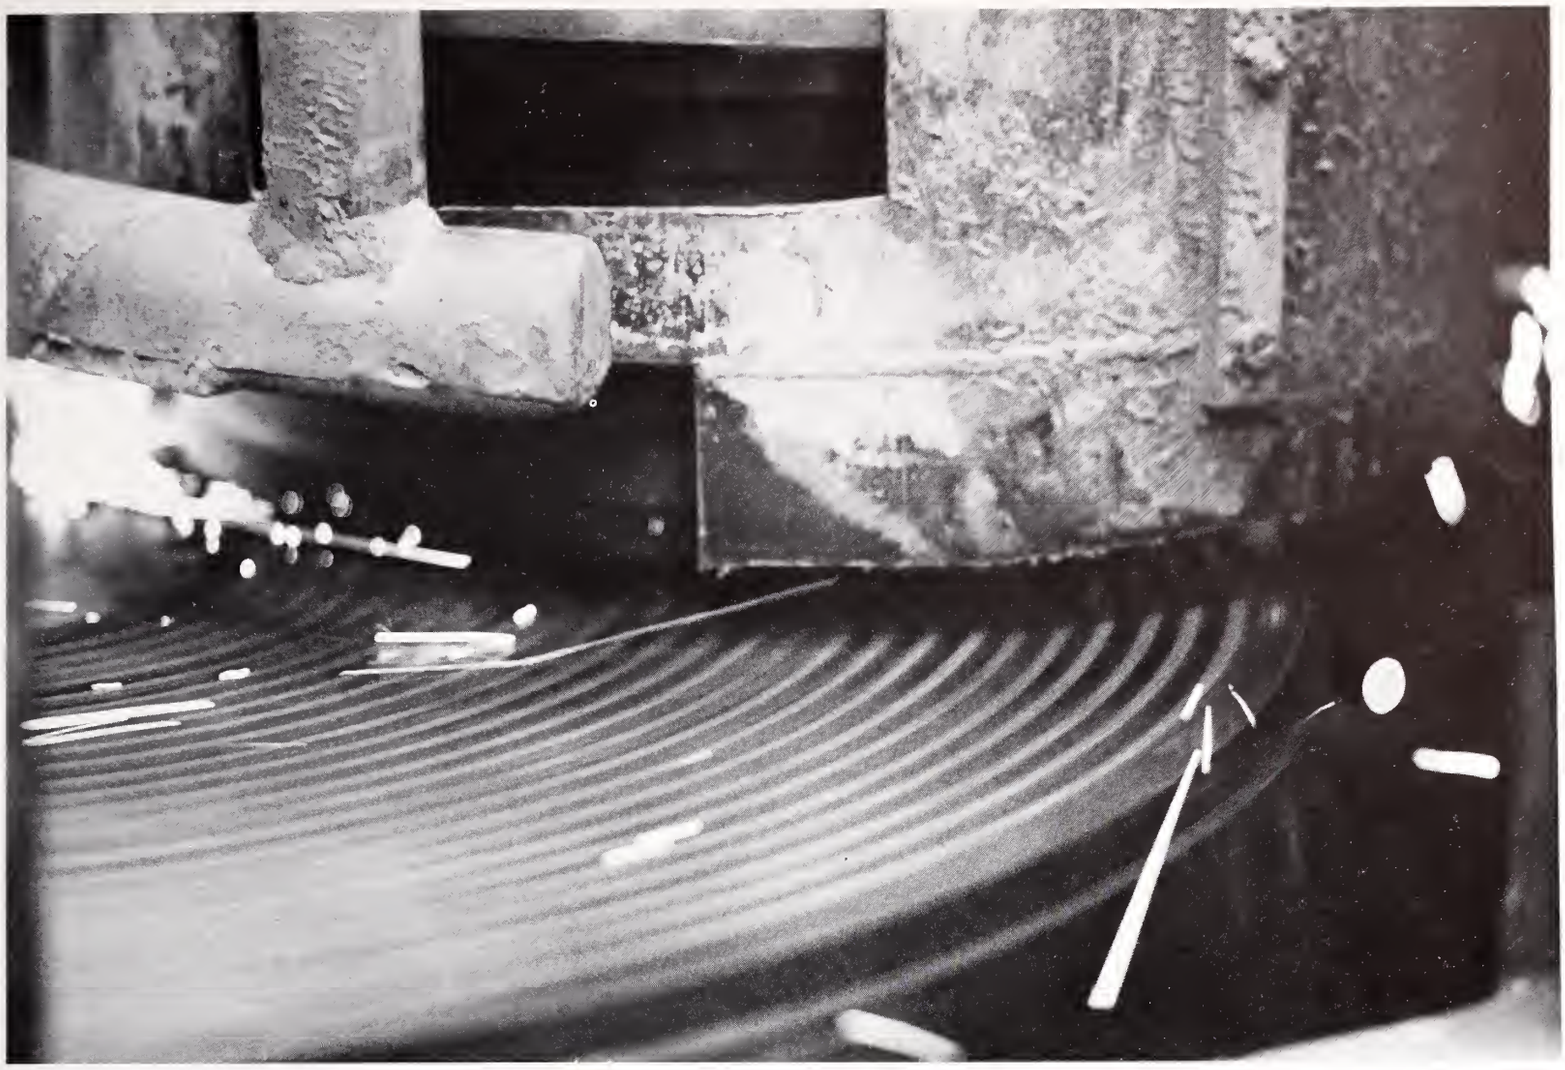
# METALWORKING

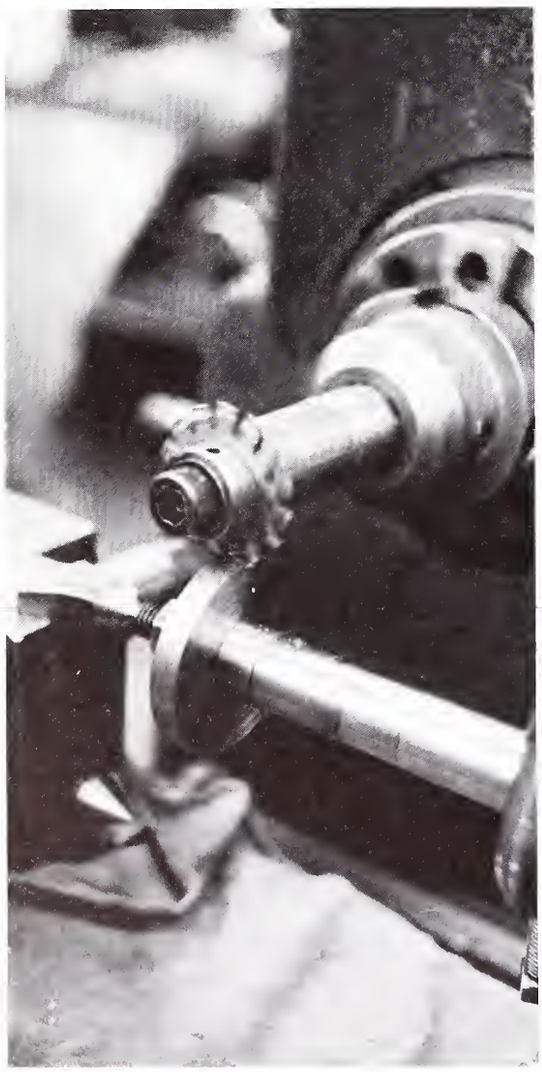
Lathes, drill presses, horizontal files and numerical control equipment become part of a machinist-tool makers life. He, and she, learn to operate all types of machinery in making screws, hammers, and other tools.

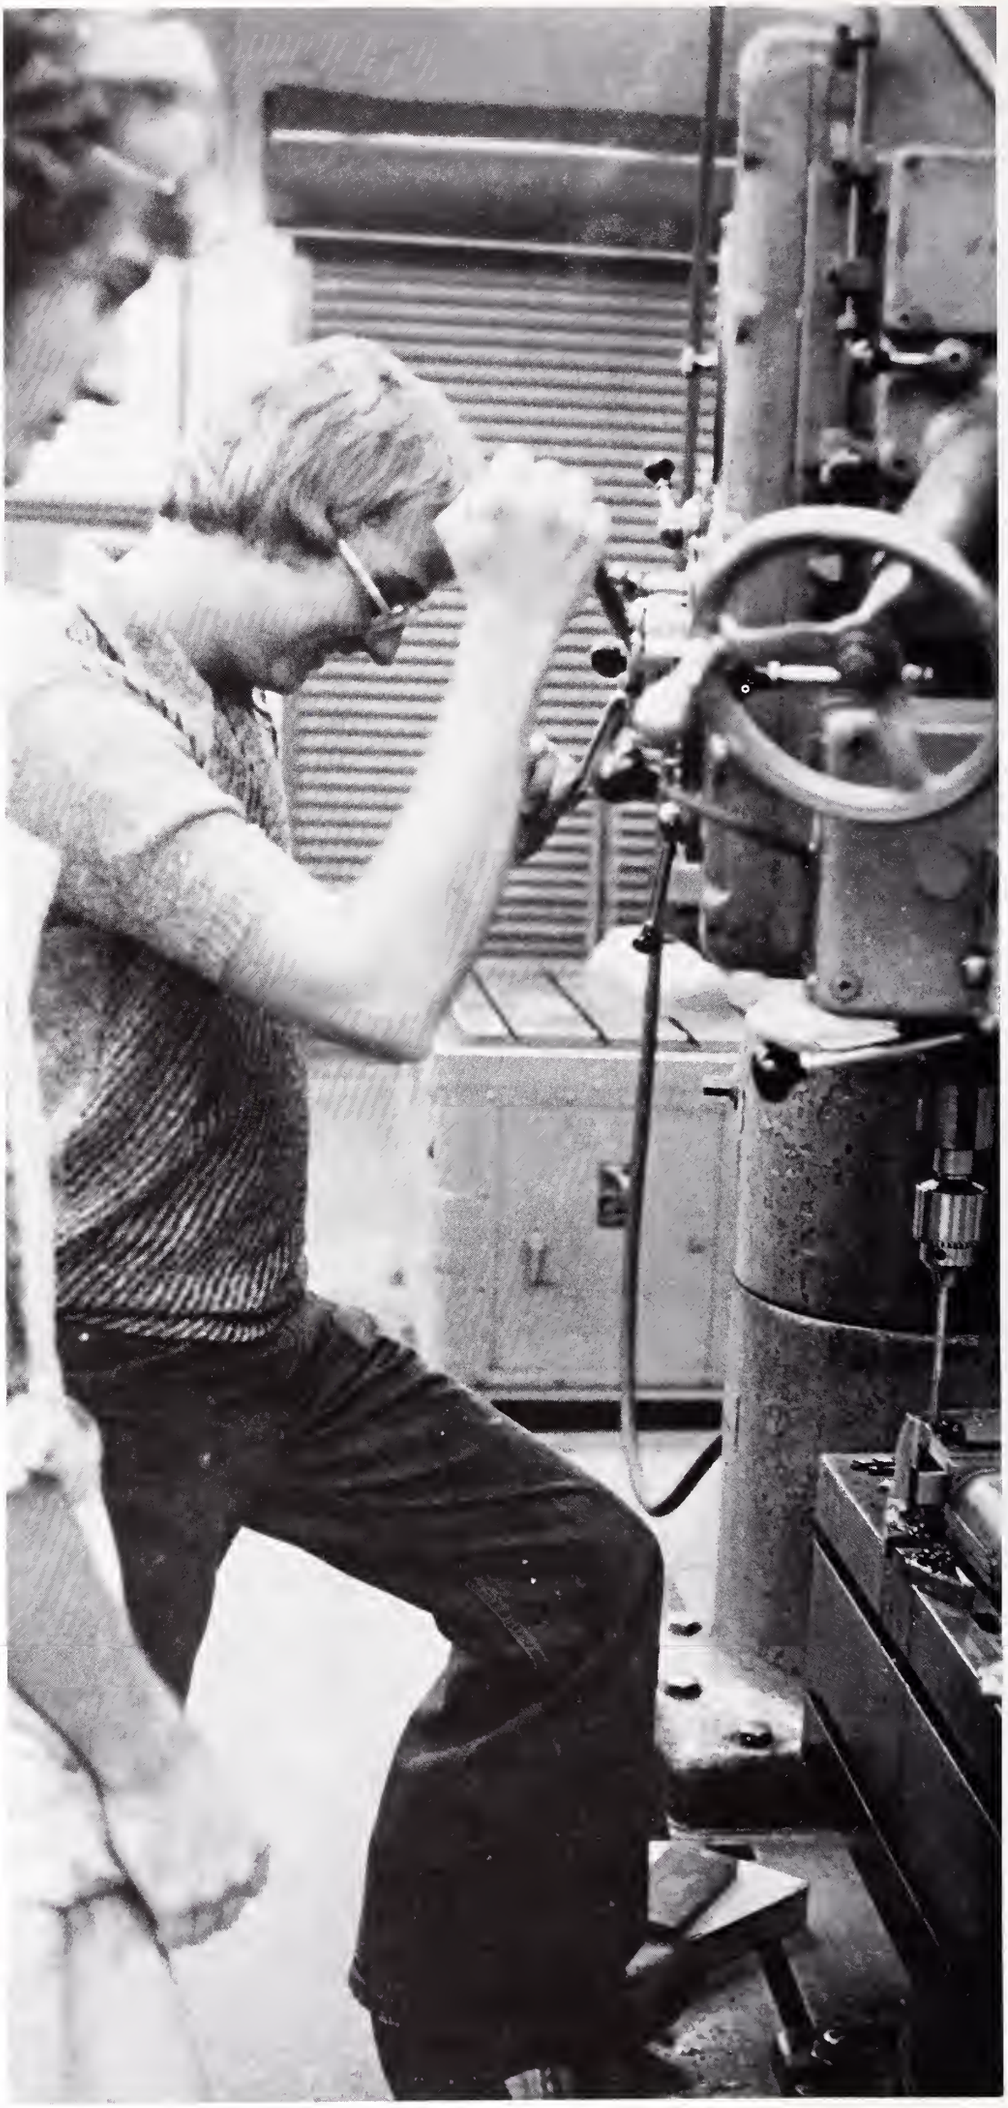
Youngsters are expanding their career education horizons.

Thomas Bolt, Instructor

Charles W. Granger, Department Head







# WELDING

**Arc welding, electric welding, gas welding are just some of the types of "joining together" that the welding students learn. They even study properties of metal, blueprint reading and pipefitting.**

Job satisfaction!

There is a beauty attached to it, too.

Clyde Rook, shown at top left, is Department Head.

RODS ARE EXPENSIVE -
BURN STUBS FIRST!

# Management Division

The newly organized Management Division has grouped together the Insurance Management, Transportation Management, Textile Management and Management Science Programs.

There are certain skills supervisors and managers need to be efficient. The skills can't be purchased in the plant's canteen or requisitioned through the business' supply center. The skills must be learned and they are being learned in the Management Division.

261 MANAGEMENT SCIENCE
265 INSURANCE MANAGEMENT
269 TEXTILE MANAGEMENT
273 TRANSPORTATION MANAGEMENT

# Management Science

"A supervisor can only perform as well as he is trained," says Tom Miller, Dean of the Management Division. The Management Science program has courses in human relations, motivation, problem solving and communications. The Mgt. Sci. grads should perform well.

Ernest Secrest, Department Head — Management Science

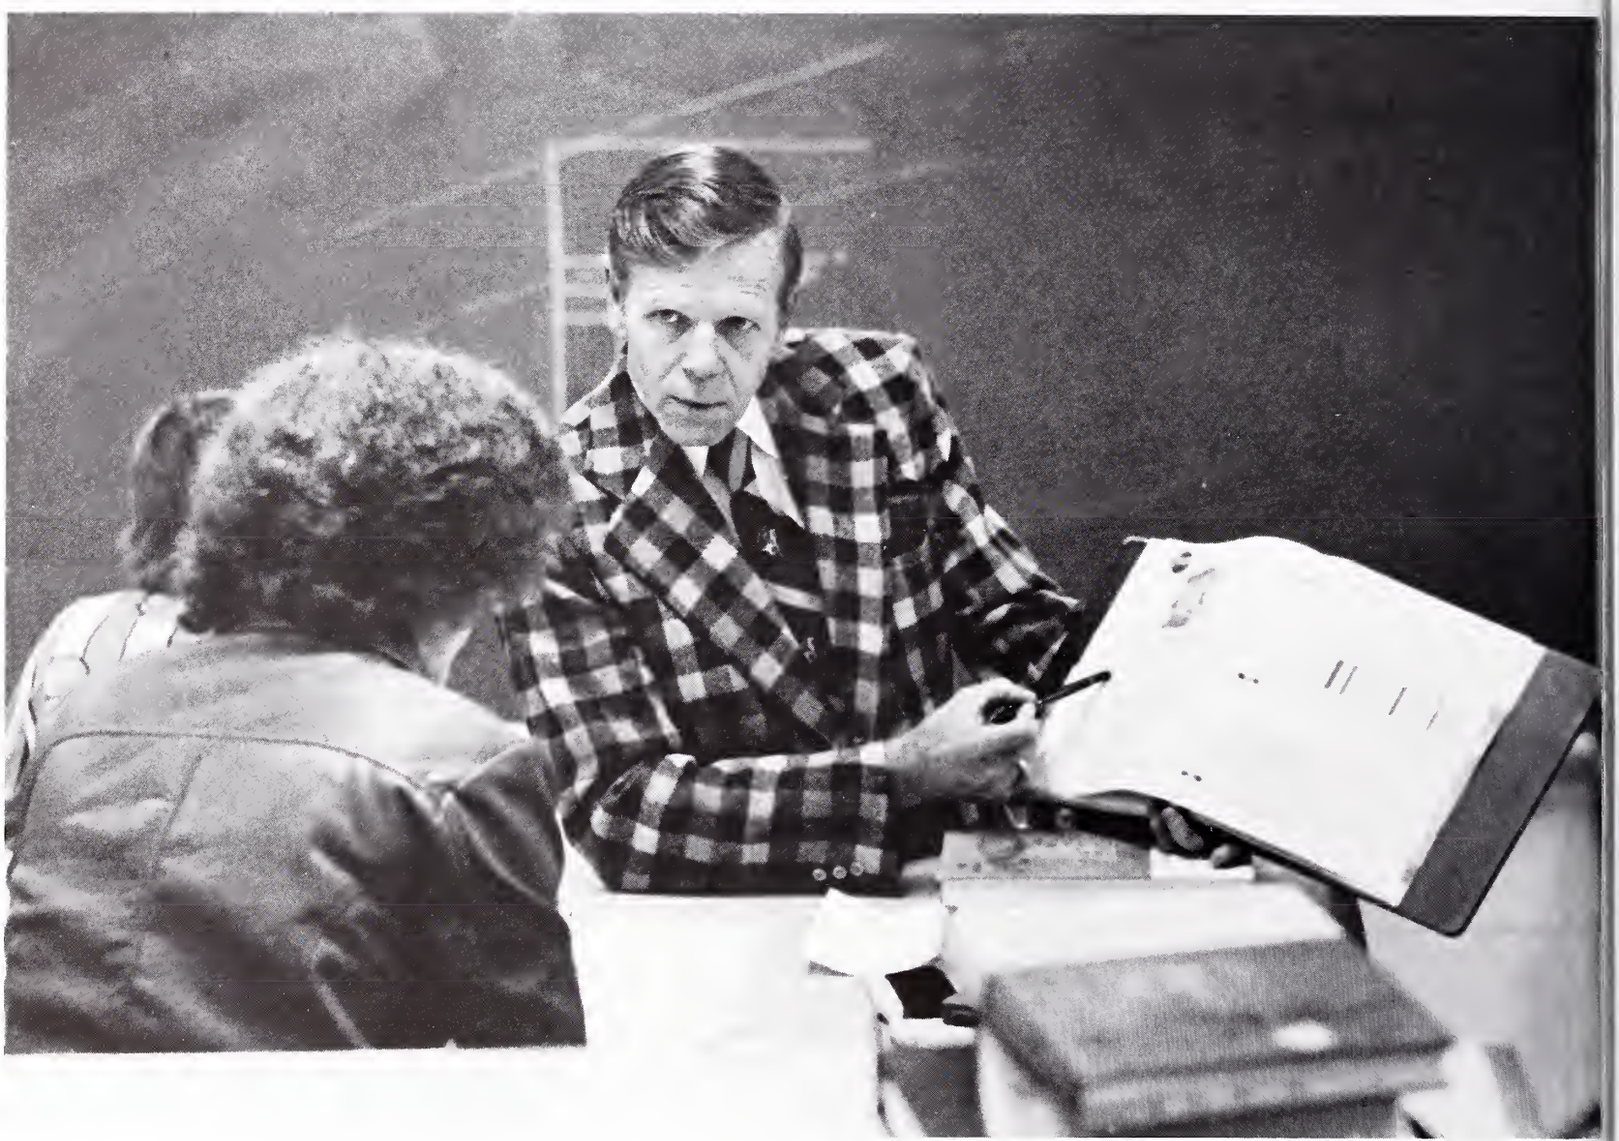
# Technical Division

Under the Technical Division there are the engineering technologies: electrical, industrial, civil, mechanical, graphics, building construction, architectural and environmental-chemical. Also under the Technical Division there are a lot of students preparing to take high paying jobs in Greenville's industries. Their main tools are drawing boards, slide rules and a computer brain.

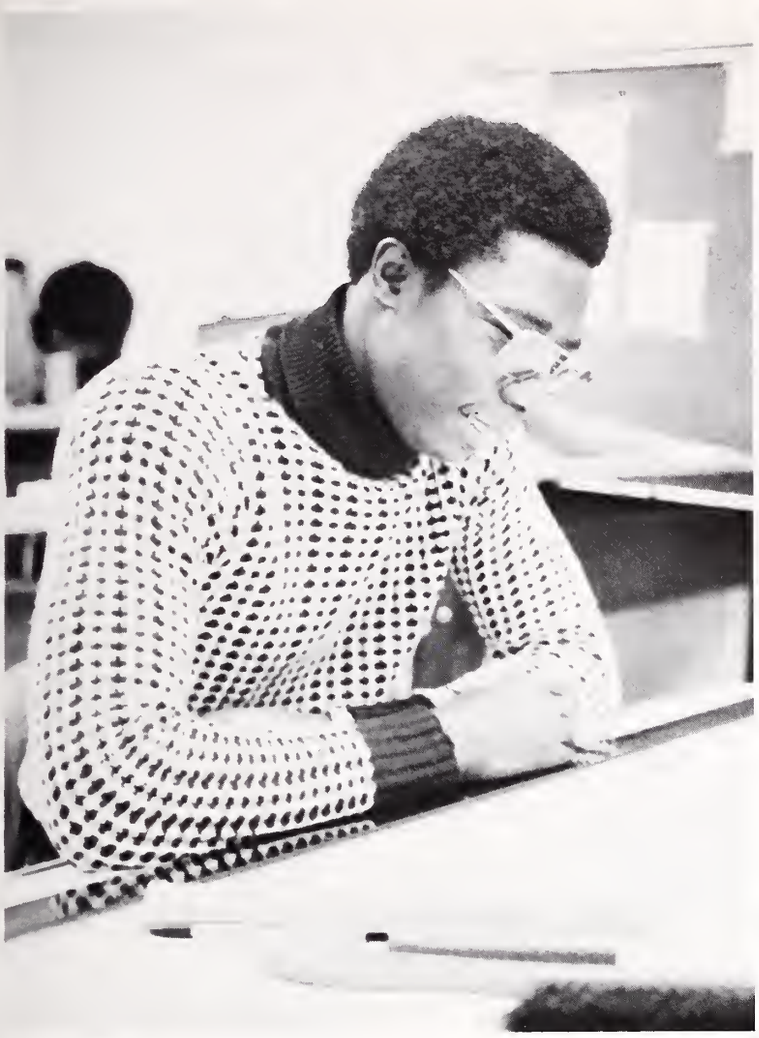
279 Architect
283 Building Construction
287 Chemical Technology
291 Civil Engineering
295 Electronics Engineering
299 Engineering Graphics
303 Industrial Engineering
307 Mechanical Engineering
311 Wastewater Technology

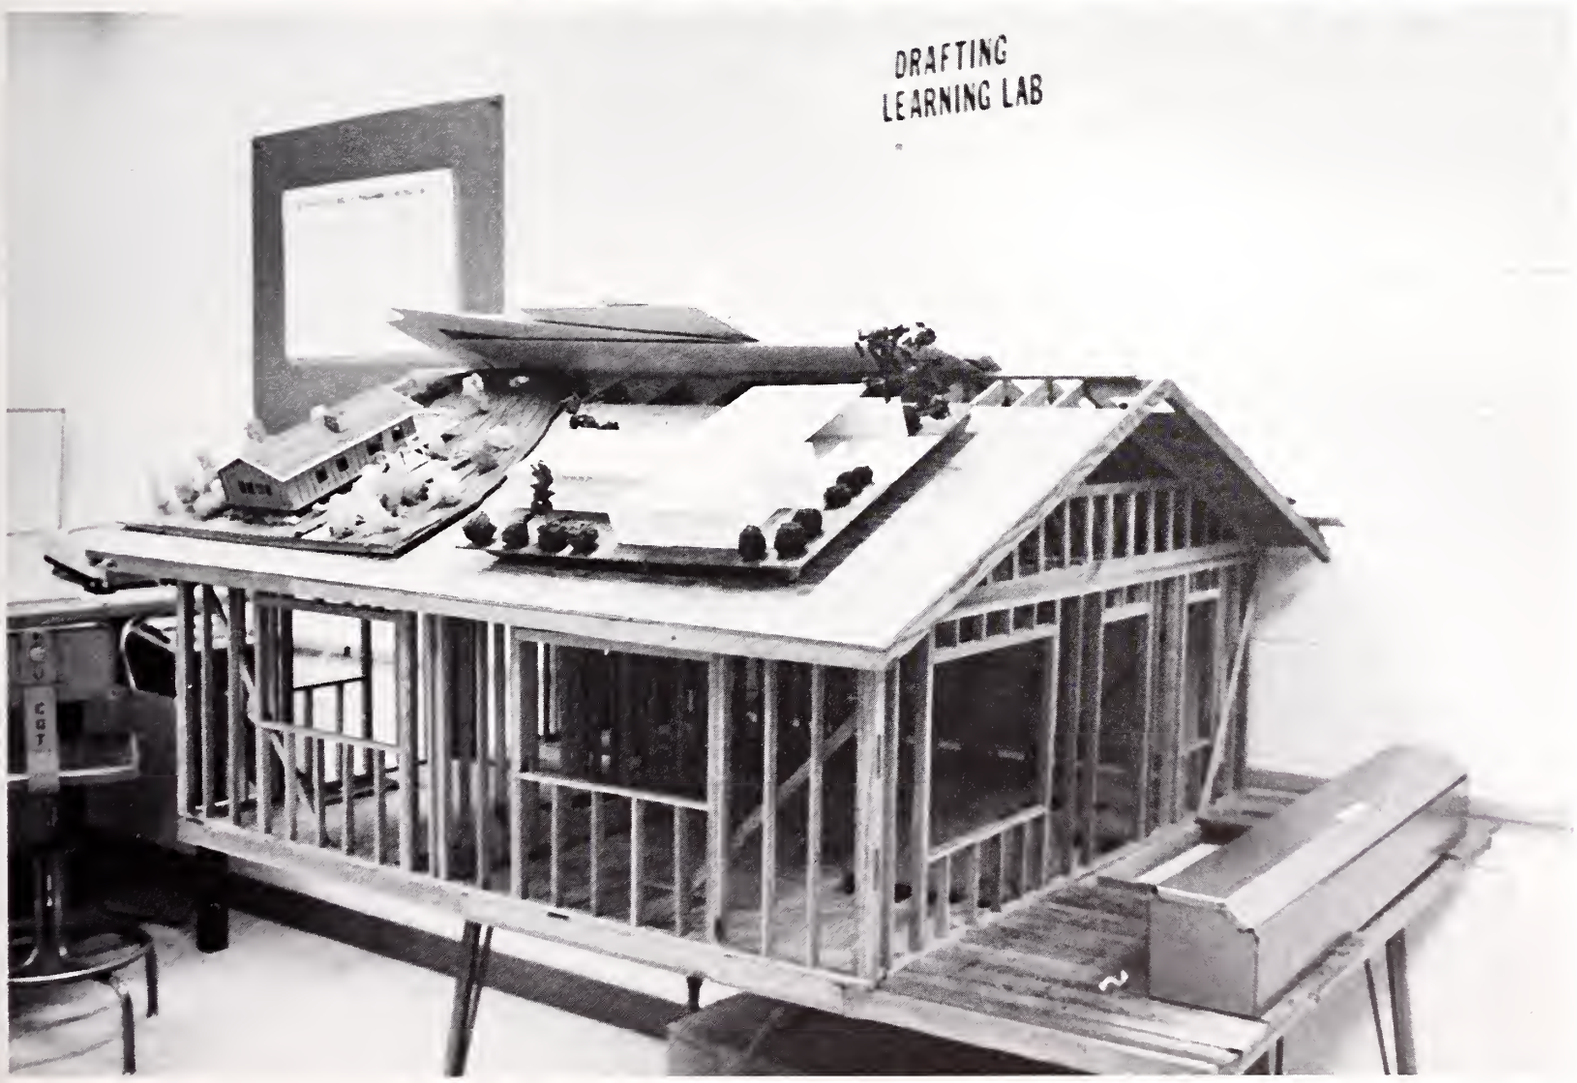
# ARCHITECTURAL ENGINEERING

**Things like drawing boards, rulers, blueprints and scales occupy the time of Architectural Engineering students. By the time they finish the program they've had a few math courses, a few English courses, and a whole lot of drawing courses.**

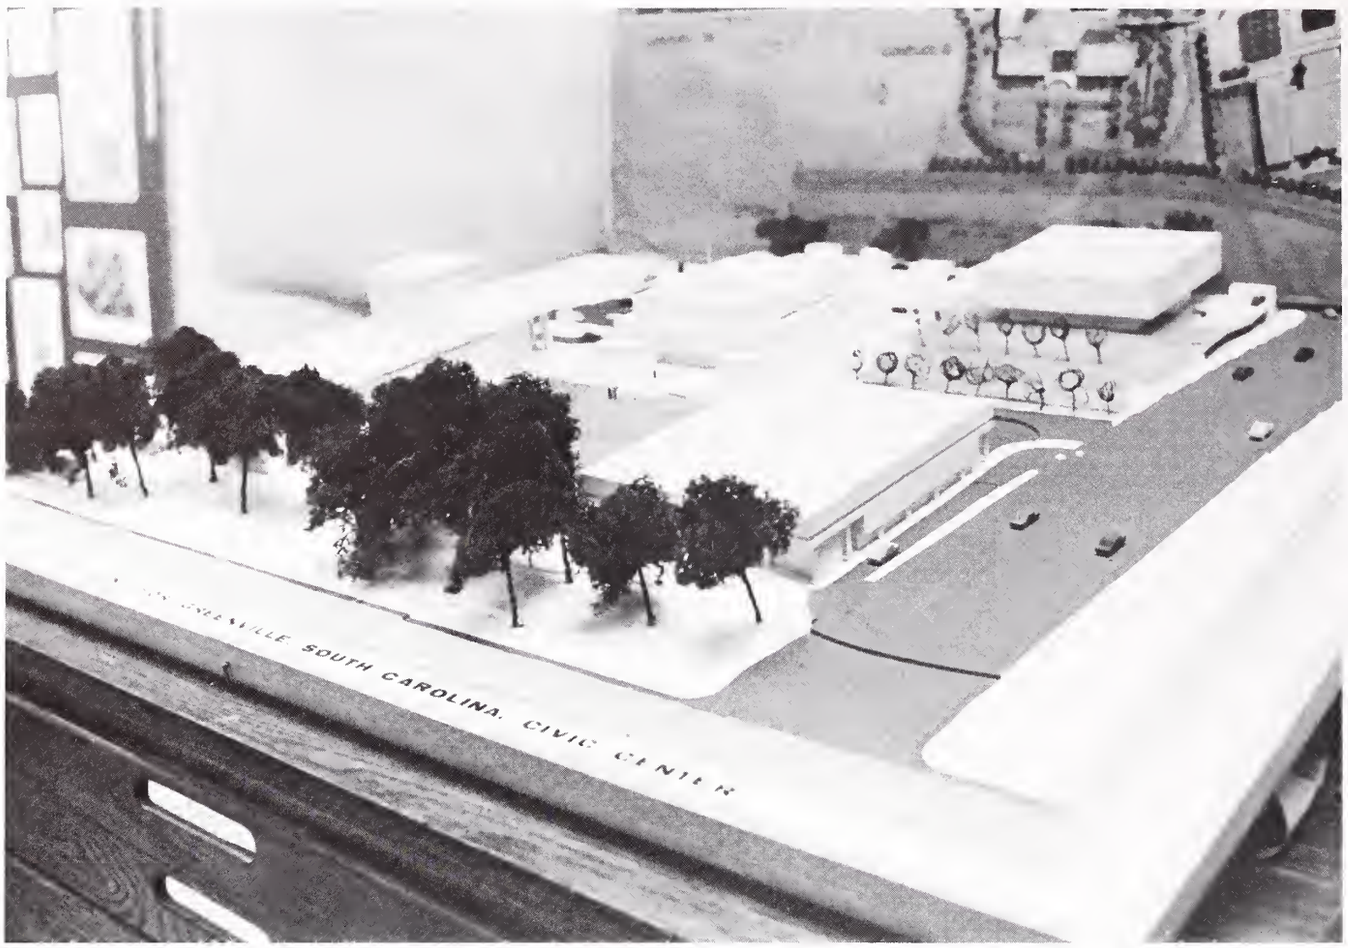


Ken Smith, Department Head

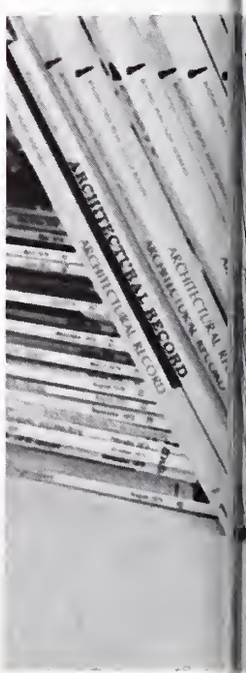




DRAFTING
LEARNING LAB



GREENVILLE, SOUTH CAROLINA, CIVIC CENTER



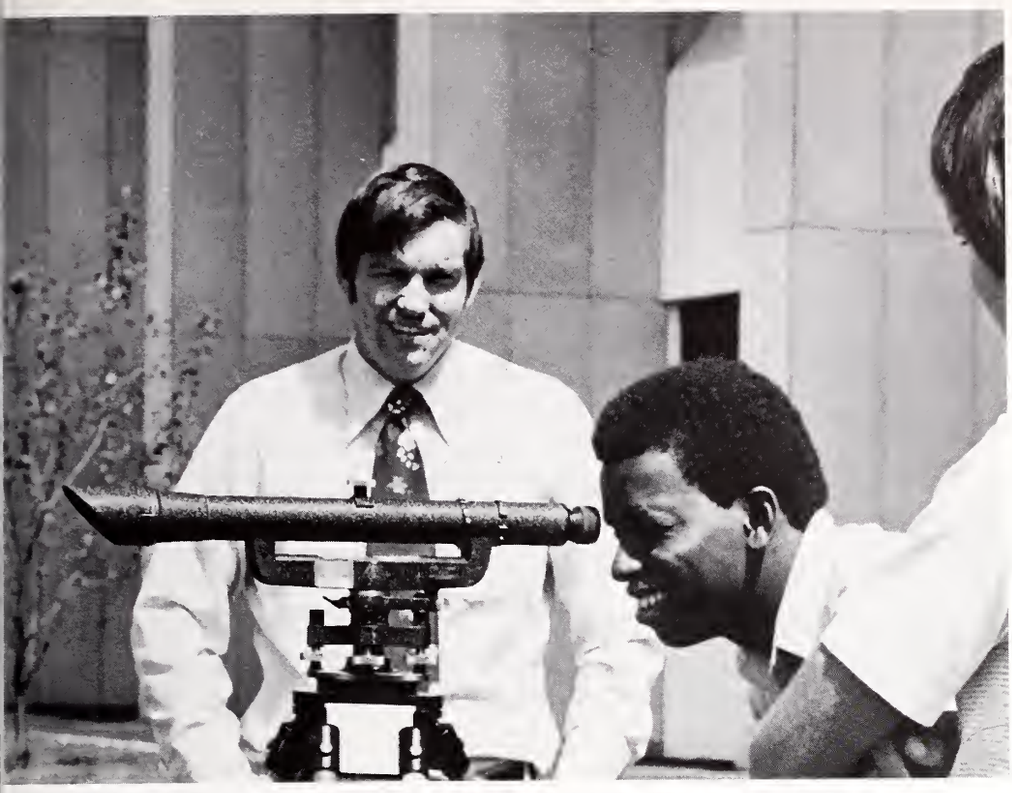
ARCHITECTURAL RECORD

ARCHITECTURAL RECORD

# BUILDING CONSTRUCTION

Drawing and using scale models are two of the favorite pastimes of the BCT students. But these students are not playing, they're learning to supervise construction crews and they need to know all about safety, materials, drawings, scales and anything else concerning the construction of building.

Jim Swinford, Instructor

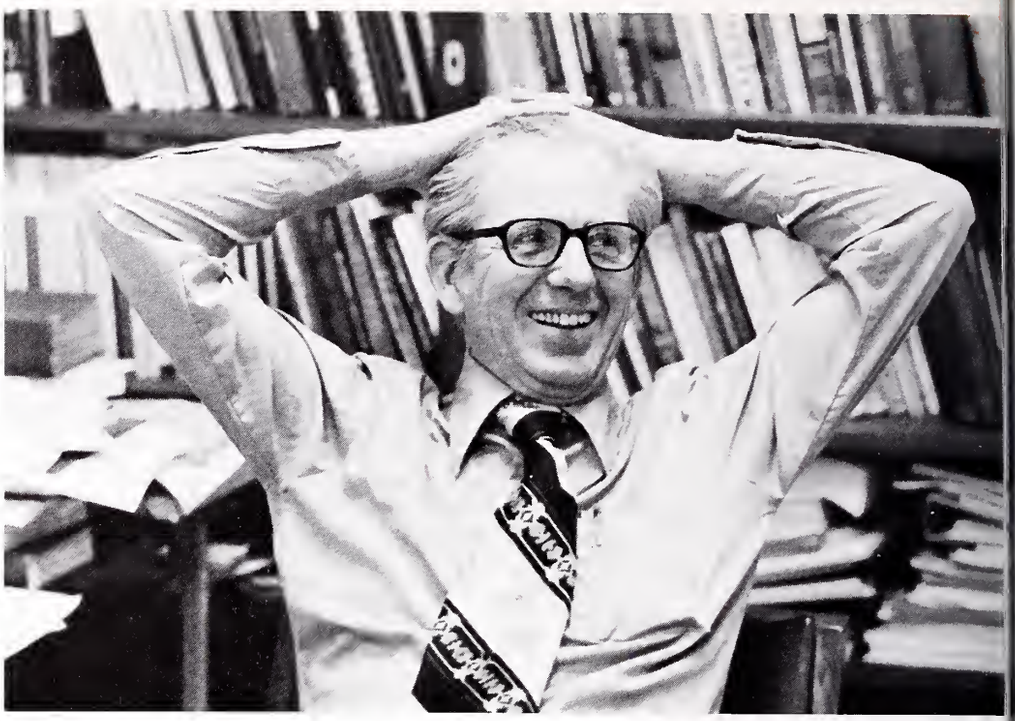


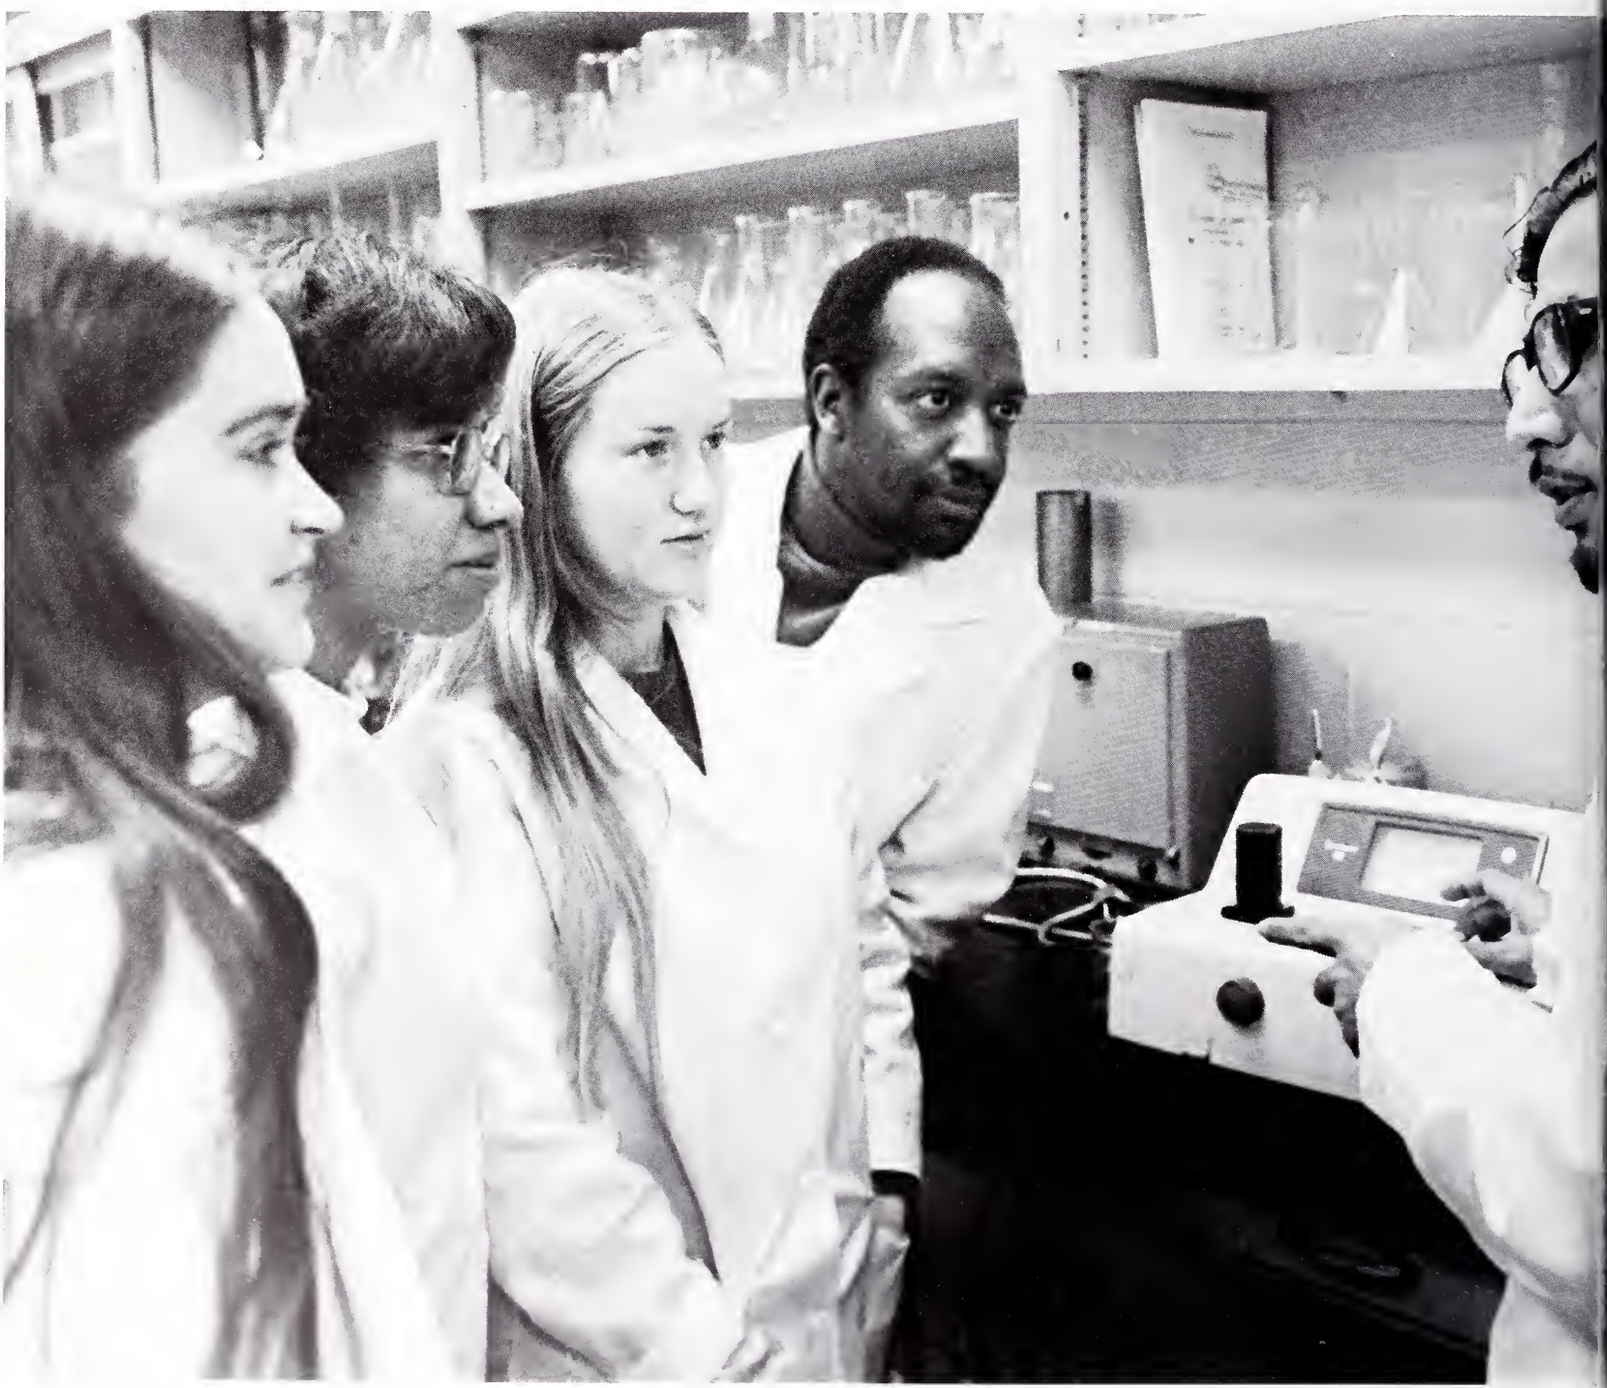
# CHEMICAL TECHNOLOGY

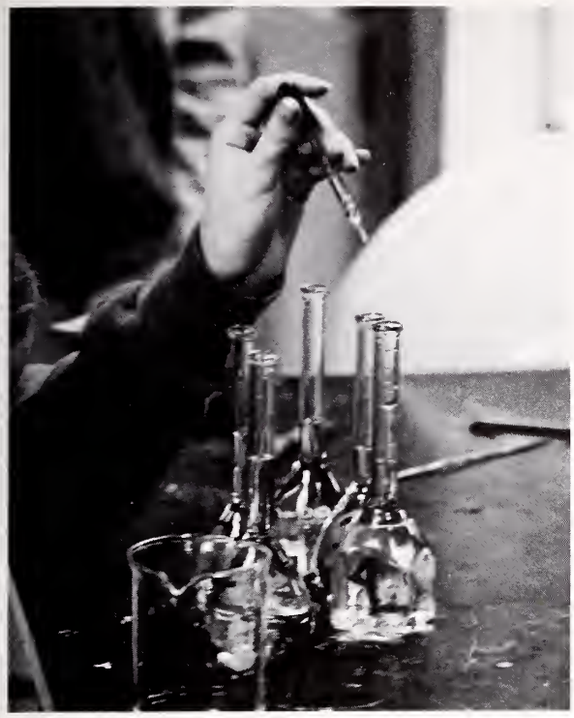
A chemistry lab is a fascinating place and there are some students at TEC that find it so fascinating they have decided to make it their profession. Their world is filled with bottles and formulas and tubes and gasses and acids and bunsen burners.

Right, Jim Hindman, Department Head

Below, Dr. Shashi Rishi, Instructor

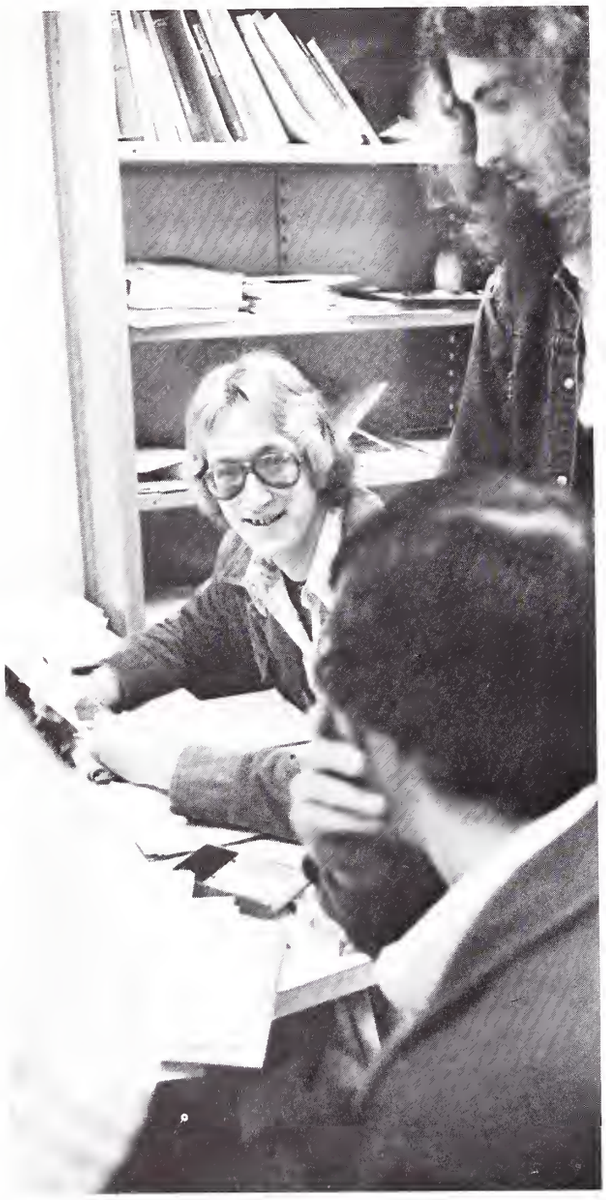






# CIVIL ENGINEERING

Civil Engineering students study more than surveying. They have courses in chemistry, hydraulics, cost estimating, steel design and even statics. These people are going to help build our bridges and maybe even some of our buildings.



Right, Jim Freeland, Department Head

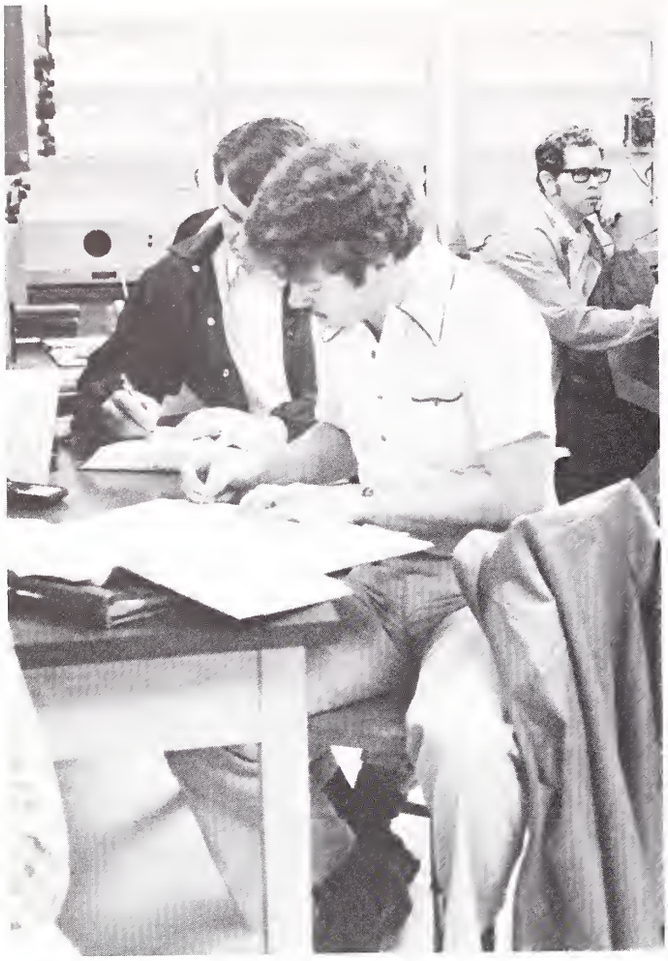
# ELECTRONICS ENGINEERING

**Where would IT&T be if their computer stopped working; where would the polcie department be if their radio went on the blink; where would you be if your TV wouldn't play? Thank heaven for the Electronic Engineering students who are studying all about these important instruments.**

**Ken Elder, Instructor**

**Bill Rochester, Instructor**

**Walter Hicks, Department Head**

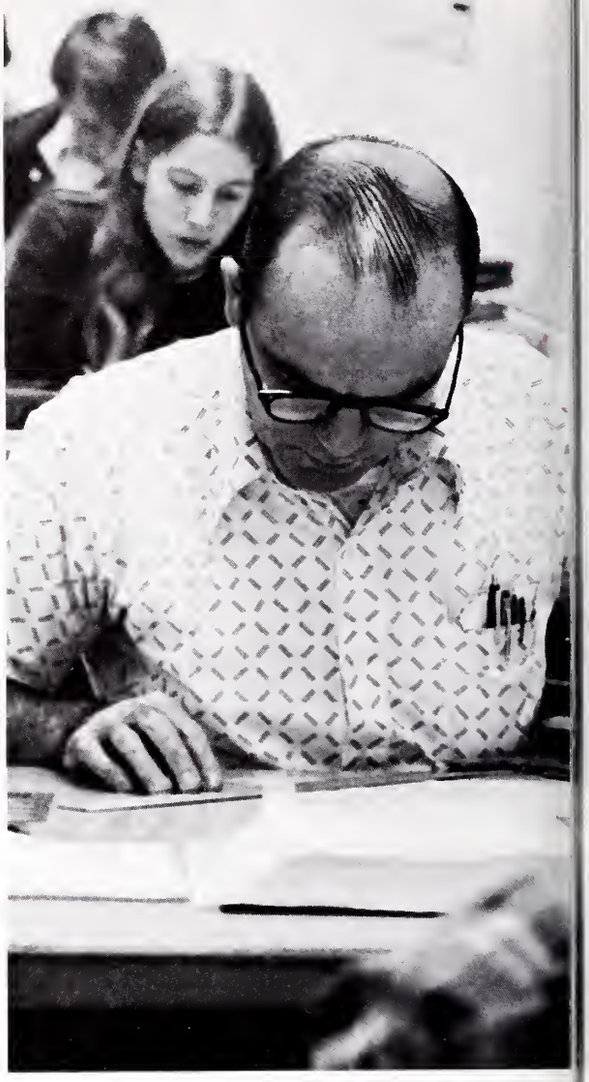


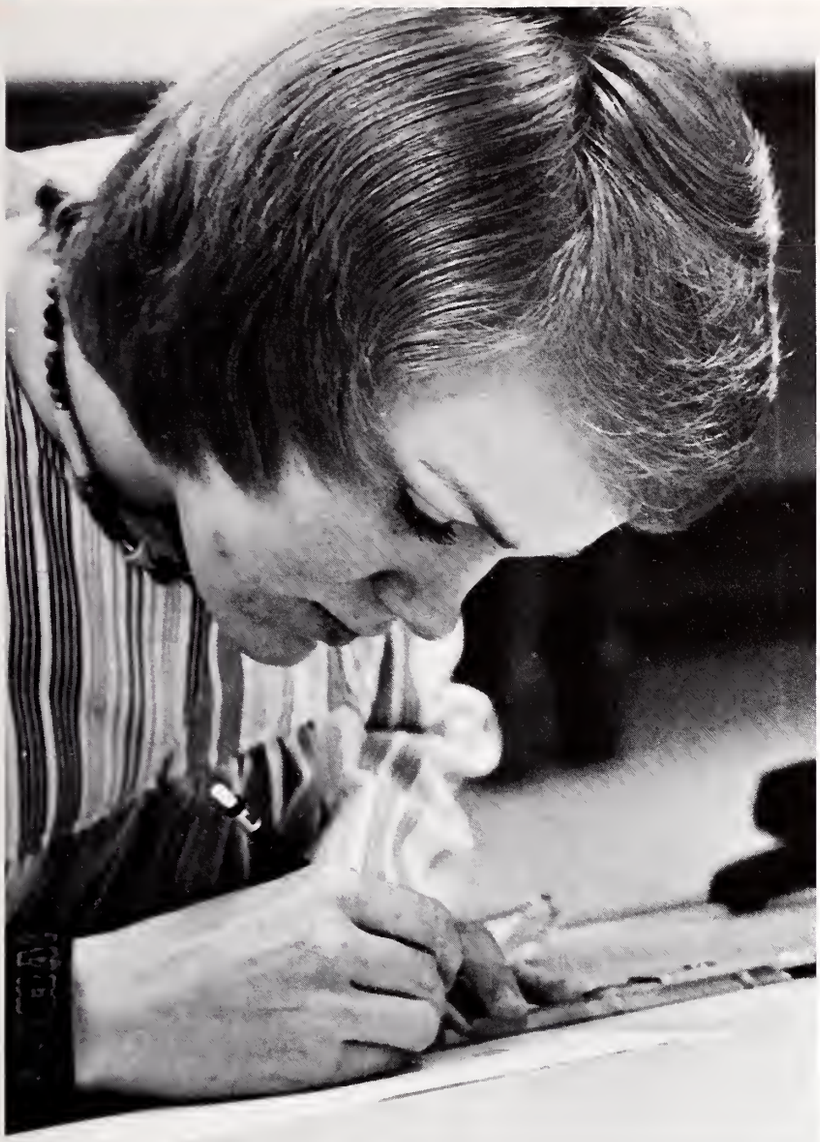
# ENGINEERING GRAPHICS

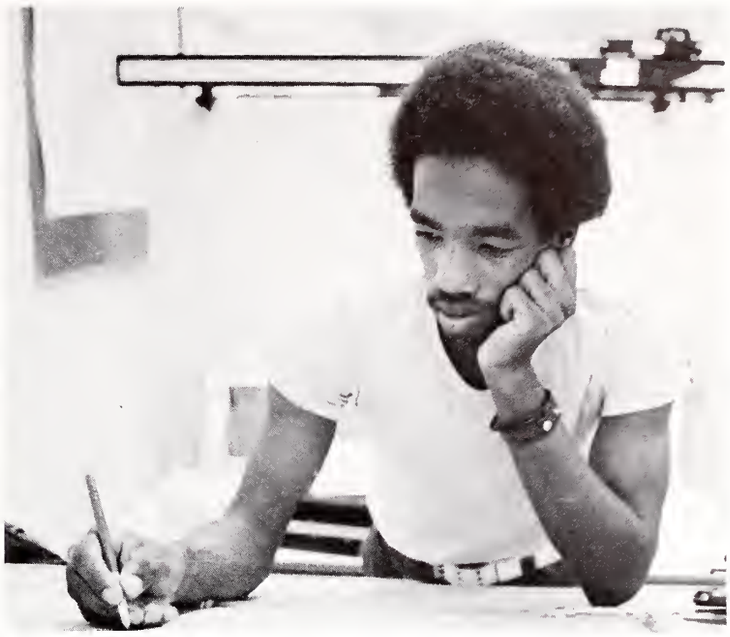
Try to imagine drawing a diagram of an airplane including the engine, the electrical wiring and every little detail. Or think about drawing the plans for an industrial plant. The Engineering Graphics students are doing more than imagining it, they are learning to actually do it.

Above, Clarence Balch, Instructor

Walter Rice, Department Head







MBINATIONS

# INDUSTRIAL ENGINEERING

**The main job of the Industrial Engineering graduates is to make sure everything is done efficiently. So they are studying quality control, motion and time study and plant layout. They're the efficiency experts.**

Above, Harvey Wilkie, Instructor

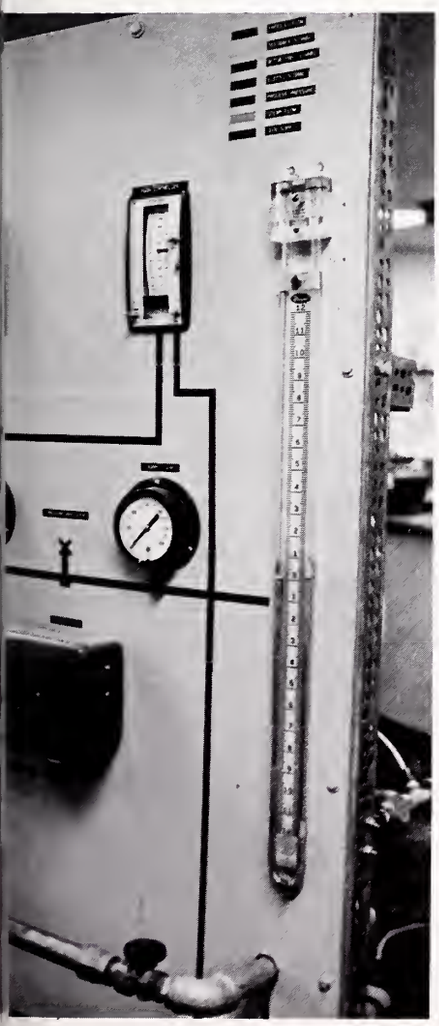
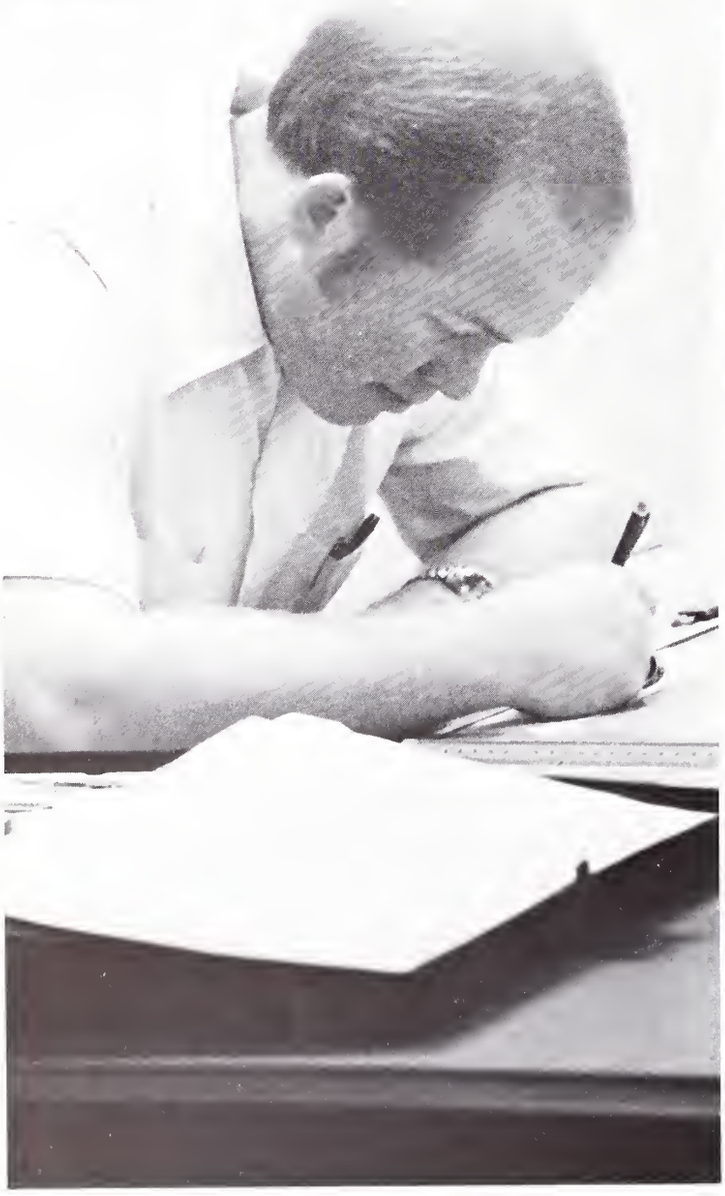
# MECHANICAL ENGINEERING

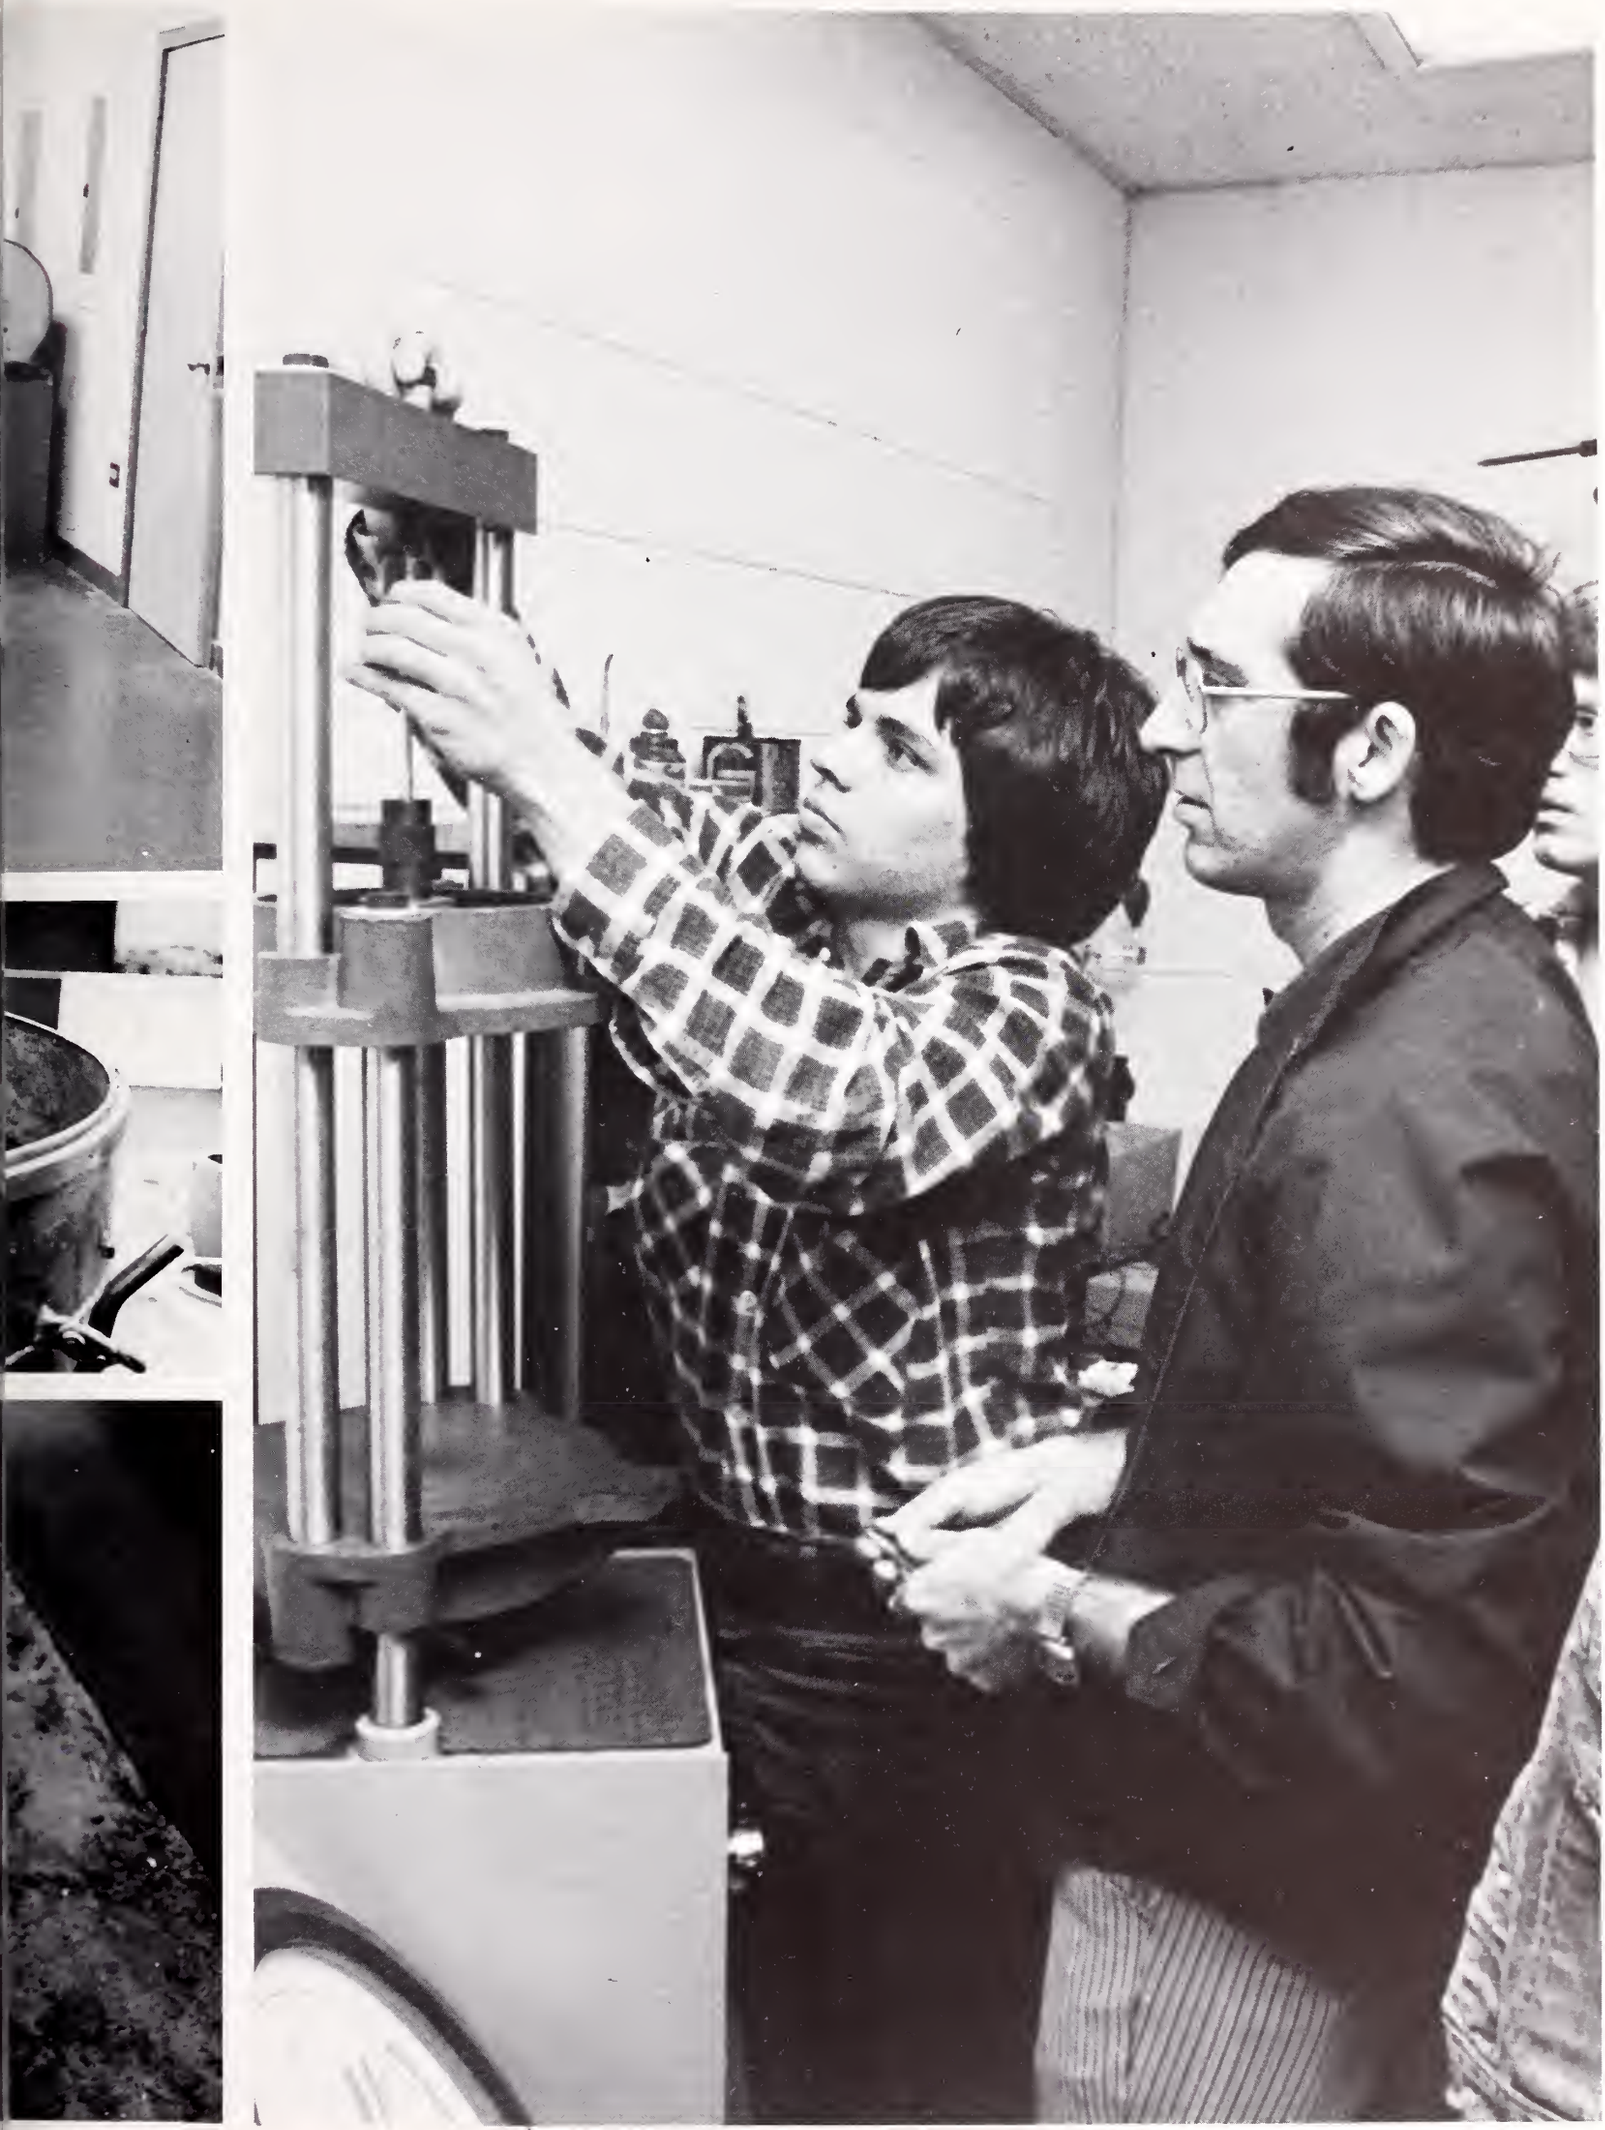
Metallurgy, stress tests, statics, hydraulics, and even mechanical drawing occupy the time of the Mechanical Engineering students. They've made gamecocks and tigers and keys; they've used all kinds of hydraulics and pneumatic equipment; these guys have had a pretty busy year.

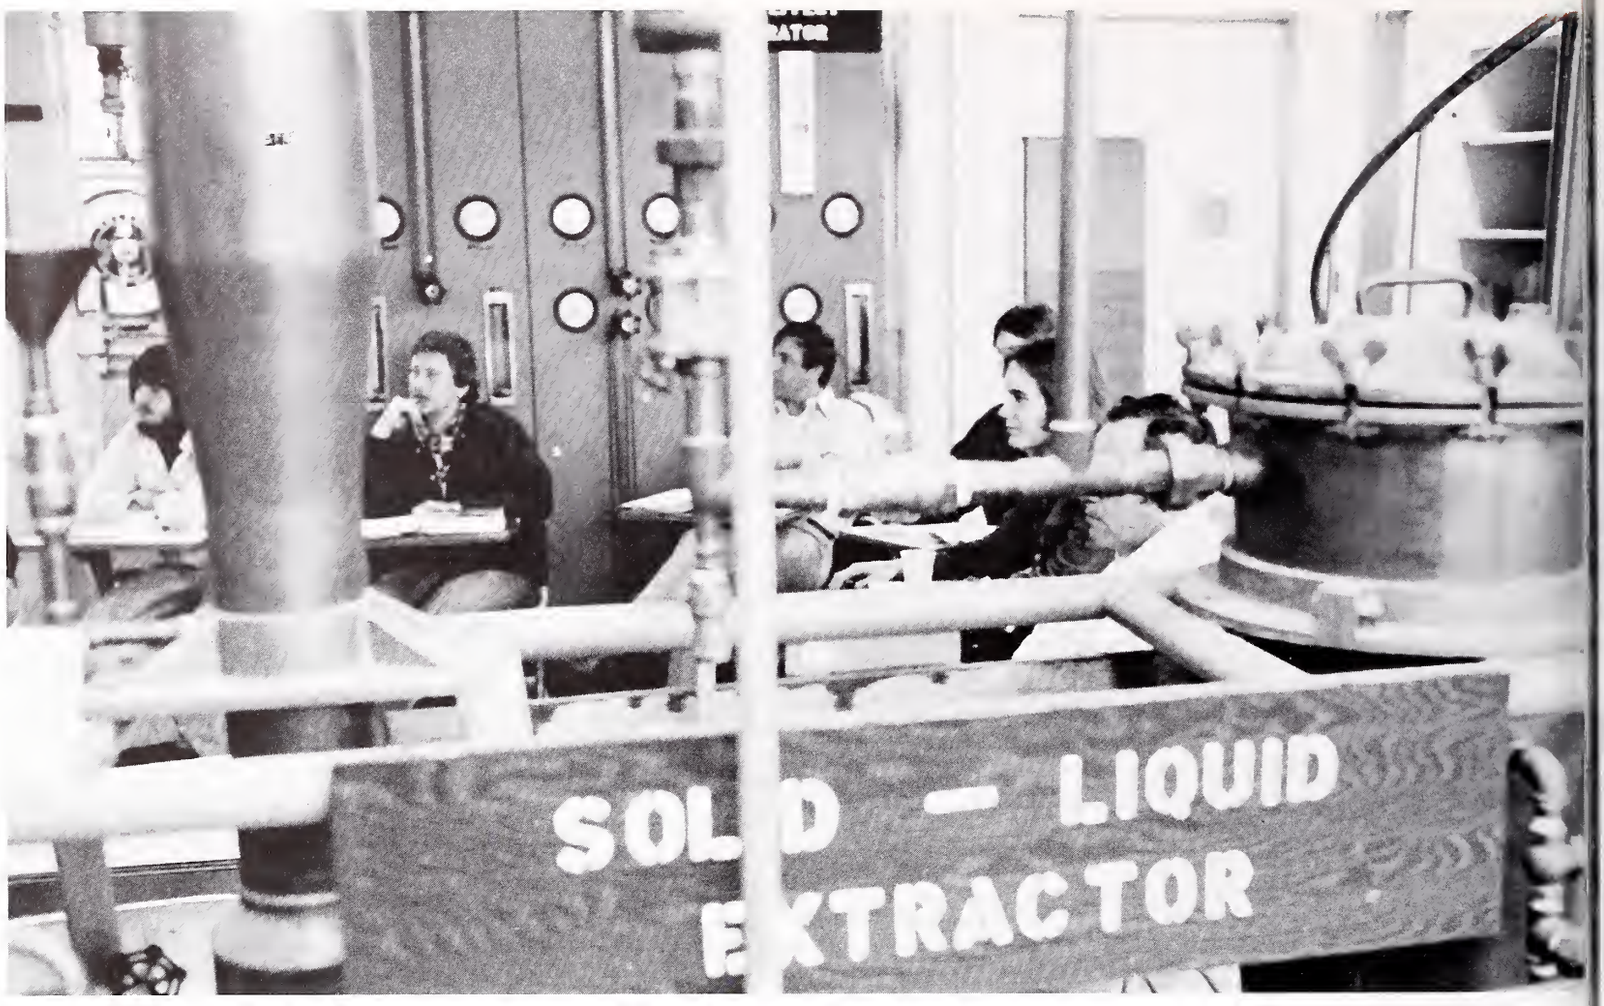
Above, Dave Pawluk, Department Head

James R. Thompson, Instructor









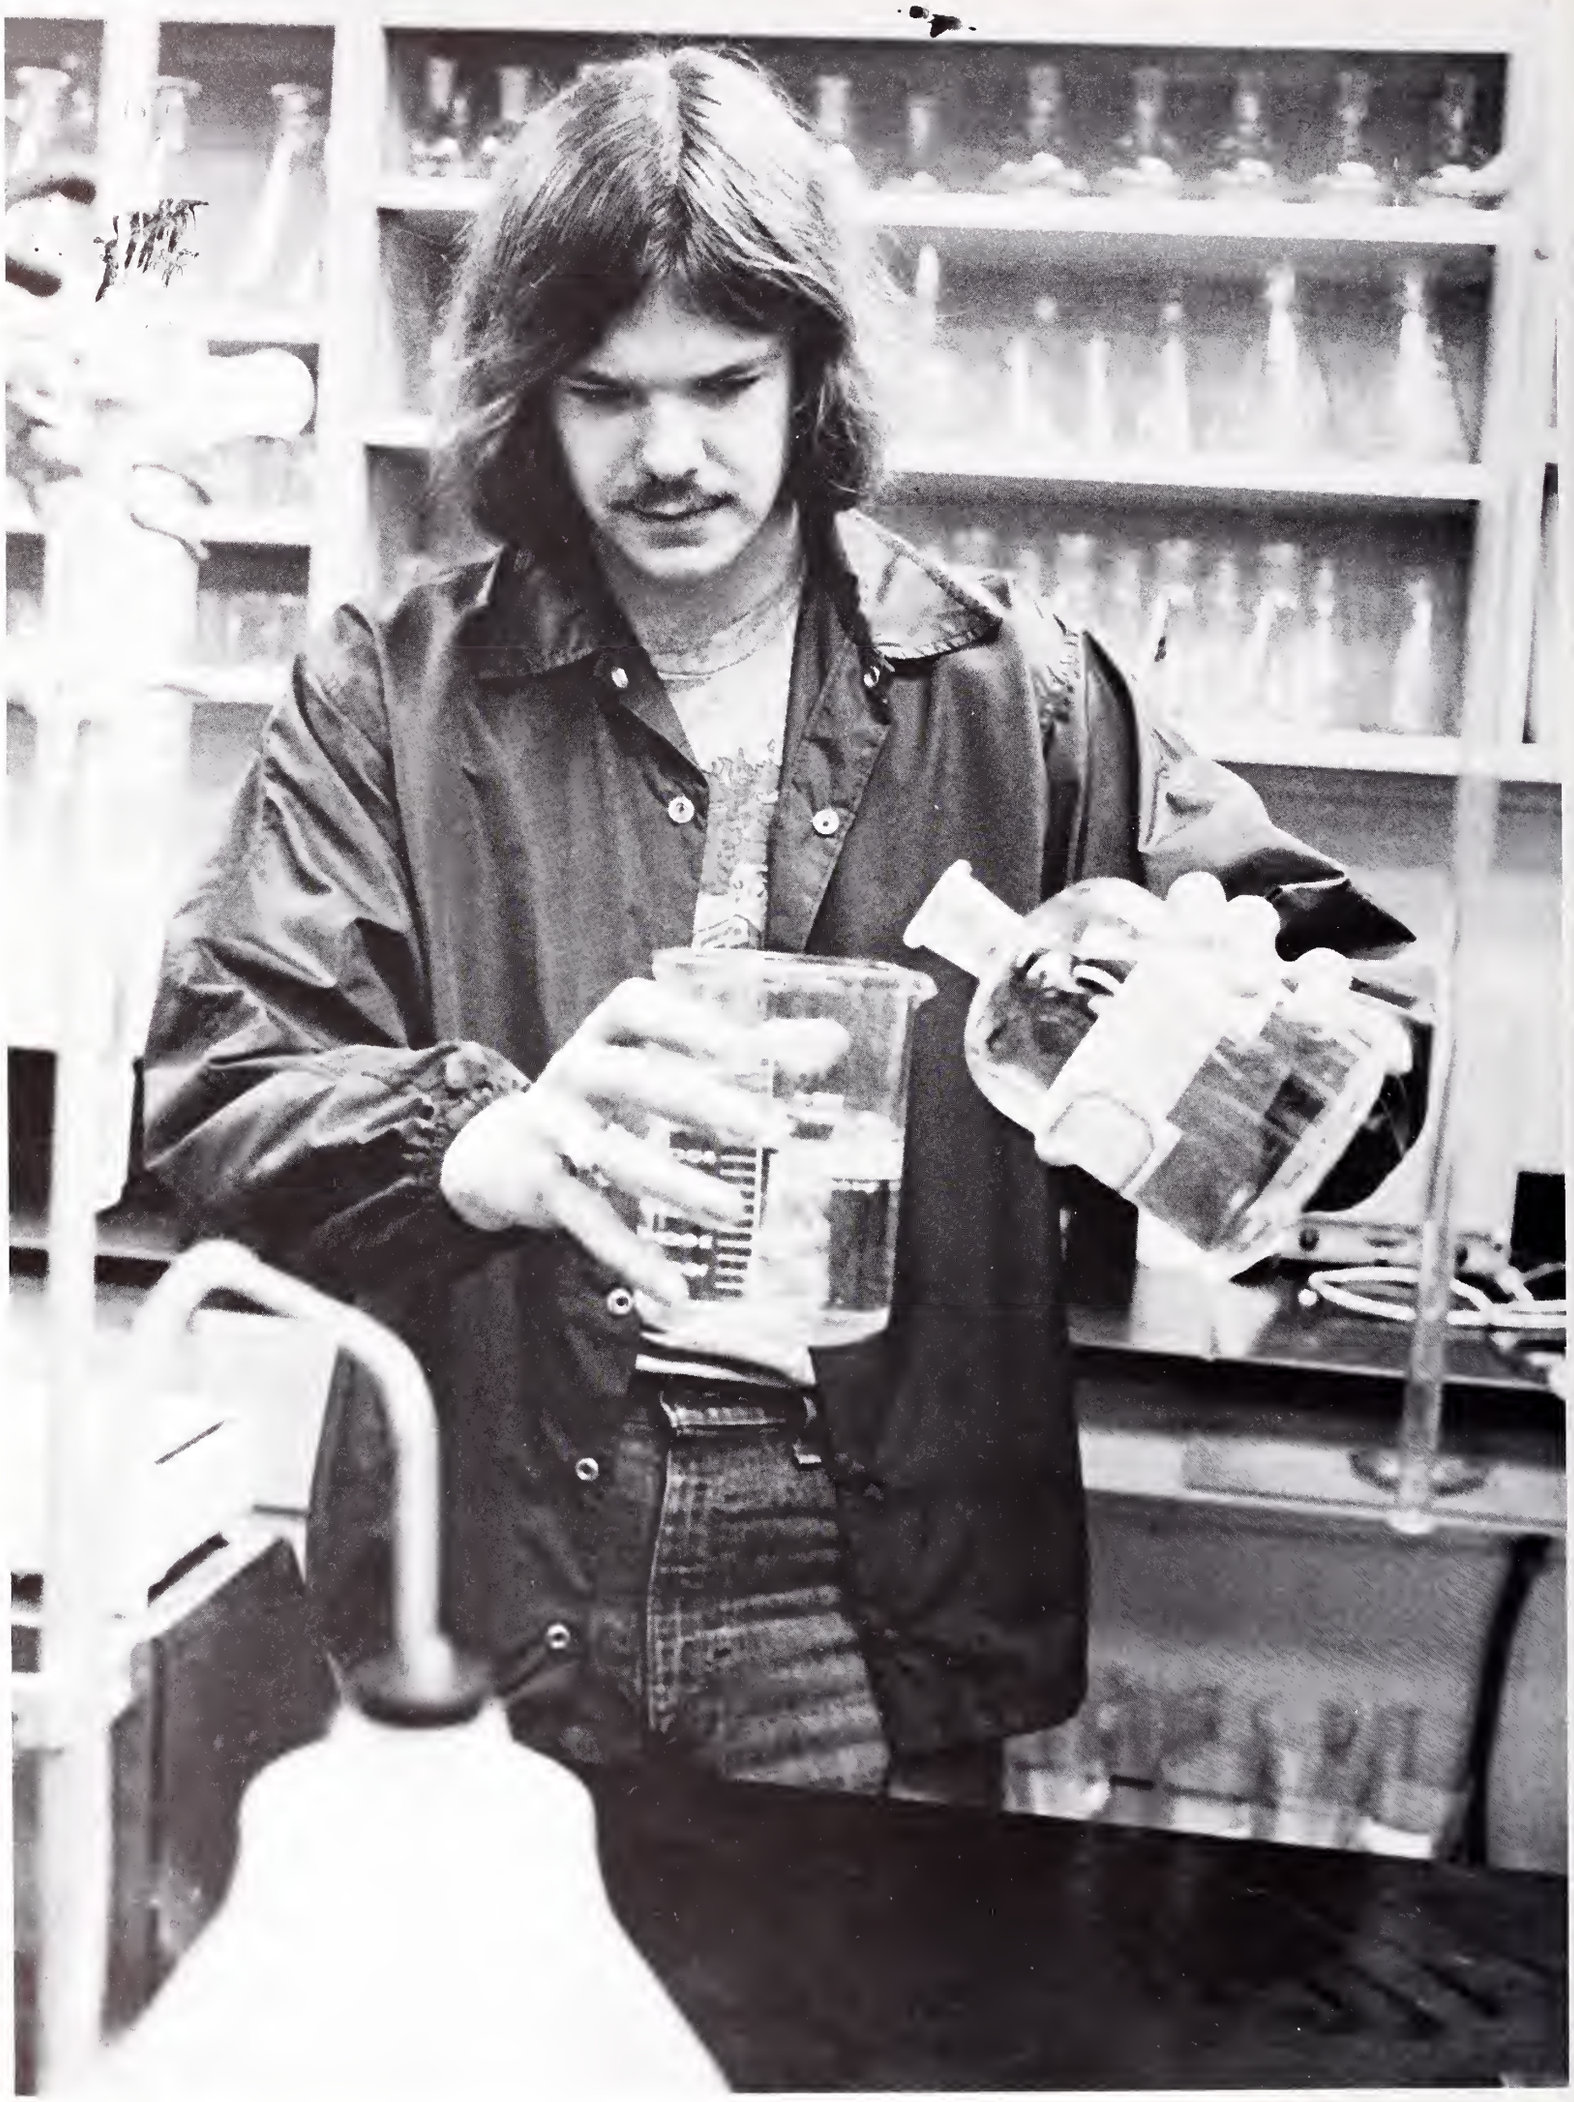
SOLID — LIQUID
EXTRACTOR

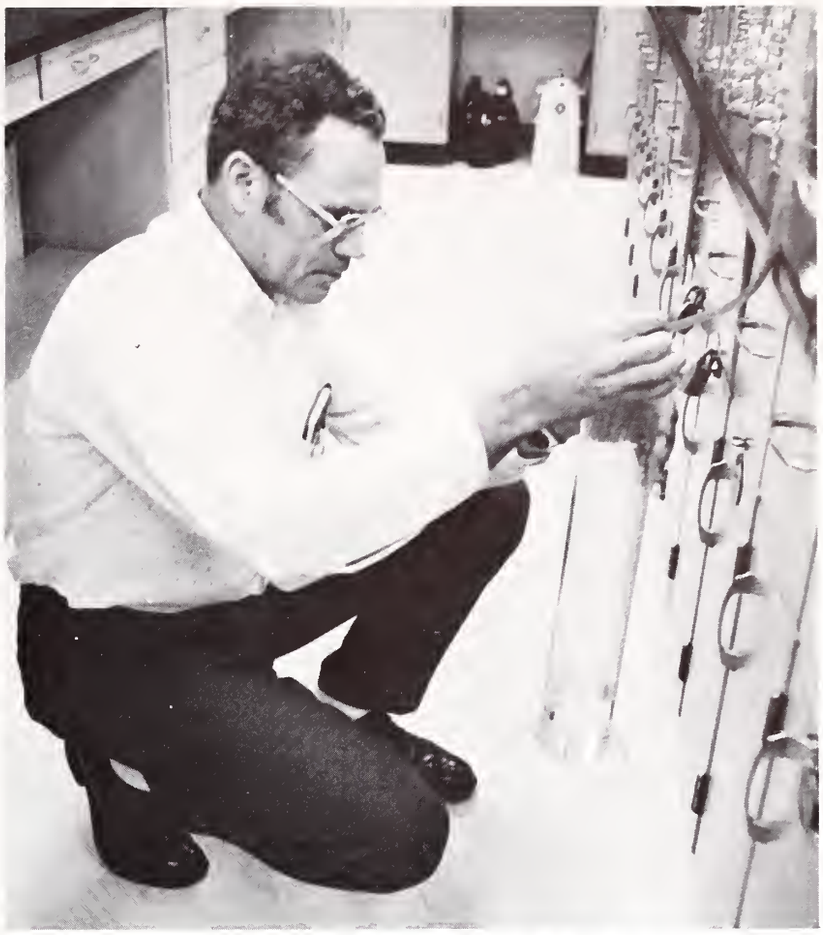
# WASTEWATER TECHNOLOGY

**The students from Wastewater Technology have taken field trips to analyze water samples from streams and lakes all over the county. Their days are filled with tests and formulas, pure water and all kinds of chemicals.**

Above, Jim Chocklett — Project Director

Top left, Larry Lagmen, Instructor





# Transportation Division

Moving On, Killdozer, and all the race car movies ever made could have been filmed at the Transportation Division. Truck Drivers, those CBers, are all out at Donaldson learning how to avoid Smokeys. The heavy equipment students are learning how to keep the diesel engines in tune so they can out run the Smokeys. The auto mechanic students are learning how to install CBs so everybody can keep in touch.

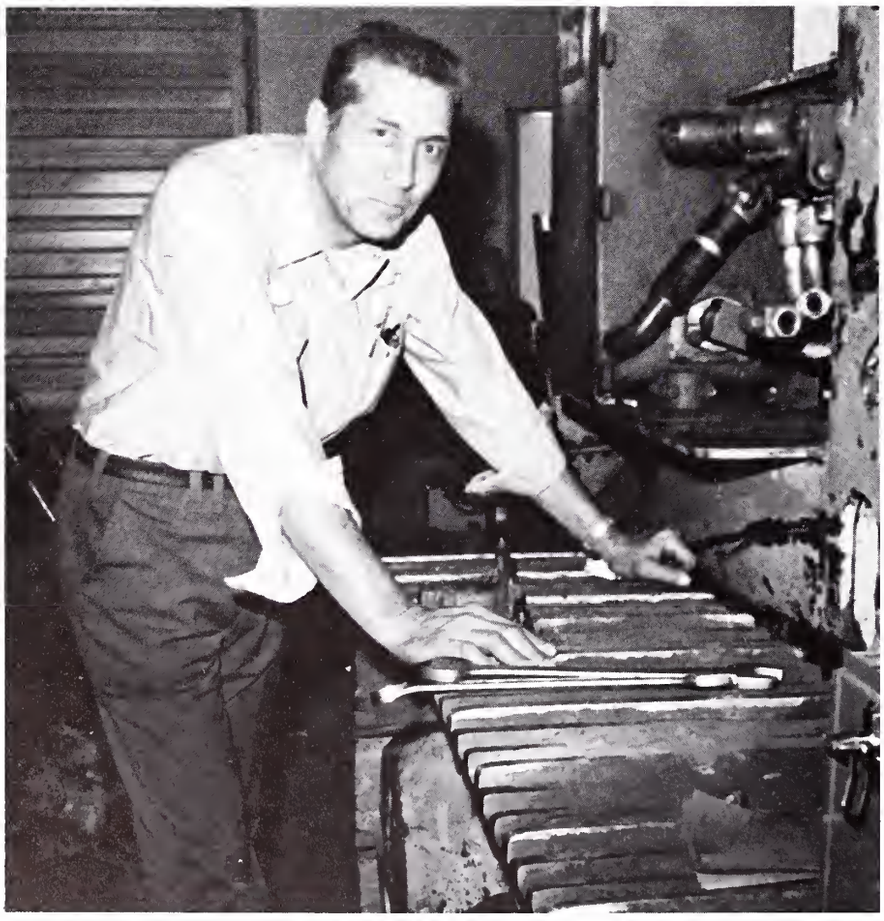
317 Diesel Mechanics and Heavy Equipment Operators
323 Mechanics
327 Truck Driver Training

# HEAVY EQUIPMENT DIESEL MECHANICS

**It takes a lot of courage to handle one of those big machines. Crawlers and loaders and backhoes, the Heavy Equipment students learn to operate and repair them all. The students are ready to move the world when they graduate.**

Lester Carroway instructs.

On-the-job training with Travis Kelly



William H. Hawkins, Instructor

Ralph Hunt, Instructor

2000
2000

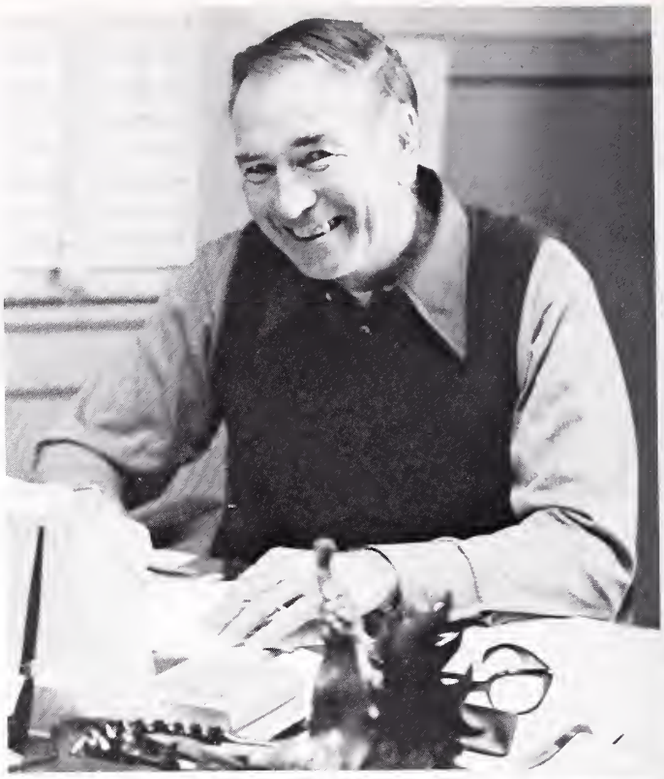
# AUTO MECHANICS

From Fiats to Volkswagens to Firebirds the automotive students learn to repair all kinds of cars. Their world is made up of voltage regulators, batteries, radiators, valves and all the other complicated parts of automobiles.

Above: Robert R. Babb, Instructor

Bill Loukides, Department Head,

Right: Ralph Emus, Instructor



# TRUCK DRIVING

Dreams of cross country driving, CB radios, and big salaries fill the heads of the Truck Driving students. They're out driving those rigs day and night. There's a lot crammed into the eight week course.

Hazel P. Hall, Vice President for Student Affairs

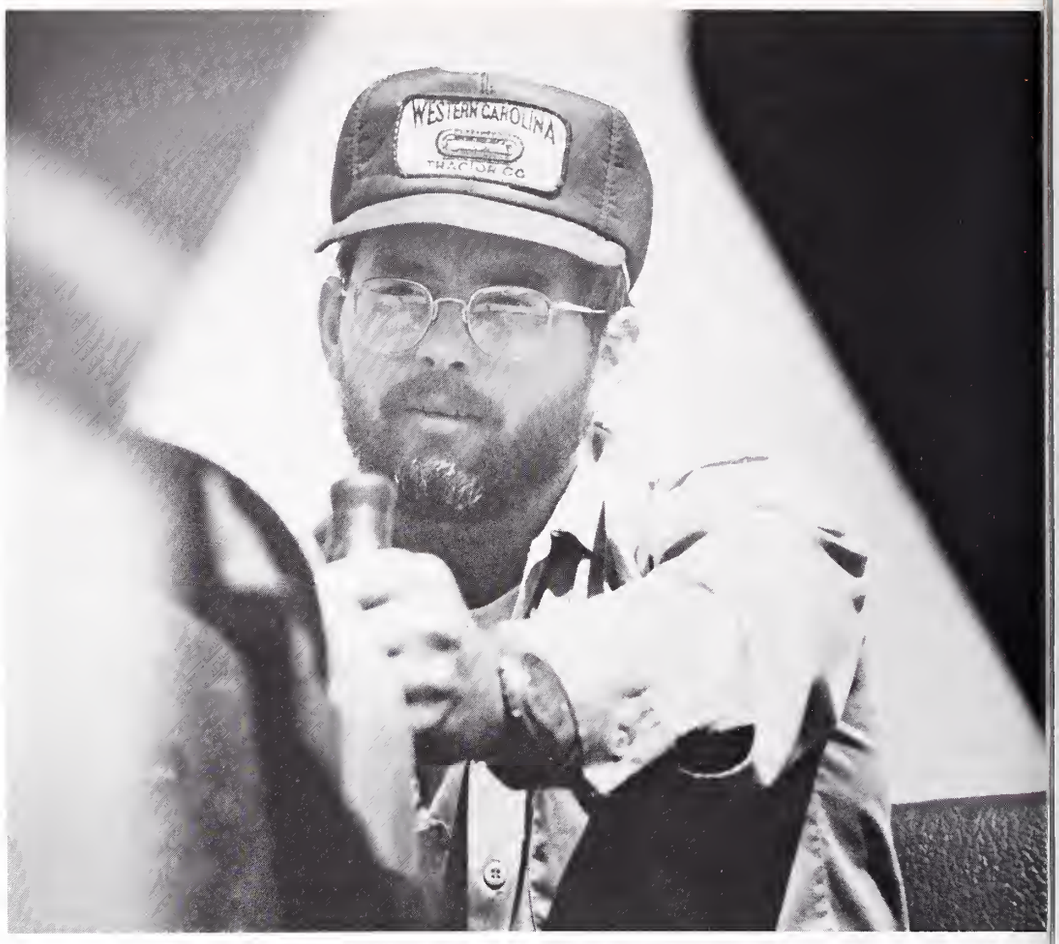
Stan Thompson, Coordinator for Student Activities

Jim Smith, Student Body President

Donna Pierce, Vice President of Student Body

Steve Mulkey, Secretary and Treasurer of Student Body

# Student Body Division Presidents



Kenneth Nicholson, Transportation

James Harris, Continuing Adult Education

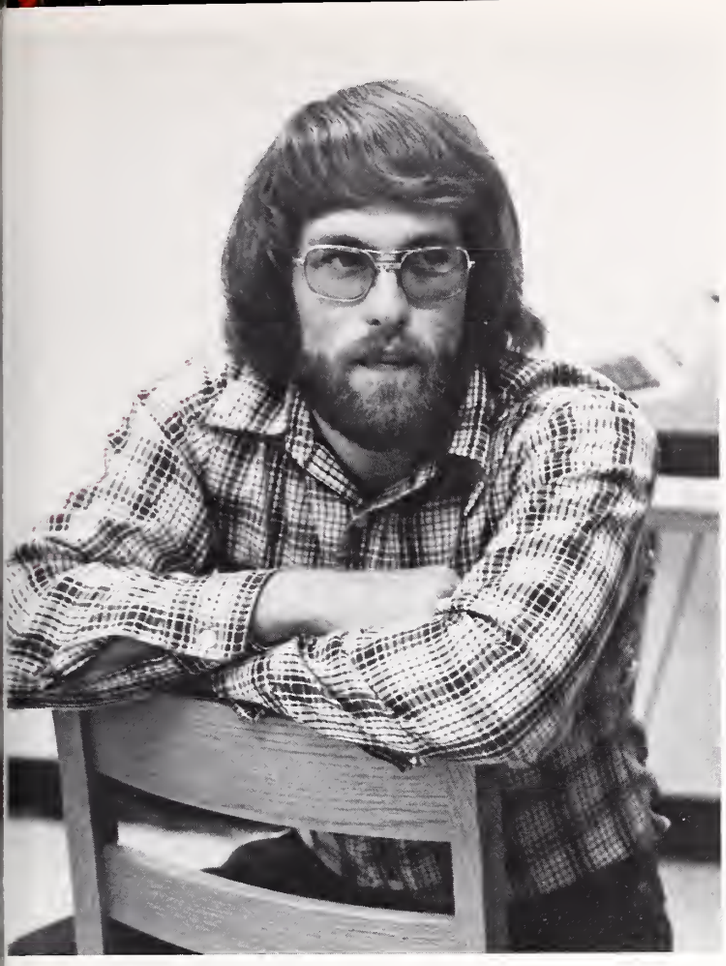
Tim Whiting, Industrial

Vicki Surratt, Business

Deborah Miller, Allied Health

Glenn Cox, Technical

Paul Williams, Arts and Sciences



# Student Court

Dexter Williams was appointed as Greenville TEC's first Attorney General this year. In this office he headed the judicial system, which is composed of one judge from each division. The judges were appointed by the Attorney General and approved by the respective division presidents.

The Student Judicial System was formed to hear appeals from students charged with violating one of the parking, litter or loitering regulations.

This year's board of judges has spent its time organizing the judicial system.

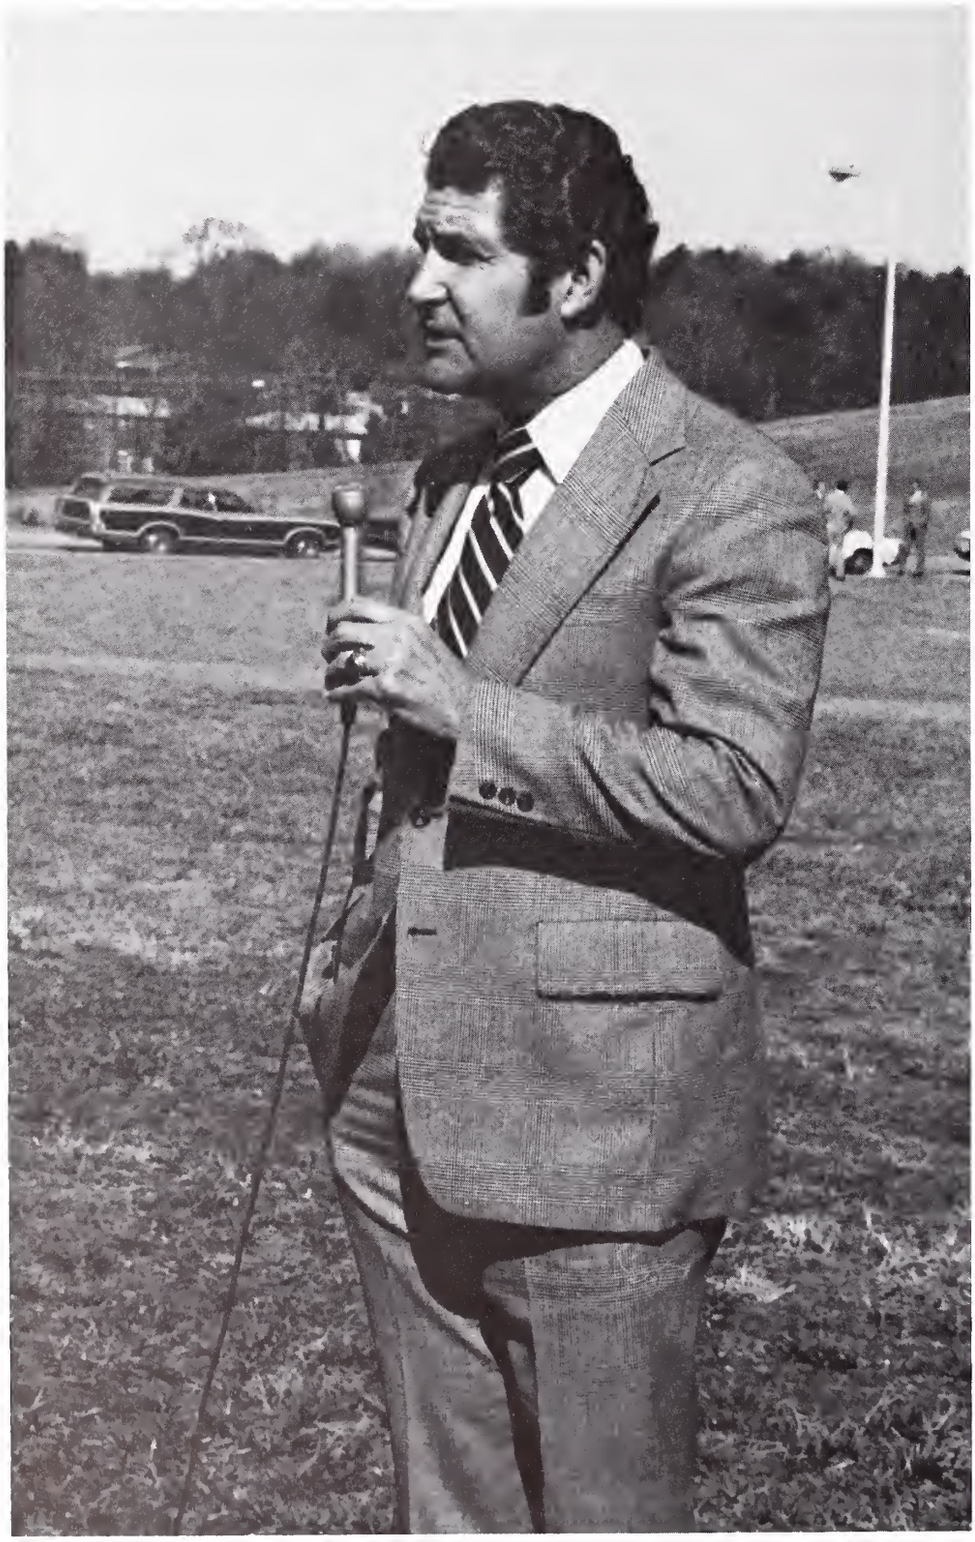
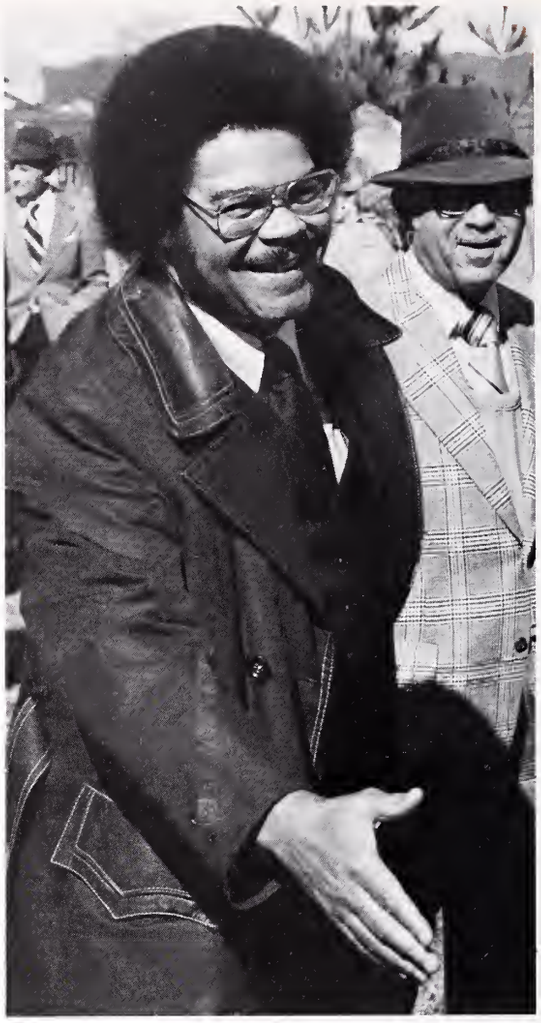
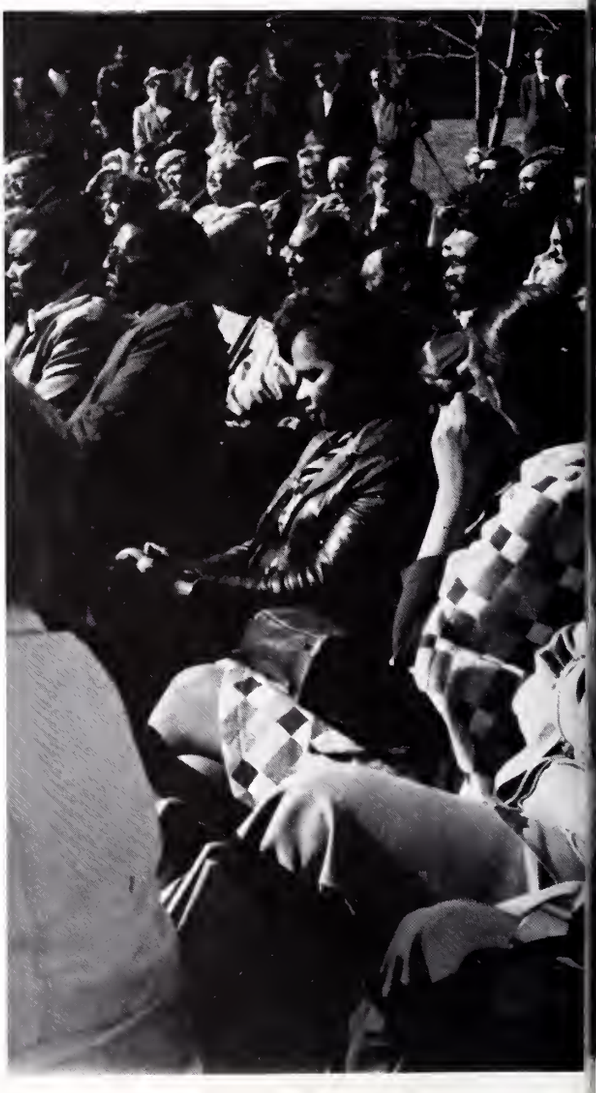
# GROUND BREAKING FOR FOOD SERVICE BUILDING

Need breeds hope, hope breeds plans, plans breed anticipation. And the anticipation was answered February 9, 1976 at the Groundbreaking for the Food Service Education Building. There's something about that first shovel full of dirt — it's the final preliminary. Now the real work begins and the dreams start to materialize. The GTEC board and several local dignitaries were on hand for the ceremony.



FONTAINE



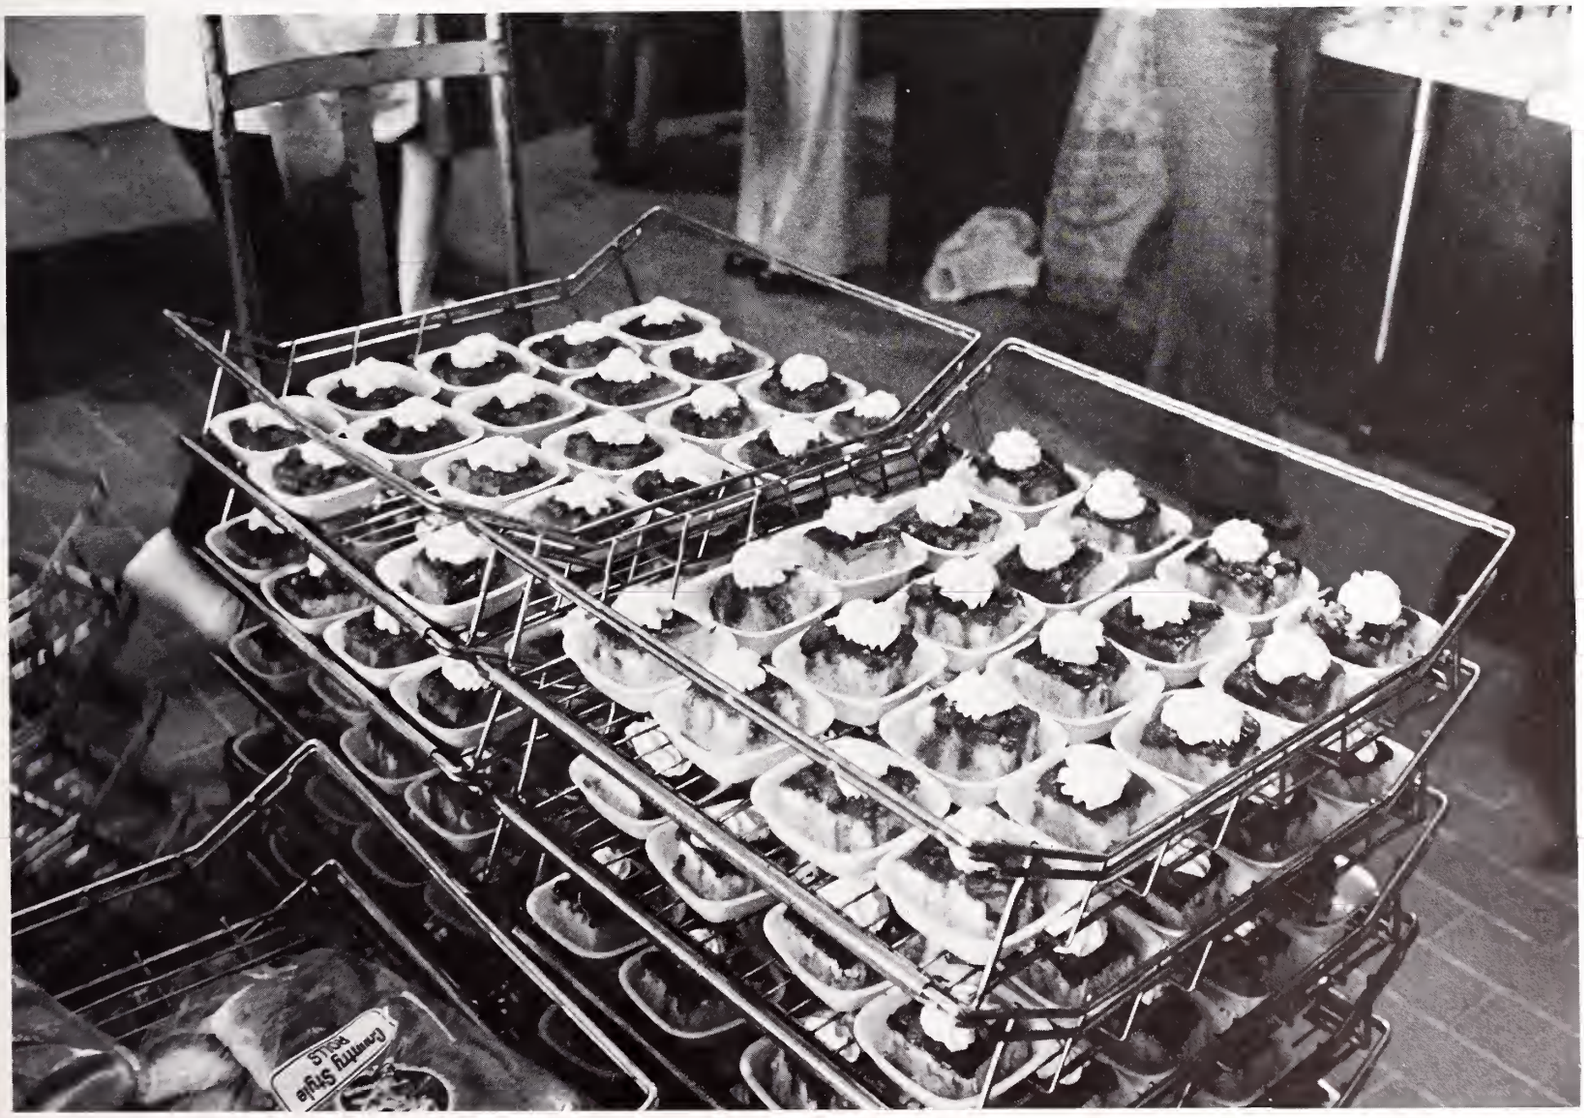


# THANKS FOR THE MEMORIES AND LONG HOURS AND DEDICATION AND . . . EVERYTHING ELSE!

Doing things the Greenville TEC way includes honoring the faculty and staff.

The second annual Faculty-Staff Appreciation Luncheon was held January 21, 1976. Dr. Don Aiesi, a professor at Furman, spoke on political prognostication and its impact on GTEC.

There was lots of food, smiles and thanks.



Country Style
Pork

# Adult Education — 10th Birthday

On February 12, the Continuing Adult Education Division celebrated its 10th birthday with an appreciation luncheon. Dr. Thomas E. Barton, Jr., President, Mrs. Hazel P. Hall, Vice-President for Student Affairs, and Mr. Julius Kilgore, Dean of Continuing Adult Education presented a most informative history of this division to the more than 350 community leaders and staff. At right, Mrs. Hazel Hall, whose untiring dedication and effort help bring the success of Adult Education at Greenville TEC, displays the birthday cake that was presented to her by her staff.

Those joining in celebrating with Mrs. Hall are: Bill Garrison, Viola Heath, and Aurelia Morrow.

# Advisory Council Makes Contribution

From the sale of an automobile, the Student Advisory Council contributes $100 to President Barton for the new Student Center at Greenville TEC.

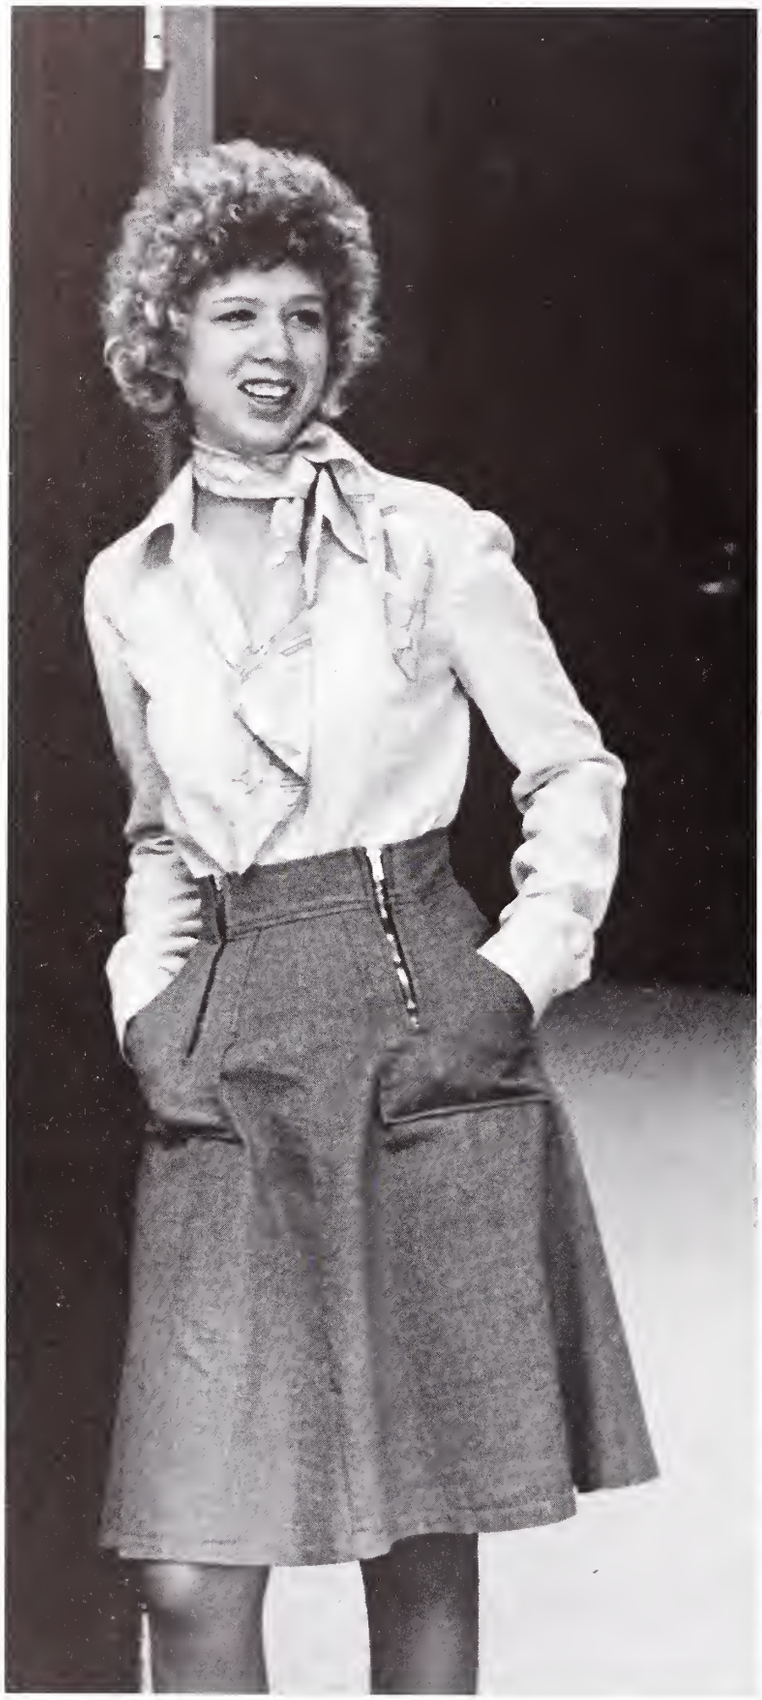
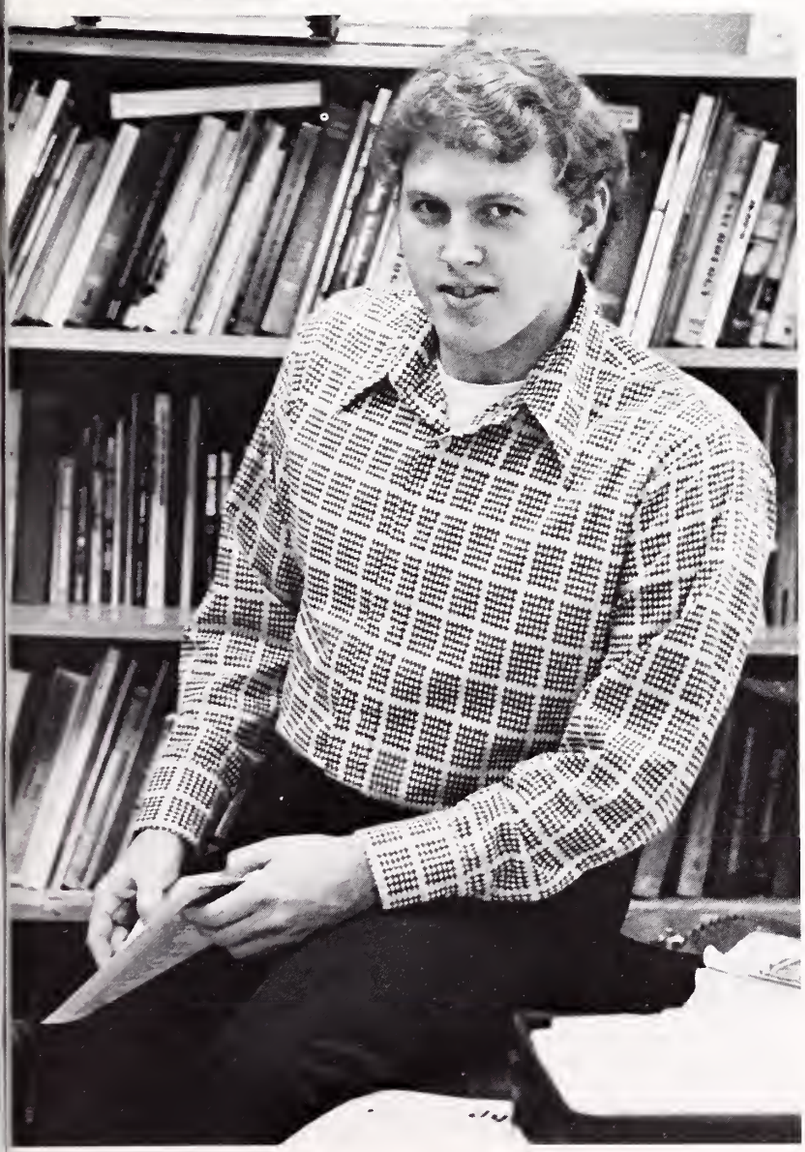
# Publications

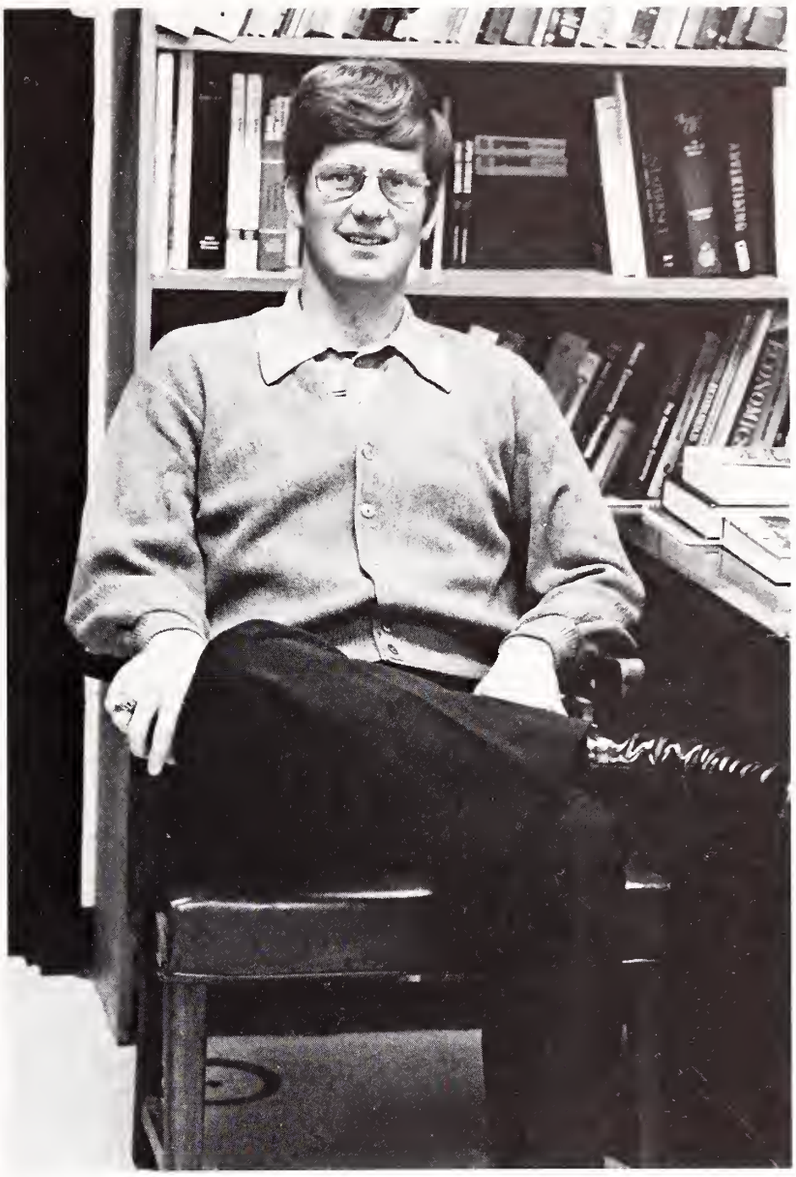


Janet Whiting, Copy Advisor

Rick Kelley, Reporter and Photographs

William Garrison, Advisor for Student Publications





Ellison Morris, Assistant Editor, Yearbook

Bill Tripp, Editor — Student Newspaper

Russ Scarborough, Editor — Yearbook

This has been a great year for me as your editor. Each year is a new experience, and each moment of our lives brings new discoveries which change the ordinary into the extraordinary.

The 1976 Tec-Nique is finally completed. There were many times when the staff became very despondent and afraid that we would not meet our deadline, but with the cooperation and hard work of each member, the Tec-Nique has become a reality.

In this book we have tried to display to every student the reality of Greenville Tec. This is your book and I trust that it will be one that you will cherish for a long time.
As my year as editor comes to a close, I would like to take this opportunity to pay special thanks to : Mr. Bill Garrison for his untiring efforts as Advisor and for putting up with me. Mrs. Hazel Hall for understanding support and for just being there whenever we needed her. Janet Whiting for her hours spent writing and typing copy: Mr. Stan Thompson for his timely efforts with pictures and many other things. Mr. David "Mac" McDonald for his professional dedication with layouts, design and photography. Bill Tripp for helping with individual student pictures. Rick Kelley for helping with pictures and to the entire staff for dedicating many hours to the Tec-Nique. Last, but no means least, to Ellison Morris for being the most outstanding and understanding Assistant Editor that anyone could have.

Words cannot express my gratitude to this year's staff. I only hope that as we venture into bigger and better things that our lives will be blessed. Also to those students who will be leaving as well as to those students remaining, I love everyone of you and hope that having passed this way that God will bless your lives. "This is the first day of the rest of your life."

Russ Scarborough, Editor
